

ITEM 7: STATEMENT OF COMMUNITY INVOLVEMENT FOR SCRUTINY COMMITTEE - MONDAY 10 NOVEMBER 2014

Agenda No Item

7. Statement of Community Involvement 2014 Review

INVESTORS
IN PEOPLE

This page is intentionally left blank

To: City Executive Board

Date: 19 November 2014

Report of: Head of City Development

Title of Report: Statement of Community Involvement

Summary and Recommendations

Purpose of report: CEB is requested to agree the draft updated Statement of Community Involvement to publish for public consultation.

Key decision: Yes – affects all wards

Executive lead member: Councillor Bob Price, Board Member for Corporate Strategy, Economic Development and Planning

Policy Framework: SCIs are part of the legislative framework within which local plan documents are prepared. In addition, the aims and commitments in the SCI are consistent with the Council's recently-updated Public Engagement Policy Statement (formerly the Consultation Strategy).

Recommendation: That the City Executive Board agree to publish the draft Statement of Community Involvement for public consultation.

Appendices to report

Appendix 1 – draft Statement of Community Involvement

Appendix 2 – examples of draft supplementary guidance and help sheets to be added to City Council website

Appendix 3 - Risk register

Summary

1. This report summarises the main changes made to the Statement of Community Involvement (SCI) in the new revised 2014 version.
2. The SCI details how we propose to engage local people and organisations in the development planning process, both in planning policy and development management. An SCI was first adopted by the Council in 2006 and this version refreshes that document, to encourage greater and earlier public engagement, and to bring it up to date with current consultation methods and regulations.
3. It is recommended that CEB agree the draft revised SCI to be published for public consultation.

Background to the Statement of Community Involvement

4. It is a key objective of the Town and Country Planning system, and of 'localism', to strengthen community involvement in the planning and development process. Planning affects all communities, so it is important that local people understand the process and have the opportunity to get involved.
5. The City Council has a legal duty to produce an SCI under the Planning and Compulsory Purchase Act 2004 (as amended).
6. The SCI is a legal planning document that sets out how the Council will consult the public and other stakeholders when preparing statutory development plan documents and how it will consult on planning applications. It is essentially a procedural document.
7. The current SCI was adopted in 2006. There have been a great number of changes to the planning system since then. These changes have produced new requirements and processes for producing local plans, and for dealing with planning applications, and it is now appropriate to update and revise the SCI to reflect legal and administrative changes.
8. The SCI has been updated to reflect:
 - The City Council ambitions for greater and earlier public engagement in the planning process
 - Legal and policy changes: the Town and Country Planning (Local Planning) (England) Regulations 2012; the Localism Act 2011; the National Planning Policy Framework (NPPF) 2012; and Neighbourhood Planning (General) Regulations 2012.
 - Changes to the government's planning terminology, including the re-introduction of the concept of Local Plans, and a move from development 'control' to 'management' in the planning application process.

9. The new SCI is also designed to reflect four key principles for effective engagement in planning set out in the Planning Service Improvement Action Plan:
- **Timely and sustained** – events and activities should start before any planning decisions are made and engagement should last throughout the planning process and beyond;
 - **Inclusive for all local people** – those living and working in an area have a right to be involved, all parties are welcome, and process must take account of peoples' varied needs;
 - **Two way, open and responsive** – communication should be discursive not prescriptive, so that information can be debated and ideas exchanged; and
 - **A matter of public record** – the processes must be documented and published.
10. Since the last SCI was adopted, the ways in which the Council engages with the community have also developed and improved, including the Community Engagement Policy Statement 2014-2017. The Statement, which was approved for adoption in September 2014, sets out the ways in which the Council engages with the community, and specifically uses the principles of community to define how this can be further developed and improved. There has also been increased use of information technology, especially in communications between local residents and the City Council; and procedural changes, such as the format of planning committee.
11. The proposed revisions exceed the minimum requirements for consultation¹ and strive for best practice consistent with the efficient use of Council resources.
12. There are two main areas of planning in which the community can participate:
- Development management (planning applications) – most types of development require a planning application to be submitted and approved, and anyone can comment on planning applications; and
 - Planning policy (local plans) – setting the policy framework against which planning applications will be judged.

Overview of the revised Statement of Community Involvement

13. This section of the report summarises the details of the revised draft SCI, which is attached as Appendix 1 to this report.

¹ The minimum requirements for consultation on Development Plan Documents (DPDs) and Supplementary Planning Documents (SPDs) are set out in The Town and Country Planning (Local Planning) (England) Regulations 2012. The minimum requirements for consultation on Planning Applications are set out in the Town and Country Planning (Development Management Procedure) Order 2010 (DMPO).

14. In preparing a revised SCI, officers have sought to avoid re-providing content that will date the document in forthcoming years, and to shift the emphasis of the SCI away from prescribing appropriate techniques to establishing broad consultation principles that will continue to apply even if there are shifts in the regulatory framework or operational procedures. Additional detail will be provided through supporting guidance and help sheets on our website. Examples of the supporting guidance are set out in Appendix 2.

Main changes to the SCI – relating to planning applications

15. The 2006 SCI sets out the level and approach to community consultation on planning applications in a 'menu' approach.
16. The general shift to a more proactive approach to land use planning, together with the increased use of online systems and websites (in particular the PlanningFinder website) since 2006, means that a number of changes have occurred to the way the planning service engages with local residents and other stakeholders in the application process.
17. The main Development Management provisions of the draft revised SCI are as follows:
- a strong emphasis on the value of early engagement through pre-application consultation and discussions with the community, neighbours or third parties;
 - a commitment to continue to make application material available online; and
 - a commitment to continue to publicise applications through site notices.
18. The City Council no longer sends out notification letters about planning applications, or to inform respondents about the outcome of planning applications. Instead, case officers put up prominent yellow sites notices outside applications sites, and residents are encouraged to self-service if they are interested in a certain street or area through means such as PlanningFinder or the weekly list on the Council website.
19. Officers have given consideration to whether the City Council should go back and consider re-introducing sending neighbour notification letters inviting comments on new planning applications. Such an option is likely to be welcomed by many residents. However it is not without its costs and some risks. The cost of re-introducing such letters is estimated in the region of £45,000 per year. Even when the Council formerly operated this procedure it attracted complaints because some neighbours expected the extent of notification to have been wider and because they thought they could only comment if they received a letter.
20. It is suggested that the City Council should be looking forward in considering the most appropriate mechanisms to consult neighbours and residents in close proximity to a proposed development. The planning service already makes extensive use of site notices, the web, and internet

alerts. The new Council 'App' will extend the options further and enable a more personal service to be accessed by local residents, landlords, and others. The draft SCI confirms that the opportunity remains to view paper plans at the main St Aldates Reception and to use public computers to access the web here and at public libraries.

21. The former SCI encourages but does not require applicants to carry out involvement at the pre-application stage. This is now formalised in the revised SCI, reflecting the conclusion in the Planning Service Improvement Review about the benefits of consultation on applications at the earliest possible stages. The City Council recognises that local meetings or events, where held by developers, are often organised after pre-application discussions between the Council and developers have been held and plans have been finalised. Therefore on larger developments with a significant impact on the community, the revised SCI encourages applicants to organise local meetings or engage through other forms at earlier stages, and seeks to formalise this through Planning Performance Agreements.
22. It is also noted that Section 122 of the Localism Act 2011 requires applicants to carry out pre-application consultations where a proposed development meets criteria set out in a development order. The revised SCI makes reference to the regulation change and highlights that the Council's requirements may change if/when additional development orders are published in future. The Council is keen to encourage this engagement.
23. The SCI also sets out the process for planning appeals, although most of that process is statutory and determined by the Planning Inspectorate so there is little scope or flexibility about how the City Council carries out those duties or how communities can be involved in that process.

Main changes to the SCI – relating to plan making

24. The current SCI sets out consultation requirements based on the process and stages of plan making as it existed in 2005/6 at the start of the 'local development framework' process. Since then the level of government guidance about the process has been radically revised and reduced in scope.
25. The current rules for plan making are set out in the National Planning Policy Framework (NPPF), Planning Practice Guidance (PPG), and in the Town and Country Planning (Local Planning) (England) Regulations 2012. These documents reduce the requirements placed on local councils when preparing their local plans, and local authorities are given more discretion about how to prepare local plans. Combined with this wider scope, the City Council is also keen to ensure the SCI is flexible enough to cope with changes that may occur in terms of national policy and regulations about plan making. These factors culminate in a much less prescriptive approach in the SCI, combined with more effective use of supplementary guidance

and help sheets and information sources (see Appendix 2 for examples,) on topics such as best practice for pre-application consultation, which can be more easily kept up to date for communities and developers to use in guiding how consultation occurs in relation to preparing planning policy.

26. Alongside this there is a new commitment in the SCI to agree with members a specific consultation programme for each new statutory policy document, which will set out the detail of which consultation methods are most appropriate for that document and topic, so that members and the public are clear on the consultation proposed.
27. The other main change to this section of the SCI relates to neighbourhood planning. The introduction of neighbourhood planning powers was a provision of the Localism Act (2011), so whilst the majority of consultation related to neighbourhood planning is the remit of the neighbourhood forum, the revised SCI sets out how the City Council will support the process at the applicable stages where the Council has a statutory function.

Consultation on the draft SCI

28. Whilst the process for producing an SCI is no longer set out by regulation, it is considered good practice to hold a period of public consultation on a draft SCI update prior to consideration of representations and subsequent adoption by CEB.
29. It is proposed to consult widely on the draft SCI and to report back to CEB on the findings. The following consultation methods will be used in seeking comments on the draft SCI:
 - Notification by email (or letter where no email available) to all persons/organisations listed on the existing planning policy database;
 - Publicity and documents available on the planning policy pages of the Council's website;
 - Make paper copies of the consultation document available for inspection at the main offices St Aldates Chambers; and
 - Publish a press release
30. An eight-week period of public consultation is proposed because consultation will take place over Christmas.
31. It is proposed that the draft SCI document will be formatted before being published for consultation but the content will remain the same as the version attached in Appendix 1.

Timetable and next steps

32. The next steps in terms of progressing the SCI to adoption are as follows:

Public consultation	November 2014 – January
Revisions to final document	January/February 2015
Final document agreed by CEB to adopt	Feb/March 2015
Revised SCI adopted	March 2015

Conclusion

33. The measures proposed in the revised SCI aim to facilitate greater and earlier public engagement in planning decisions. This will improve the effectiveness of the planning service with regard to how statutory local plans are prepared and how planning applications are considered and decisions made. This will have benefits for City residents as greater use of IT systems will enable greater access to relevant information of plans and planning applications, and consultation will be more resource-efficient and effective in terms of outcomes.

Level of risk

34. The SCI does not propose new planning policy or identify new development sites, but considers how best to involve different sectors of the community in plan preparation and in determining planning applications.

35. The update to the SCI is a key priority for the City Council. Failure to adopt an updated document could present legal risks in the examination of policy documents, and in processing applications. The risk register is attached as Appendix 3.

Climate change / environmental impact

36. No specific impacts identified

Equalities impact

37. The SCI seeks to ensure opportunities for participation in the local planning processes, including for equalities groups. The way that the City Council consults on planning applications and the preparation of local plans could have an impact on equalities groups who may have challenges in accessing information, such as those that do not have English as their first language or those who are unable to access the internet. City Development will therefore continue its practice of preparing an Equalities Assessment when preparing local plan documents, and

ensure that equalities issues are addressed when considering planning applications.

Financial implications

- 38. The revision of the SCI and consultation on the draft document can be delivered within the existing planning policy budget.
- 39. The package of measures in the revised SCI aim to put in place changes to service delivery to enable greater resource efficiency, and to deliver greater outcomes and leaner delivery.
- 40. The cost of implementing the SCI commitments as proposed can be met within the City Development budget. If members are minded to pursue consultation approaches over and above those proposed then there may be additional financial and resource implications.

Legal Implications

- 41. The Council has a legal duty to have an adopted SCI. The Planning and Compulsory Purchase Act 2004 (as amended) requires the City Council to produce an SCI to set out how the Council intends to achieve community involvement in the preparation of plans and decision making for planning applications.

1. INTRODUCTION

One of the City Council's corporate aims is to improve dialogue and consultation. This is set out in the [Corporate Plan 2014-2018](#) as a principle, with over-arching principles and actions set out in the [Community Engagement Policy Statement 2014-2017](#). The City Council has also produced the [Corporate Equality Scheme](#) 2012-2015. This Scheme identifies that having fair access to engage in the planning process is a priority for the City Council.

These strategies apply to all the City Council's services and are not specific to the planning process. There is, however, an additional legal requirement under the Planning and Compulsory Purchase Act 2004 (as amended) for the City Council to produce a Statement of Community Involvement (SCI), which sets out how it intends to achieve community involvement in the preparation of plans and in decision-making on planning applications.

The City Council adopted its first SCI in 2006. Since then there have been a number of changes to the planning system. Collectively these changes have produced new requirements and processes for producing local plans, and for dealing with planning applications, and it is now appropriate to update and revise the SCI to reflect legal and administrative changes.

In addition, the City Council is keen to promote greater and earlier public engagement in planning decisions. In 2013 the City Council commissioned an independent review of planning processes, including consultation processes, through the Roger Dudman Way Review (2013)¹ so those recommendations and lessons learnt about community engagement have helped to shape this revised SCI.

The proposed revisions set out in this draft document for consultation go above the minimum statutory requirements for consultation² and promote best practice in the context of the need to make efficient use of Council resources.

¹ Roger Dudman Way review at <http://mycouncil.oxford.gov.uk/documents/s16562/RDW%20INDEPENDENT%20REVIEW%20FINAL%20REPORT%20140107%2017th%20Jan.pdf>

² The minimum requirements for consultation on Local Development Documents (LDDs) and Supplementary Planning Documents (SPDs) are set out in The Town and Country Planning (Local Planning) (England) Regulations 2012. The minimum requirements for consultation on Planning Applications are set out in the Town and Country Planning (Development Management Procedure) Order 2010 (DMPO).

What is the Statement of Community Involvement?

Oxford City Council is the planning authority for Oxford. The SCI sets out the City Council's approach to involving the community and stakeholders in the production of planning policy documents and planning control decisions in Oxford. The 'community' includes all the individuals, groups and organisations that live, work, or operate within Oxford. By 'stakeholders' we mean individuals, landowners and organisations with a direct influence on the subject under discussion.

This Statement of Community Involvement sets out how we (the Council planning service) will involve the local community when preparing planning policy documents and deciding on planning applications.

It:

- Lets you know how you can get involved in planning decisions;
- Sets out how we will engage the wider community in planning decisions; and
- Sets out the level of community engagement that we expect from developers in the planning process.

In summary, it is about how we inform, involve and consult local communities in our planning functions.

Using the SCI

The SCI is less prescriptive and less detailed than the City Council's previous version. This is because one of the main reasons for the update is because government policy and legislation related to the SCI has changed several times in recent years, which has resulted in references in the SCI becoming out-dated. This SCI therefore seeks to avoid content that will inevitably date the document in forthcoming years.

In doing so, it is intended that the SCI be an effective guide to planning consultation, and be flexible enough to apply even if there are shifts in the regulatory framework or operational procedures. The SCI sets out principles for consultation requirements, whilst allowing more details to be provided through supplementary means such as the planning applications validation checklist, or through supplementary guidance and help sheets that will be published on the City Council's website which can be updated more easily and frequently.

Consultation on the draft SCI, and how you can comment

We want to hear your comments about our proposed changes to the SCI. You can send us your comments between **XX and XX 2015**.

We would prefer your comments electronically by email to:

planningpolicy@oxford.gov.uk

Or you can also write to us at:

2. WHY SHOULD THE COMMUNITY BE INVOLVED IN THE PLANNING PROCESS?

Achieving effective community involvement in the planning process is likely to have several benefits including:

- A better understanding of how planning policies are developed;
- More focus on the priorities identified by the local community and stakeholders;
- Influencing the provision of local services to meet local needs;
- Increased support for planning services and community commitment to the future of an area;
- Ability to draw upon a local knowledge base.

We want to inform and involve the community in the decision-making process. Consultation will start as early as possible to give everyone the opportunity to participate and influence the development of policies and options for an area. We will also encourage consultation on major applications at an early stage. This will give communities and stakeholders the chance to put forward their own ideas rather than simply comment once these are fixed. We hope we will then be better placed to understand the issues and needs that are important to the community.

On-going community involvement will include feedback and information on progress and outcomes. Involving communities at an early stage and continuing that involvement will help to resolve issues and achieve consensus, where possible, which will in turn avoid the need for lengthy independent examinations. We recognise that this will always be a balancing act and people will have different views. We won't be able to please everyone. However, we will aim to take on board as many views as possible, not just the views of those who 'shout the loudest'. "It is not intended to enable minority interests to overrule the best interests of the wider community and the city as a whole" ([Community Engagement Policy Statement 2014-2017](#)), a principle which is particularly relevant to planning discussions.

The scale and type of community involvement in the planning system also has to reflect the resources that the Council has available, especially in the context of reduced budgets for local councils across the country. To ensure the most efficient use of resources, the approaches used have sought to make use of existing established networks where possible.

3. OUR PRINCIPLES FOR COMMUNITY INVOLVEMENT IN PLANNING DECISIONS

The City Council's approach to community engagement contributes directly to the City Council's ambition to build a world class city for all its citizens. Many Oxford residents are highly articulate and very skilled at getting their points of view heard and their voices are always welcome. However, in areas of deprivation where challenges are greatest, the capacity for community involvement is often lower. Oxford City Council wants to open up more opportunities for engagement with people living in the more deprived areas of the city whose voices otherwise might not so easily be heard.

Within this context, the following principles of community engagement have been agreed within the Community Engagement Policy Statement 2014-17:

1. Flexibility
2. Proportionality
3. Transparency and clarity
4. Timeliness
5. Feedback
6. Inclusiveness and accessibility

In addition, a key reason for updating the SCI is to be able to review the consultation procedures relating to pre-application processes in light of the recommendations and lessons learnt in the Roger Dudman Way Review (2013), and subsequent Action Plan.

The independent report identifies four key principles for effective engagement in planning:

- **Timely and sustained** – events and activities should start before any planning decisions are made and engagement should last throughout the planning process and beyond;
- **Inclusive for all local people** – those living and working in an area have a right to be involved, all parties are welcome, and process must take account of peoples' varied needs;
- **Two way, open and responsive** – communication should be discursive not prescriptive, so that information can be debated and ideas exchanged; and
- **A matter of public record** – the processes must be documented and published.

Roger Dudman Way Review 2013, para 91

Taking these principles on board, the principles suggested in this SCI for community involvement in the planning process are:

The opportunity to contribute ideas – people will have the opportunity to put their ideas forward, and the Council will consider and respond to these suggestions as appropriate;

The opportunity to take an active part in developing proposals and options – the Council will provide opportunities for people to actively engage in the planning process in different ways and from an early stage. The Council will also encourage others who are promoting proposals to do the same;

The opportunity to make comments on formal proposals – For more advanced proposals/documents, the Council will actively seek views to meet – and in some instances exceed - the Regulatory requirements for community involvement;

The opportunity to receive feedback and be informed about progress and outcomes – the Council will consider all comments, make appropriate changes accordingly, and provide an update of progress for those who commented in a consultation on a planning policy

document and those who have requested to be notified of a consultation. This may be by providing material on the Council website (eg reports or updates); and

To achieve value for money – ensuring consultation is worthwhile and value for money, by balancing cost and time constraints and Council resource

We will deliver these principles through:

- Being open and transparent in our decision-making;
- Using plain English as far as possible;
- Making policy documents easy to read through images, maps, illustrations etc;
- Ensuring that consultation is proportionate to the nature of the document or the planning application;
- Using consultation techniques appropriate and proportionate to the type of issue and the communities affected;
- Front-loading policy involvement/engagement at the early stages of producing new policies and generating options;
- Encouraging early consultation when working up planning applications;
- Promoting electronic methods of communication for efficiency but not excluding people who find it difficult to access material online.

4. CONSULTATION ON PLANNING POLICY DOCUMENTS

What will we be consulting on?

The main policy-related documents that the City Council produces are:

Statement of Community Involvement – this document is itself the subject of public consultation. When finally approved, all Local Development Documents will need to meet the consultation requirements in this document.

Local Development Scheme – this sets out the City Council's programme over a 3-year period, including a description and timetable for each document. The local development scheme is published and updated annually on the City Council's website (www.oxford.gov.uk/ldf).

Local Development Documents – these include:

- **Core Strategy** – this outlines the vision for the area and how it will be achieved.
- **Site Allocations** – this will allocate land for specific uses.
- **Area Action Plans** – these relate to a specific area where significant development is expected in the future.

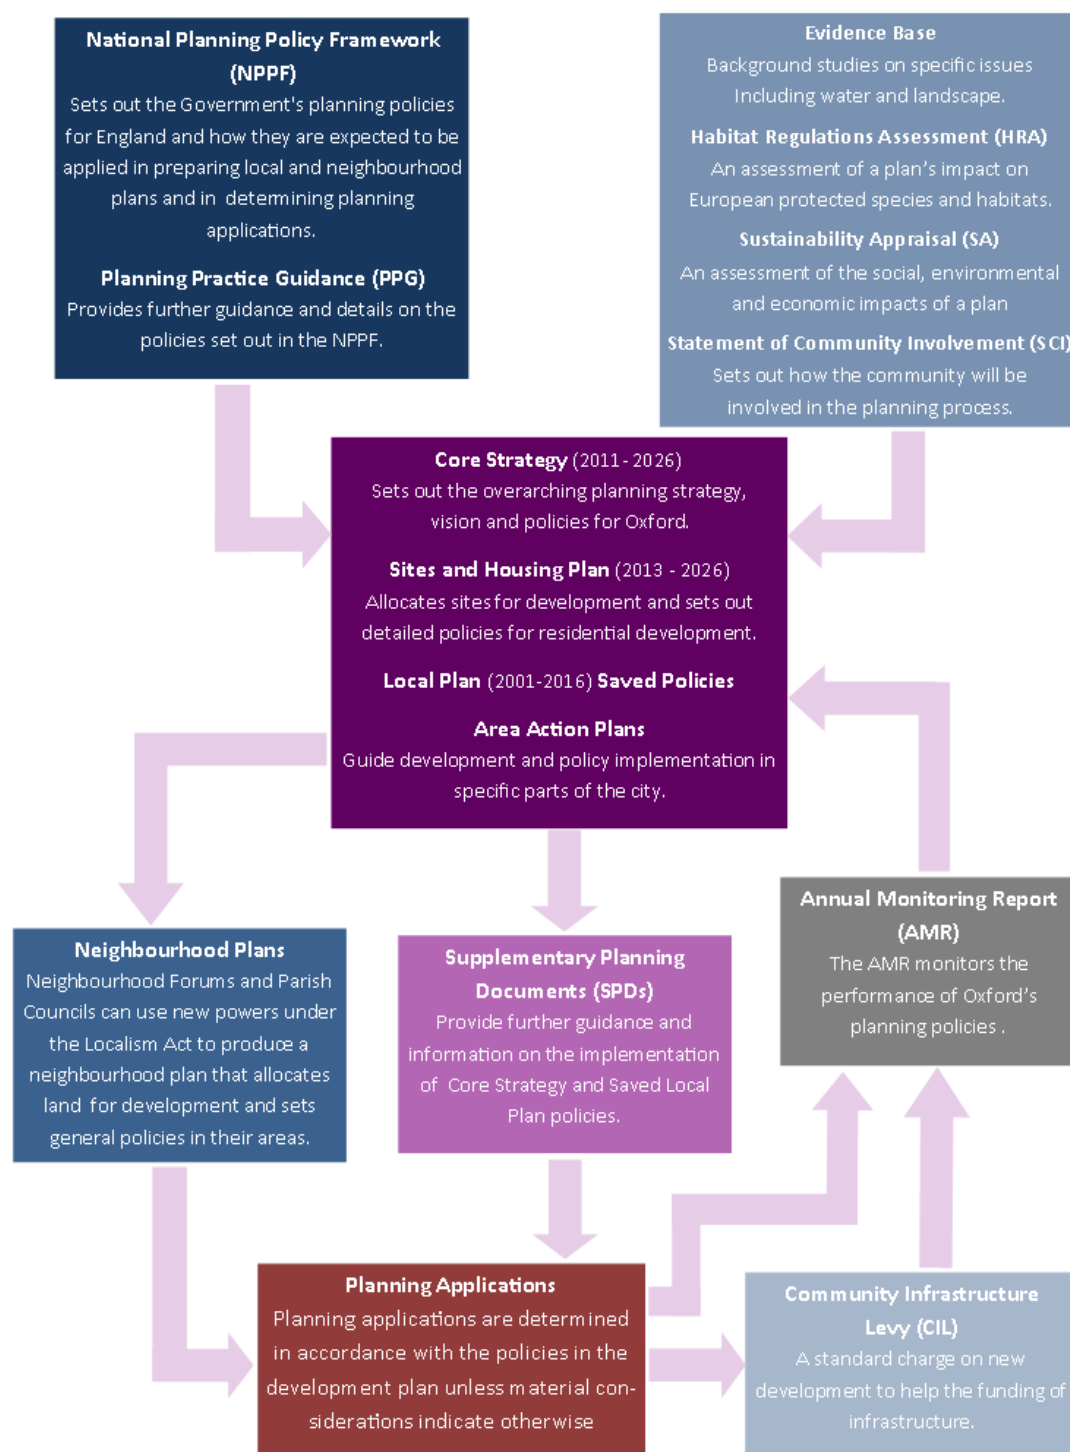

Supplementary planning documents – these documents supplement and elaborate on policies and proposals in development plan documents. Although they will not be subject to independent examination, they will undergo rigorous public consultation, and must comply with national planning policies. Examples of these types of documents are affordable housing, and natural resource impact analysis.

Sustainability Appraisals – whilst this is a separate exercise, sustainability appraisals will be produced by the City Council alongside development plan documents and, where appropriate, supplementary planning documents. The appraisals examine the impact of the policies and proposals on economic, social and environmental factors (including natural resources). The sustainability appraisal will be available for consultation, running alongside consultation at formal stages of consultation on planning documents.

Annual Monitoring Report – The documents in the local plan will be reviewed in an annual monitoring report. There will not be general public consultation on this report but we may consult specific groups in drafting the report. It will review the implementation of the local development scheme and how far we are achieving the policies in development plan documents.

See Figure 1 below which explains how the documents link together to form the Local Plan for the City, and its relationship with the wider planning process.

Figure 1 Components of the Oxford City Local Plan and its relationship to the wider planning process

CONSULTATION PROCESS FOR POLICY DOCUMENTS

Consultation on the Local Plan Local Development Documents

The key stages of document production for the Local Plan (local development documents) are:

Early public involvement³ – Before drafting begins, informal consultations will be held and a process of informal dialogue will commence. This may involve publishing a consultation document, or it may be as wide-ranging as simply asking questions about what the document and policies should include.

During this period, we will gather feedback using a variety of techniques as appropriate to the policy topic, and the type and level of community involvement will be proportionate to the issues and impacts.

This early public involvement is a key stage as it enables people to put forward their ideas and to participate in the initial stages of developing proposals and options. Once we are sure that we have understood and considered all views expressed, we will start to refine this to formulate options and proposals, including input, as appropriate, by City Council committees and full Council.

A specific consultation programme for each statutory planning policy document will be agreed with the committee authorising the document in question. This will set out the detail of which consultation methods are most appropriate for that document and topic, so that members and the public are clear what consultation can be expected for that document.

Consultation on the emerging options or draft policies (as applicable) – as part of the process of refining the options and the policies, the Council may publish preferred options, including a related sustainability appraisal report, for public comment, or for informal circulation with stakeholders. For formal consultation periods then comments forms will be available for people to use, and the period for any formal consultation will normally be for 6 weeks.

Pre-submission – when the City Council has refined the policies to what it thinks is the final versions, it will publish the document for a final stage of commenting before it submits it to the government⁴. Comment forms will be available for people to use, and normally at this stage the key evidence documents that sit behind the plan/policies will also be made available including a Sustainability Appraisal. Following this consultation the Council normally only makes minor changes to the document, collates the comments, and passes them to the government Inspector along with all of the other submission documents.

Independent Examination – this will be held by an independent Inspector (appointed by the Government) who will consider all representations received at the pre-submission stage of consultation. The examination process and operations are determined by the Inspector so it is not for the Council to propose processes here in the SCI, or to replicate what is already set out in government guidance or regulations elsewhere⁵. The examination period commences once the document has been submitted, and ends when the Inspector issues his or her report or conclusions. Within this period there is usually hearing sessions, where people who have commented at the pre-submission stage may be invited to speak in a round-table discussion.

³ At the time of writing this is known in the guidance as 'Regulation 18' stage

⁴ At the time of writing the 'pre-submission' (or 'publication') stage is also known as Regulation 19

⁵ At the time of writing, the examination is known as Regulation 24 stage

Adoption – The final step is for the City Council to adopt the document. The Inspector's report will be reported to full Council and will be published on the City Council website.

Consultation on Supplementary Planning Documents (SPDs)

The preparation of Supplementary planning documents is a slightly different, less formal, process, as set out below:

Early Public Involvement – As with local development documents, consultation may vary depending on the topic of the SPD, for example it may be focused on those with specific expertise in the subject area, like developers or highway engineers, or on people living and working in a specific geographical area. As with local development documents, the main purpose of this stage of involvement will be information gathering and the consideration of issues and options. A sustainability appraisal will be produced where appropriate but is not always required, depending on the topic.

Consultation on the emerging draft – As with local development documents, we will usually publish a draft for formal consultation and consider all representations received. Following this we will refine and finalise the document before progressing to adoption. There is no examination process for SPDs.

Adoption – the document together with an analysis of comments received (as applicable) will be reported through the City Council committees if appropriate. It will be adopted by full Council and published on the City Council website.

The Neighbourhood Plan process

The preparation for neighbourhood planning documents is led by local communities, in accordance with the Regulations and the principles of Localism. As such, the majority of the community engagement in the preparation of neighbourhood plans will be led by the neighbourhood forum⁶. There are then certain stages where the City Council is required to carry out formal consultation in accordance with the Regulations as follows:

a) Application to designate a neighbourhood area

The City Council will publish the name of the neighbourhood area, a map, and the name of the relevant body who applied for the designation, on the website, and people will be able to comment on the extent of the neighbourhood area designation.

In addition the neighbourhood planning group will be encouraged to let the local community know through local notices, their own websites, and other means as appropriate.

Following this consultation, the City Council will publish its decision to either designate or refuse the application (with reasons, if refusing) on the City Council website.

b) Application to designate a neighbourhood forum

The City Council will publish a copy of the application and details about how to comment, on the Council website. If the City Council agrees to designate the forum then it will publish the

⁶ Neighbourhood forums are community groups that are designated to take forward neighbourhood planning in areas without parishes. It is the role of the local planning authority to agree who should be the neighbourhood forum for the neighbourhood area

name of the forum, a copy of the constitution, and contact details on the City Council website. If the City Council decides to refuse the designation then it will publish reasons for the refusal on the Council website. We will also encourage the neighbourhood forum to publicise in the local area.

c) Options testing and preparing the plan (carried out by the neighbourhood forum)

During the preparation of their plan the neighbourhood forums will be encouraged to take into account emerging best practice in this relatively new, and still evolving, area of planning policy. See additional guidance and references about best practice for neighbourhood forums on the Council website.

d) Pre-submission consultation (carried out by the neighbourhood forum)

At this final stage of consultation before the plan is submitted, the neighbourhood forums will be encouraged to take into account emerging best practice. See guides on our website for further support.

e) Publicity/submission consultation

The City Council will publish the plan and supporting documents in accordance with the regulatory requirements⁷, and will contact those who we are advised have commented previously on the neighbourhood plan, to invite comments. Documents will be available on the City Council website and also at the main Council offices.

f) Decision on a neighbourhood plan

The Council will publish the decision statement and examiners report on the City Council website and make it available to view at the Council's main offices.

6. HOW WILL PEOPLE BE INVOLVED?

The methods of community involvement we will use depend on the subject and the stage in the plan-making process. There are different levels of involvement including:

- Information-sharing: providing information through leaflets, advertising, on-going awareness, and publicity campaigns
- Consultation: consulting the community and stakeholders through questionnaires, exhibitions, and formal consultation processes
- Participation: such as in workshops, charettes, or 'Planning for Real' type exercises

Sometimes it will be more appropriate to gather a wider-range of less details comments, such as through polls or newspaper articles. The coverage is broad but they do not generally provide much opportunity for an in-depth debate. At other times we will need to talk to people in more detail, such as through focus groups or meetings.

We will include a variety of methods and will look to best practice examples in this evolving field. For example use of social media in consultations is fast-evolving. Further guidance about the methods we are using is provided on the City Council website.

⁷ At the time of writing this is a minimum of 6 weeks

Keeping you updated throughout the policy preparation process

During the policy preparation process, from the earliest stages through to adoption, we will keep the community and stakeholders informed of progress in the following ways:

- The latest version of any formal consultation documents will be published on the website.
- The City Council will acknowledge representations received by electronic means (email or online form) at each consultation stage.
- Reports to City Council committees (including City Executive Board and Full Council) are available on the City Council main website, and these meetings are held in public.
- At Examination stage (for local development documents) we will tell those who asked to be notified when the document has been submitted to the Secretary of State. We will also publish on the website a consultation summary report, and the representations from the pre-submission stage will be made available for public inspection.
- The final adopted versions of the documents will be published on the website.
- Throughout the preparation of the plan, an email address and contact phone number will be available for the public to find out the current position on the progress of documents.

For an up to date list of deposit points (where consultation documents will be made available) and their opening times, see list on the website.

7. CONSULTATION PROCESS FOR PLANNING APPLICATIONS

In general, planning applications will be determined in accordance with the adopted policies, unless material considerations outweigh these policies. A material consideration is a matter that should be taken into account in deciding a planning application or on an appeal against a planning decision. Material considerations can include (but are not limited to) matters such as loss of privacy, overshadowing, parking, traffic generation, layout, design, noise etc.

We recognise the need to ensure that the community is informed and involved in the consideration of planning applications. The degree of involvement will vary with the nature of the individual application.

Consultations before planning applications are submitted

All applicants and their agents are strongly encouraged to discuss development proposals with the City Council before applying, and to also consult and work with the community to a degree proportionate to the nature of the proposal⁸.

There are significant benefits to early consultation on applications, including:

- early availability of good quality information, enabling issues and problems to be addressed up front;
- better quality applications which are straightforward and can be more quickly processed;
- a means of resolving problems, thereby avoiding possible public objections later;
- overcoming a perceived ‘closed door’ approach to determining applications, ensuring a more transparent approach;
- better design of buildings that are more in keeping with their surroundings and meet the needs and wishes of local communities;
- savings on applicants’ time and resources by avoiding the need to revise proposals at an advanced stage. This in turn saves resources for authorities.

For minor applications, eg house extensions, all applicants are encouraged to let their neighbours know before the application is submitted. You could speak with them or put a note through the door.

If the scheme falls within the definition of a ‘major’ application, officers will strongly encourage applicants to contact neighbours and those in the vicinity, and to consider arranging a meeting with relevant local residents and amenity groups⁹. In some instances this may be made a formal requirement of the application via a Planning Performance Agreement. A short statement setting out how consultation has been carried out and any changes made to the proposals as a result, is encouraged to be submitted with the application.

Whilst there is no legal obligation for consultation to take place, failure to consult properly is likely to lead to objections being made by interested parties such as neighbouring residents which could be material to the determination of the application.

We would also encourage applicants to let the local ward councillors know about the proposals. The City Council’s Code of Practice for councillors on planning applications advises that councillors attending public meetings take great care to maintain their impartial

⁸ See website for further information about community profiles and context in Oxford, and also for examples of good practice in terms of active involvement and consultation on major applications

⁹ See help sheet for the latest list of local groups suggested to contact

role, listen to all the points of view expressed by the speakers and public and not state a conclusive decision on any pre-application proposals or submitted planning applications. Nonetheless we would encourage applicants on major schemes to make local councillors aware so that they can help to bring it to the attention of their constituents at the earliest stages.

In addition, it is noted that Section 122 of the Localism Act 2011 requires applicants to carry out pre-application consultations where a proposed development meets criteria set out by the Government in a development order. It is noted that there may be additional development orders published in future in relation to this requirement, which will influence the requirements for applicants. Irrespective of the regulations, the Council is keen to encourage this pre-application stage of engagement.

Consultations when applications are submitted and are under consideration

The Government sets out minimum standards for consulting on planning applications, and these will apply to all applications.

If the Council goes beyond the minimum then there needs to be a balance between cost, speed of decision making and providing a reasonable opportunity for public comment. People are therefore encouraged to 'self service' where possible, using updates on the Council website and through alert services such as the [PlanningFinder](#) website.

The public will be informed about planning applications by the following methods:

Weekly list – a list is published weekly of all valid planning applications received, as well as other notifications such as those affecting conservation areas. The list is available on the planning section of the City Council website

Advertisements and site notices – site notices in the vicinity of the application (scale proportionate to the application) will be used to let the occupiers of the properties most likely to be affected by a proposal (including those bordering an application site) know. Comments are normally required within 21 days of the notice. In addition the City Council is required to publish in a local newspaper¹⁰ and requires the developer to display site notices for certain categories of applications. In addition, we also advertise certain types of applications involving telecom work and applications to certify the lawfulness of existing development.

Availability of plans – all plans and documents submitted as part of a planning application are available to view at the main City Council office during office hours and there is an officer available to assist. All planning applications are also available to view on the website. The website contains further details of the applications including how and when they are likely to be determined.

Statutory consultees – we are legally required to consult certain organisations as set out in government guidance. The actual organisations consulted will vary depending on the nature of the proposal and location.

Public access – the details of all submitted planning applications are available on the City Council website to view online through the public access system.

¹⁰ Currently advertised in the Oxford Times newspaper

PlanningFinder¹¹ – online facility similar to public access, enables the public to view all planning applications. In addition people can register to receive updates either about individual applications or in relation to a postcode area.

How planning applications are determined

Applications are assessed against planning policies by planning officers. An officer will write a report outlining the main issues and considering them against the relevant planning policies before reaching a recommendation to approve or refuse permission for the proposal. Before recommending a decision, the planning officer will make a full site inspection and take account of any comments received from neighbours, interested bodies, and statutory consultees. The results of any consultation will be reported and taken into account in decisions made by, and on behalf of, the City Council.

Legislation requires that applications are refused only when there are good planning reasons for refusal. In some cases it is appropriate to impose planning conditions in order to render a proposal acceptable. In other cases, officers may ask for small changes to be made to the proposal, and for amended plans to be submitted, in order to resolve issues. Any amended plans will be available on the Council website and subject to consultation. If there are more significant issues to resolve, the application may be determined in its original form and then the applicant is invited to re-apply with revised proposals as a new application.

The majority of applications are decided by planning officers under delegated powers – these are mainly householder applications and small-scale or minor developments. Applications are decided in this way to help ensure that the majority of applications are dealt with promptly.

Other applications are decided by a Planning Committee if:

- the application falls outside officer delegated powers (for example major applications);
- city councillors request that the application is dealt with at committee;
- or the application is submitted on behalf of the City Council or by an officer or city councillor.

Reports for applications decided at Committee are available for public inspection at City Council offices and on the website usually for a week before the Committee meeting.

Planning Committee meetings are open to members of the public to hear the discussion. The following groups will usually have the opportunity to speak at the committee before a decision is reached:

- town or parish council,
- objectors/ representatives of objectors
- applicant or their agent/ supporters.

A maximum of five minutes is available to speak either against or in support of each application, and this must be shared between all those wishing to speak at the meeting.

Committee members will then vote on whether to accept the officer's recommendation in the report, and the outcome will be announced verbally at the meeting. Some applications may be deferred to a later meeting for further information or negotiation.

All decision notices are published on the Council's website (via Public Access), whichever process the decision is made. In addition, for decisions made under delegated powers, a copy is sent to the applicant (or their agent).

¹¹ <http://www.planningfinder.co.uk/about>

Appeals against planning decisions

If an applicant has an application refused, or disagrees with the conditions attached to the granting of permission, or if the City Council fails to decide the application within the agreed timescales, the applicant has a right to appeal. In most cases appeals will be determined by an independent inspector, although in some cases the Secretary of State may choose to determine the appeal themselves. This right of appeal does not extend to a third party (ie, there is no right of appeal to anyone who is not the applicant).

The procedures for notifying people of appeals and for submitting comments during the appeal process is set out by the Planning Inspectorate¹², so it is beyond the remit of this SCI. However for completeness an overview is provided here.

When an appeal is made, the Council will send letters to all those who commented on the original planning application and to adjoining properties, notifying them that an appeal has been made and, depending upon the type of appeal, informing them of how they can submit further comments should they want to do so. There is no need to repeat comments submitted at the application stage as these comments will be forwarded to the independent inspector by the City Council. Local councillors are also notified.

The majority of appeals are dealt with by written representations and where this is the case, the appeal is decided on the basis of the statements submitted by the appellant, the City Council and any third parties. Where a public hearing is to be held to consider an appeal, a site notice is also erected and in some cases information is published in the press. Appeal hearings and inquiries are open to the public and members of the public may also be given an opportunity to speak, at the discretion of the Inspector.

¹² See Planning Portal website for Planning Inspectorate guide to Planning Appeals

8. HOW WILL CONSULTATIONS BE RESOURCED?

Staff resources to deliver City Council-led consultations and the statutory requirements will be mainly from City Development but will involve other officers and external resources as necessary. Consultations relating to planning applications will also require resources from the applicant, and consultations at certain stages of the Neighbourhood Plan process will be led by the relevant neighbourhood forums that are preparing those plans.

We will try to combine consultation activities where appropriate and timetabling allows, to get the best value from them and to avoid ‘consultation fatigue’ among the community.

Evaluation forms will be available after each major planning policy consultation undertaken by the City Council, to assess how successful the methods were. The feedback gathered will be used to evaluate the effectiveness of the consultation and to make improvements where needed, either to future consultations or to the SCI if applicable. The results of the evaluations will be reported in the annual monitoring report.

Appendices

Table 1 Summary of statutory requirements and additional consultation methods for Local Plan documents

Table 2 Summary of statutory requirements and additional consultation methods for Supplementary Planning Documents

Table 3 - Summary of Planning Application Consultation

Table 1 Summary of statutory requirements and additional consultation methods for Local Plan documents

Stage of consultation	What we must do to consult and notify you – (statutory requirements)	Additional methods of consultation– we will select the most appropriate methods from this list according to the specific subject matter
Development Plan Documents (covering local plan, site allocations, area action plans)		
<p>Early public involvement</p> <p>And</p> <p>Consultation on emerging options</p> <p>(at time of writing, this is Regulation 18)</p>	<p>Notify bodies listed in the Regulations about the subject of the local plan, and invite comments about what it should contain.</p> <p>Consult on sustainability appraisal Scoping Report with appropriate statutory consultation bodies listed in Regulations, and other general consultation bodies we consider appropriate.</p>	<p>Inform at appropriate stages using a combination of:</p> <ul style="list-style-type: none"> • issue press release • contact groups on consultation register by letter/e-mail (target consultation if appropriate for subject) • consider using City Council newspaper, website, poster campaigns, leaflets <p>Consult using one or a combination of:</p> <ul style="list-style-type: none"> • questionnaires • public exhibitions/displays/ stalls/road shows • interactive displays • public meetings • workshops/planning for real • Talkback Panel • involve pre-existing panels and other regular City Council meetings with groups • one-to-one meetings/focus groups • consider special measures to identify and reach 'hard to reach' groups • City Council committees/Council • contact phone number <p>Each time that we publish a document for formal consultation we will:</p> <ul style="list-style-type: none"> • Make the report available on the City Council website and in appropriate public locations/deposit points. • Also consult on accompanying Sustainability Appraisal • Discuss in City Council committees. A specific consultation programme for each document will be agreed with members, to set out the detail of which consultation methods are most appropriate for that document and topic, so that members and the public are clear what consultation can be expected for that document. • Consider all comments and publish feedback of consultation.

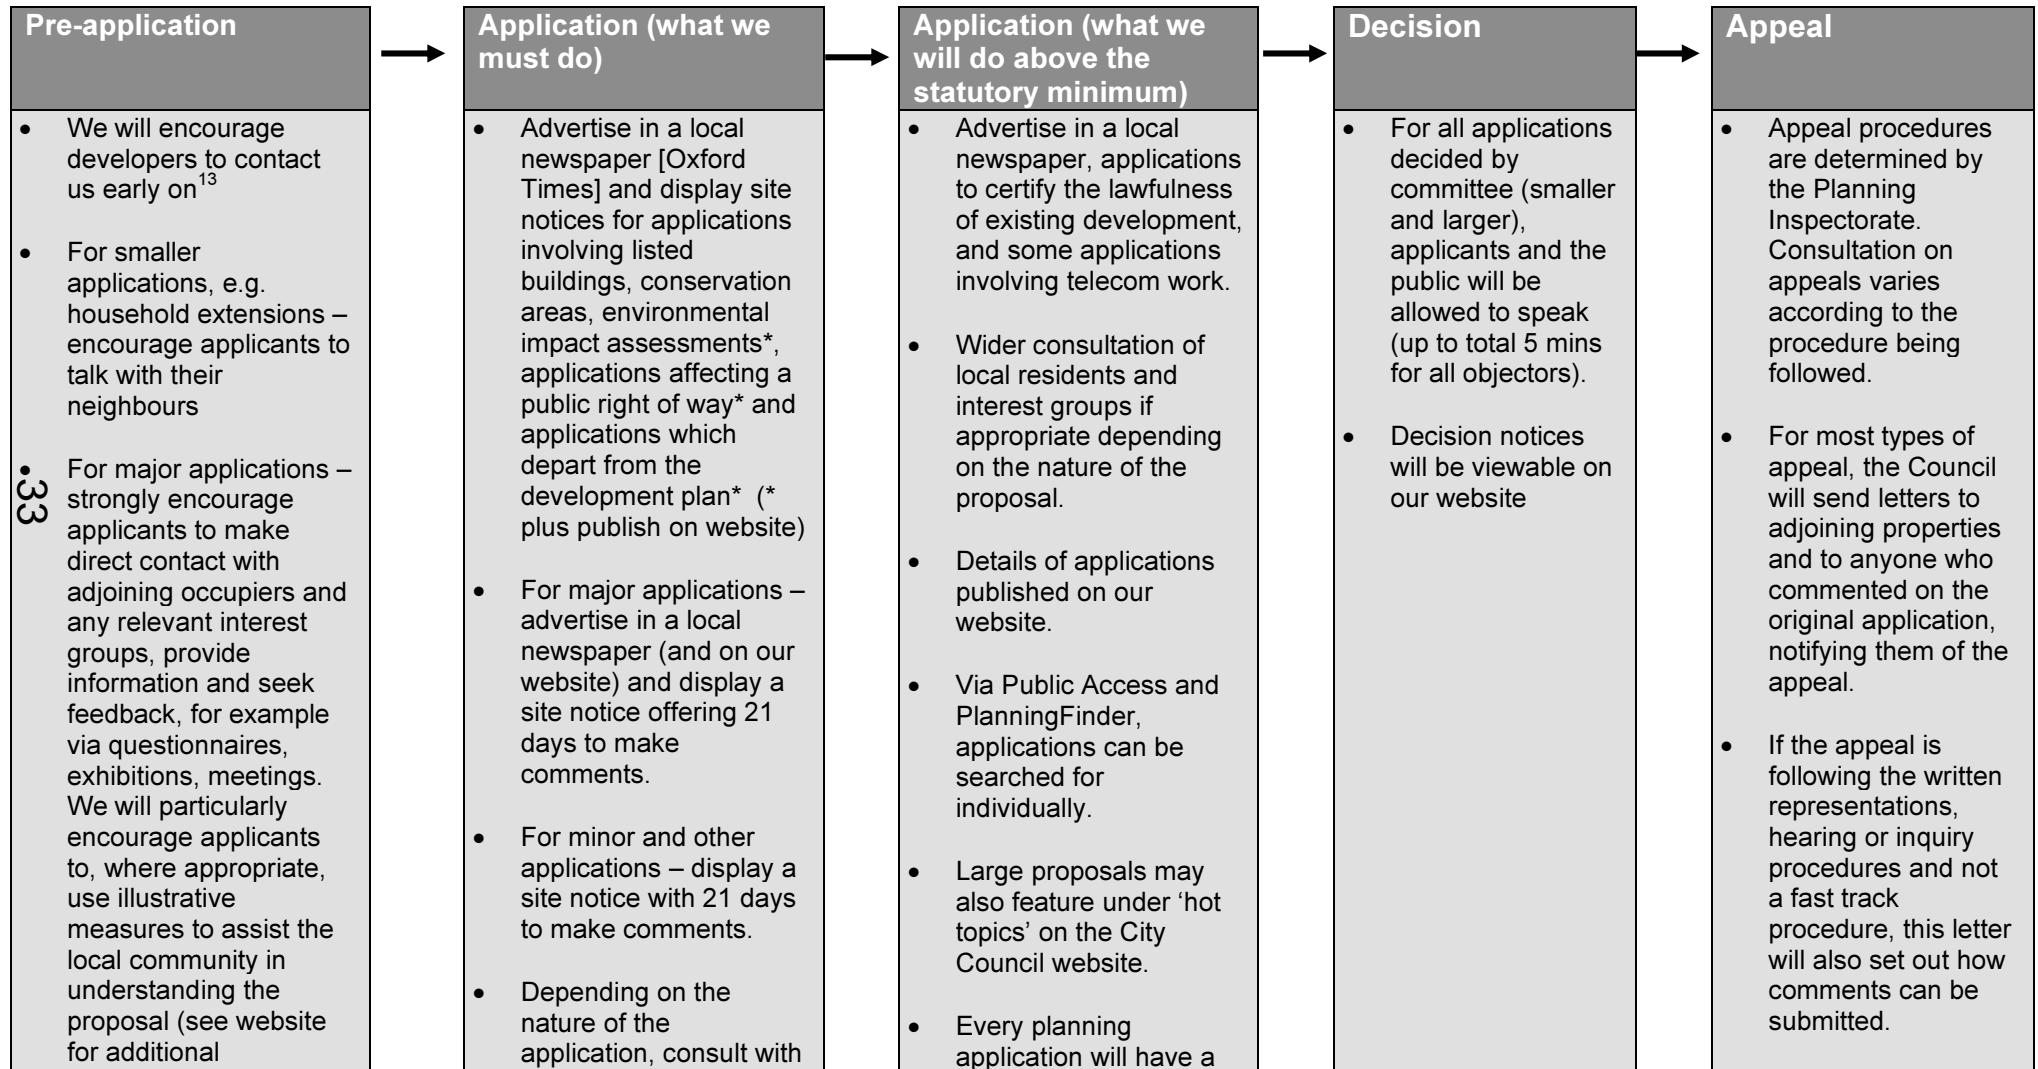

Formal public consultation on pre-submission document (at time of writing this is Regulation 19)	<ul style="list-style-type: none"> Submitted document & associated matters required by the Regulations, and Sustainability Report, will be made available for inspection at the Council's main offices and published on the City Council website. Notify the statutory bodies listed in Regulations. 	<ul style="list-style-type: none"> Invite comments on the proposed submission documents, normally for a period of 6 weeks (or may be extended over Christmas or summer holidays) Issue a press release.
Submission to Government and Independent Examination	<ul style="list-style-type: none"> Make available for inspection a copy of the documents required by the Regulations Notify the statutory bodies listed in the Regulations, as well as other people who have required to be notified of the submission of the local plan 	<ul style="list-style-type: none"> Provide details of the hearing sessions and Examination progress, via an examination website or dedicated page on the City Council website.
Adoption	<ul style="list-style-type: none"> Final document and adoption statement, inspectors report & final sustainability report will be made available for inspection at the Council's main offices and published on the City Council website. Notify anyone who requested to be notified of adoption and send them a copy of the adoption statement. 	<ul style="list-style-type: none"> No further consultation needed.

Table 2 Summary of statutory requirements and additional consultation methods for Supplementary Planning Documents

Supplementary Planning Documents		
Stage consultation takes place	Statutory Requirements for consultation and notification (what we must do)	Additional methods of consultation (what we will do) – we will select the most appropriate methods from this list according to the specific subject matter
<p>Early public involvement</p> <p>And</p> <p>Consultation on draft document</p>	No requirements	<p>Informally involve local communities and stakeholders (including consultation on sustainability appraisals).</p> <p>To inform at appropriate stages using a combination of:</p> <ul style="list-style-type: none"> • issue press release • contact groups on consultation register (target consultation if appropriate for subject) • consider using City Council newspaper, website, posters <p>To consult at appropriate stages using a combination of:</p> <ul style="list-style-type: none"> • questionnaires • public exhibitions/ displays/ stalls/road shows • interactive displays • public meetings/area committees • workshops/planning for real • one-to-one meetings/focus groups • Talkback Panel • involve pre-existing panels and other regular City Council meetings with groups <p>If document is published for formal consultation:</p> <ul style="list-style-type: none"> • Discuss at City Council committees. A specific consultation programme for each document will be agreed with members, to set out the detail of which consultation methods are most appropriate for that document and topic, so that members and the public are clear what consultation can be expected for that document. • Make the report available on the City Council website and in appropriate public locations/deposit points Publish the

		sustainability appraisal (if applicable for the subject topic).
Adoption	<ul style="list-style-type: none"> • Prepare and publish a summary of consultation, and make it available for inspection along with the SPD, and the adoption statement, at the main Council offices and on the City Council website. • Notify anyone who requested to be notified of adoption and send them a copy of the adoption statement. 	No further consultation needed.

Statutory consultation bodies will be allowed a longer period of time to comment on applications where this is prescribed by legislation

City Council Deposit Points and Opening Hours

When we refer to planning policy consultation documents being made available for inspection at 'deposit points', we mean the following locations during normal office hours:

Venue	Location	Opening hours	
Oxford City Council Offices	St. Aldate's Chambers 109-113 St. Aldate's Oxford OX1 1DS	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	9.00am - 5.00pm 9.00am - 5.00pm 9.00am - 5.00pm 9.00am - 5.00pm 9.00am - 4.30pm Closed Closed
Oxford Central Library	Information services 2nd Floor Central Library Westgate Centre Oxford OX1 1DJ	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	9.00am - 7.00pm 9.00am - 7.00pm 9.00am - 5.30pm 9.00am - 7.00pm 9.00am - 5.30pm 9.00am - 7.00pm Closed
Summertown Library	South Parade Summertown Oxford OX2 7JN	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	9.30am - 5.30pm 9.30am - 7.00pm Closed 9.30am - 7.00pm 9.30am - 5.30pm 9.00am - 4.30pm Closed
Blackbird Leys Library	Blackbird Leys Road Blackbird Leys Oxford OX4 6HT	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	9.00am - 12.00pm 1.30pm - 5.00pm 9.00am - 12.00pm 9.00am - 12.00pm 1.30pm - 5.00pm 9.00am - 12.00pm 1.30pm - 5.00pm Closed 9.30am - 12.30pm Closed
Headington Library	North Place Headington Oxford OX3 9HY	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	9.15am - 1.00pm 9.15am - 7.00pm 9.15am - 1.00pm 9.15am - 7.00pm 9.15am - 5.00pm 9.00am - 4.30pm Closed

Old Marston Library	Mortimer Hall Oxford Road Old Marston Oxford OX3 0PH	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	Closed 2.00pm - 5.00pm 5.30pm - 7.00pm Closed 2.00pm - 5.00pm 5.30pm - 7.00pm 10.00am - 12.00pm 2.00pm - 5.00pm 9.30am - 12.30pm Closed
Littlemore Library	Oxford Academy Campus Sandy Lane West Littlemore Oxford OX4 5JY	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	2.00pm - 6.00pm 2.00pm - 4.30pm Closed 9.30am - 12.30pm 2.00pm - 4.30pm 9.30am - 12.30pm 9.30am - 1.30pm Closed
Cowley Library	Temple Road Cowley Oxford OX4 2EZ	Monday Tuesday Wednesday Thursday Friday Saturday Sunday	9.15am - 5.30pm 9.15am - 7.00pm 9.15am - 7.00pm Closed 9.15am - 5.30pm 9.00am - 4.30pm Closed

Examples of community involvement in planning proposals (pre-application or at application stage)

As set out in the City Council's Statement of Community Involvement, for major and other significant development proposals, applicants are strongly encouraged to involve the local community and other interested parties at the pre-application stage.

This involvement should try to explain the proposals, offer opportunities for feedback and respond to comments received where appropriate.

Common methods of explaining proposals to members of the community include (also see help sheet which gives an overview of the advantages and disadvantages of these and other methods):

- Leaflets
- Letters
- Exhibitions
- Public meetings
- Websites

Applicants are also encouraged to explore the use of new and innovative illustrative measures to help the members of the community understand the potential implications of the proposal.

We have set out some examples below of commonly-used consultation methods, emerging best practice and newer techniques.

Some further examples of good practice can be found in Planning Aid's ['Good Practice Guide to Public Engagement in Development Schemes'](#)

Indicative Height Poles ('Swiss Poles' / 'Ghost Buildings')

Indicative Height Poles can be used to mark out the location and height of a proposed development to help people visualise its scale and potential impacts.

The City Council has a set of six adjustable poles which are available to hire. Each pole can reach up to 10 metres in height.

Scaffolding Covers ('building wraps')

Scaffolding covers which provide an indication of the final design can help people visualise the proposed development and how it might fit in with the surrounding area.

3D Models

Three dimensional models can be useful to show the proposed scale of development and how it relates to surrounding buildings and open spaces.

Computer-Generated Models & Images

Computer-generated models and images can be used to show how the final design might fit in with existing buildings and views. They can also be a good way to show how surface treatments and building materials will look. Digital 'walk through' or 'fly over' experiences, or virtual tours, can help people to appreciate how the final scheme will look and feel.

Guidance on making a comment on a planning application

As set out in the Statement of Community Involvement, the City Council is keen to encourage public involvement in planning decisions on applications.

The City Council can only take into account 'material planning considerations' when looking at your comments on planning applications. The most common of these (although not an exhaustive list) are shown below:

- Loss of light or overshadowing
- Overlooking/loss of privacy
- Visual amenity (but not loss of private view)
- Adequacy of parking/loading/turning
- Highway safety
- Traffic generation
- Noise and disturbance resulting from use
- Hazardous materials
- Smells
- Loss of trees
- Effect on listed building and conservation area
- Layout and density of building
- Design, appearance and materials
- Landscaping
- Road access
- Local, strategic, regional and national planning policies
- Government circulars, orders and statutory instruments
- Disabled persons' access
- Compensation and awards of costs against the Council at public enquiries
- Proposals in the Development Plan
- Previous planning decisions (including appeal decisions)
- Nature conservation
- Archaeology
- Solar panels

We cannot take into account matters which are sometimes raised but are not normally planning considerations such as:

- The perceived loss of property value
- Private disputes between neighbours
- The loss of a view
- The impact of construction work or competition between firms
- Restrictive covenants
- Ownerships disputes over rights of way
- Fence lines etc
- Personal morals or views about the applicant.

Please note: it is important to understand that the material considerations relevant to any particular application will need to be weighed in the final decision process.

Overview of key stages of Neighbourhood Development Plan process

Stage	Neighbourhood planning group actions:	City Council actions:
Designating neighbourhood area	Requests designation and submits background information required by regulations.	<ul style="list-style-type: none"> • Checks application • Publicises receipt of application for 6 weeks and invites comments via City Council website • CEB may formally designate neighbourhood area.
Designating neighbourhood forum	Requests designation and submits background information required by regulations.	<ul style="list-style-type: none"> • Checks application • Publicises receipt of application for 6 weeks via City Council website • CEB may formally designate neighbourhood forum.
Evidence gathering and early public consultation	Gathers evidence and decides on the best way to consult local businesses and residents on issues, information and evidence collected. Need for SEA/HRA to be considered.	No statutory function. Can respond to requests from forum for advice on consultation methods, evidence base, existing policy background and whether it is in agreement with considerations about the need for SEA/HRA, but ultimately it is the decision of the forum.
Pre-submission publicity and consultation on detailed proposals for a neighbourhood development plan (most likely to be in the form of a draft plan).	This is the only statutory stage of publicity and consultation before submission. The Neighbourhood Forum/Parish Council can determine the detailed proposals to consult on. It is most likely to be in the form of a draft plan. Detailed proposals must be publicised for 6 weeks- details are set out in the regulations. A copy of the detailed proposals should be sent to the local planning authority. Consultation with a list of specified range of organisations is also required. Responses must be considered and the plan amended where appropriate.	No statutory function
Submission/publicising of	Submission to the City Council of:	<ul style="list-style-type: none"> • Must publicise any plan proposal that includes the

the proposed neighbourhood development plan	<p>a) a map or statement which identifies the area to which the proposed neighbourhood development plan relates; .</p> <p>b) a consultation statement giving details of the consultation carried out, issues and concerns arising, and how they were considered and, where relevant, addressed;</p> <p>c) the proposed neighbourhood development plan; and</p> <p>d) a statement explaining how the proposed neighbourhood development plan complies with statutory requirements, has proper regard to national policy and guidance, contributes to the achievement of sustainable development, conforms with strategic development plan policy, and is compatible with European Union obligations.</p>	<p>required documents as soon as possible.</p> <ul style="list-style-type: none"> • Publicise the draft plan for 6 weeks and invite comments. • Inform consultees that the plan proposal has been received.
Check submitted neighbourhood development plan is legally compliant.		Checks against regulations and legislation to be carried out by officers. Publicise.
Appointment of independent examiner		City Council responsible.
Submission of neighbourhood development plan proposal to examination		To send submitted documents to examiner as well as a copy of representations made during the Council's publicity period on the draft, and any required habitats assessment.
Consideration of examiner's views if changes are recommended		The planning authority must consider the examiner's views and decide whether to make any changes. The examiner's report is not legally binding but the planning authority must have clear reasons for departing from the examiner's recommendations. Officers (in consultation with the forum/parish council) will

		report to CEB on the examiner's recommendations for changes and CEB will consider whether to make those changes. Alternatively it may be recommended to CEB that a plan proposal is declined. A decision statement must be published explaining decisions taken.
Referendum		The City Council must organise a referendum (covering the relevant geographical area,) for any plan that is still proceeding. This will be organised by officers.
Adoption		The City Council is required to adopt any neighbourhood development plan where a simple majority of people who voted were in support of it. The plan will be taken to full council for adoption.
Publicising a neighbourhood development plan		Publicise and make available for viewing the adopted neighbourhood development plan.

Overview of main methods of involvement/communication that applicants may wish to consider, and how they will be used by the City Council

Method of Involvement or Communication	Advantages	Disadvantages	How we use this
Electronic			
Website (www.oxford.gov.uk)	Able to share a wide range of detailed information with a large audience. Is often more accessible to some hard-to-reach groups (e.g. younger people). Information is available at any time. Resource efficient.	Excludes those without access to the internet. Technical problems could hinder access to information. Information can be hard to access if there is too much or it is not well structured/displayed.	The website is the main way that we share information. We currently: <ul style="list-style-type: none"> Make sure that the relevant webpages are kept up to date on the progress of planning policy document production (including providing copies of evidence and consultation reports); and Ensure that information on current planning applications is made available through the electronic publication of the weekly list and via 'Public Access' (see below).
Public Access (Online system for viewing and commenting on planning applications. Accessed via our website.)	Enables people to access a wide range of information relating to planning applications and appeals. Comments are instantly received. Resource efficient.	Excludes those without access to the internet. Technical problems could hinder access to information /submission of comments.	Public Access is currently the main way that we share information about planning applications. People who do not have access to the internet are able to use the computers at our offices in St. Aldate's Chambers or city libraries during opening hours.
QR Codes (Barcode like symbols which can be scanned by a compatible smartphone or tablet that then takes users through to a specific webpage.)	Enables quick and easy access to detailed information on the move. Is often more accessible to some hard-to-reach groups (e.g. younger people).	Excludes those without compatible smartphones or tablets with the necessary app. Smartphone and tablet screens may be too small to view detailed plans and documents properly.	QR codes are currently used on site notices. When scanned, they take users through to the Public Access page on our website where they can view planning application information and submit comments.
Consultee Access (System for notifying local interest groups and other organisations of planning applications within a specified area. Comments can also be submitted via this system.)	Instant notifications. Allows groups to more easily manage their consultation responses. Resource efficient.	Excludes those without access to the internet. Technical problems could hinder access to information or the submission of comments. Operated by third party provider - limited control of service/ technical issues.	Consultee Access is a service that we currently offer to local interest groups and other organisations in addition to Public Access.
Planning Finder www.planningfinder.co.uk (Planning application notification system. Registration via our website. Uses data on postcodes to notify users of planning applications they may be interested in)	People can specify multiple areas that they are interested in. If they 'flag' an application they will also be notified when the application has been determined. Resource efficient.	Excludes those without access to the internet. Technical problems could hinder access to information /submission of comments. Operated by third party provider - limited control over quality of service/ technical issues.	Planning Finder is not the Council's main consultation method for planning applications. However, it provides a useful tool for members of the community to keep up-to-date on planning applications in specific areas.
Email	Direct contact with specific individuals. Minimal delay between email being sent and being received. Resource efficient.	Can only contact those people who have provided their email addresses specifically for this purpose. Email addresses/contacts may change over time meaning that the database can easily become out of date.	We normally use emails in the following situations: <ul style="list-style-type: none"> To inform statutory consultees of relevant planning policy and planning application consultations To inform councillors of planning applications and appeals (by emailing weekly lists). To provide updates to people who have specifically registered their interest in the progress of planning policy document production.
Facebook (Online social network)	Able to share information with a large audience. Is often more accessible to some hard-to-reach groups (e.g. younger people). Resource efficient.	Excludes those without access to the internet. Could generate online comments and debates rather than formal consultation responses which may be hard to manage, monitor and assess.	The Council's Facebook account will be used as an additional means of notifying people when consultation periods start and close for planning policy documents and major/significant planning applications and appeals.
Twitter (Online social network)	Able to share information with a large audience. Is often more accessible to some hard-to-reach groups (e.g. younger people). Resource efficient.	Excludes those without access to the internet. Could generate online comments and debates rather than formal consultation responses which may be hard to manage, monitor and assess.	The Council's Twitter account will be used as an additional means of notifying people when consultation periods start and close for planning policy documents and major/significant planning applications and appeals.

Online Consultation Portal (Online system available via our website where people can register to receive alerts when consultations are being undertaken and/or complete a questionnaire/survey.)	Automatically alerts people to consultations. People can manage their own profiles and settings. People can submit their questionnaire/survey responses in a simple, user-friendly format. Responses are automatically input into a database. Resource efficient.	Excludes those without access to the internet. Only notifies people who have registered.	The online consultation portal is currently used for the majority of planning policy consultations to allow people to view the documents and to make comments via an online questionnaire.
Printed			
Site Notices	Provides notice of the proposal in the area most likely to be affected. Resource efficient.	May be damaged or removed. May not be seen or be ignored. May be less accessible to some hard-to-reach groups (e.g. people who are housebound due to illness or disabilities).	Site notices displayed on and/or near the site will be the main way that we notify people of planning applications. Site notices will be printed on yellow card to increase their visibility and laminated to protect them from rain. Notices for amended schemes will be printed on pink card so that they can be differentiated from the original notice. Notices will be displayed at least 21 days before the consultation closes in line with statutory requirements.
Paper copies of documents	Accessible to those without access to the internet or who are unable to use computers. Enables large plans to be viewed more easily.	Locations may be inaccessible to some. Opportunities to view documents is limited by opening hours.	We currently: <ul style="list-style-type: none"> Make sure that paper copies of planning policy consultation documents are available to view at our offices in St. Aldate's Chambers and city libraries during their opening hours; Make paper copies of major planning applications available to view at our offices in St Aldate's Chambers during opening hours; Make paper copies of other types of planning application available at our offices during opening hours upon request.
Letters (Printed letters sent via the post.)	Easy to target people in a specific area. Letters can be sent directly to all properties. Is often more accessible to some hard-to-reach groups (e.g. housebound, disabled and frail elderly people).	Delay between letters being produced and being received. Where properties are rented, the letters may not be seen by the property owner. Not environmentally friendly. Postage and printing costs.	We will not normally use letters to notify people of planning policy or planning application consultations. Letters will only be used be in the following situations: <ul style="list-style-type: none"> To notify statutory consultees of planning policy and planning application consultations where we do not have email addresses. To notify people of planning appeals. (Letters will be sent to adjoining properties and all those who commented on the original planning application.)
Leaflets	Easy to target people in a specific area. Leaflets can be delivered directly to all properties. Is often more accessible to some hard-to-reach groups (e.g. housebound and frail elderly people).	Delivery can be highly resource intensive. Limited information can be given (summary only). Where properties are rented, the letters may not be seen by the property owner.	Leaflets may be used for planning policy consultations where we need to target a specific geographical area of the City.
Paper response forms / questionnaires	Accessible to those without access to the internet or who are unable to use computers.	Locations may be inaccessible to some. Access limited by opening hours.	For planning policy consultations, we will make sure that paper copies of response forms/questionnaires are available at our offices in St Aldate's Chambers and city libraries during their opening hours. A printable version of the response form/questionnaire will also be available on our website.
Posters	Can publicise basic information and inform the public about further opportunities to get involved. Publicity 'in the community' by using local libraries, shopping centres, sports centres and community centres can be the first step to reach those who wouldn't normally seek to be involved.	Can be easily dismissed or overlooked. Information provided is limited.	Posters may be used for planning policy consultations where we need to target a specific geographical area of the City.
Newspaper advertisements a) statutory notices b) press releases	Able to reach a broad spectrum of the community to raise awareness of plans, proposals, and consultations/opportunities to get involved.	Relies on people looking specifically at the public notices section in newspapers, so can be easily overlooked. Information provided is limited. Expensive.	We currently advertise the following types of planning application in the Oxford Times: major applications, listed building applications, developments in a conservation area, developments in the Green Belt, EIA development, City Council applications and departures from the development plan. We also notify the local press (Oxford Times and Oxford Mail) of all planning appeals. Planning policy consultations will only be advertised through a statutory notice in the local

			press when required by the regulations (in most cases, this is no longer required).
Public exhibitions (unstaffed)	Can present information in interesting and easily-accessible manner. Focused attention on specific project(s). Resource efficient. Locations can be targeted to specific areas.	No opportunity to clarify issues or receive feedback directly. Can be missed if not well publicised in advance.	We may hold unstaffed public exhibitions relating to planning policy consultations to raise people's awareness of key issues and to encourage people to look at the consultation documents online/at deposit points. We may also do this for major / significant planning applications.
Verbal / Face-to-Face			
Telephone	Provides an opportunity to explain/clarify issues and answer queries. Is often more accessible to some hard-to-reach groups (e.g. disabled, frail older people and those with literacy difficulties).	Resource intensive. Does not reach a wide audience.	Comments on planning applications and planning policy documents must be formally made in writing and therefore telephone conversations are not one of the main ways that we would usually consult members of the public. However, the Council's telephone number is widely available and officers will discuss cases with members of the public if they call as part of our aim to provide excellent customer service.
Public exhibitions (staffed)	Can present a lot of information. Focused attention on specific project(s). Opportunities to clarify and discuss issues and to receive feedback. Locations can be targeted to specific areas.	Resource intensive. Time limited. Can be missed if not well publicised in advance.	We may hold staffed public exhibitions related to consultations on Planning policy documents to raise people's awareness of key issues and provide an opportunity to discuss those issues with City Council officers. We may also do this for major / significant planning applications.
Structured Workshops	Discussion groups can generate ideas, improve understanding and develop 'ownership' of proposals. Participants get to hear each other's perspectives in the discussion.	Resource intensive. Relies on relevant participants being available at the specified date/time. Requires significant preparation to allow a structured approach	We may use workshops in consultations on policy documents to facilitate discussion and gather different perspectives on emerging policies.
Public meetings	Open to everyone. Means of sharing information with a wide audience. More efficient if part of a pre-arranged external meeting (for example visits to Parish Council meetings).	Potential to be dominated by an un-representative minority. Others may be intimidated so not all views may get heard or put across. Resource intensive. Relies on people being available at the specified time/date.	We may try to reach community groups through existing forums dealing with local issues when undertaking consultations on planning policies relevant to the area in question. This option may be considered for exceptional, significant schemes but is not normally used as a preferred method of consultation.
One-to-one meetings with selected stakeholders	Useful means of identifying key issues and involving specialist organisations in specific topics.	Resource intensive.	Planning policy documents often require on-going informal dialogue, such as with statutory consultees, key delivery partners and neighbouring local authorities under the 'duty to cooperate'. This may take the form of one-to-one meetings.
Steering/advisory group	A way to get key organisations involved in overseeing or acting as a sounding board for the production of planning policy documents. Particularly appropriate for area action plans or topic- based policies. The role of the group needs to be clear (via terms of reference) and there should be a transparent approach to selecting members.	Resource intensive.	Steering groups may be used in overseeing the preparation of technical studies and emerging policies, for example to test key assumptions or methodology, in planning policy.
Radio	Can reach a wide representation of the community and raise the profile of plans and proposals.	Expensive. Time consuming to produce. May only reach some social groups.	Not normally used as a method of informing people about consultations, however this option may be considered for exceptional, significant schemes.

Planning Aid

Planning Aid England and Planning Aid for London together provide free, independent and professional help, advice and support on planning issues to individuals and communities who cannot afford to pay for professional help. The service is delivered through a small team of staff and a network of volunteers, the majority of whom are Chartered Town Planners, who give their time free of charge. Planning Aid also works with developers, local authorities and others to help raise the standard of community engagement on planning matters.

How you can contact us

Planning Aid is delivered through staff and volunteers based in the community:

Planning Aid England

Good Practice Guide to Public Engagement in Development Schemes

For developers, communities and decision makers, one of the biggest challenges in taking forward a development scheme is to ensure that public engagement is undertaken in a way which is meaningful, inclusive and brings benefits for all involved.

This guide is intended to provide practical advice for all those involved in public engagement in development schemes which require planning consent. It is illustrated by real examples of good practice and provides information and assistance to those planning, engaging in, or assessing community consultation.

Good engagement reduces conflict, results in better development and most importantly allows communities to have an influence over the future shape of the places where they live.

About Planning Aid

Planning Aid offers people the opportunity to get involved in the development of their local areas. We provide free and independent professional planning advice to community groups and individuals who cannot afford to pay professional fees. We work with communities to help them understand and play a role in the planning process. We are an independent source of advice and information on planning issues, and not part of central or local government.

Further information and contact details can be found at the back of this guide.

Engagement is a two way process of openly sharing and exchanging information, understanding different views, listening and responding to suggestions, developing trust and dialogue to support effective working relationships to the mutual benefit of all involved.

There are many challenges to successful engagement with the community on development schemes, but they are small in comparison to the risks of failing to engage in a timely, meaningful and inclusive manner.

“Good engagement motivates and inspires individuals and communities to help shape the future of their neighbourhoods, with positive outcomes for all involved.”

Sue Manns, National Planner, Planning Aid England.

“Effective consultation at the early stages of proposals improves schemes and creates value.”

Mike Dunton, Consultant G L Hearn.

Why Engage?

Depending on the size and type of development project, there are different legal requirements for community consultation. Larger projects, including nationally significant infrastructure projects now require considerable consultation by the developer before an application is submitted. Other projects, for example small developments such as a change of use or householder application, may only require neighbours to be notified by the local authority once an application has been submitted. Whatever the requirements, talking to neighbours and others before an application is submitted will often save time, reduce risks and most importantly result in a better scheme.

It makes sense to engage

Good developments are those which work well with their local areas. This means that as part of the design process there is a need to understand how a place works and functions. The community are well placed to help with this information. Good community consultation and engagement is an essential part of a good development process, especially when undertaken early on in the process when changes to a scheme can more easily be made.

For **communities**, engagement means a chance to understand what is proposed, to explore how a development can bring value to an area, to identify which options would work best within a local context, to help shape solutions and to have their say on a scheme.

For **developers**, engaging with the local community can provide vital local knowledge, reduce the risk of challenges and delays, identify how a scheme can bring value to a local area and enhance the reputations of all involved.

For **decision makers**, good pre-application engagement will have identified those issues of importance to the local community and show how the proposal has responded to these. It will be for the decision maker to balance these alongside planning policy and other considerations, e.g. traffic impact, job creation and make a decision on the application.

When making design changes in response to comments from the community, it is important to be sure that the views are representative of the community, because if not, then it might not be the right solution. Inclusive engagement is the key to success.

Good engagement does not mean that a scheme will definitely go ahead as it may be unacceptable in terms of planning policy however, it will play a big part in helping all those involved to understand the issues and risks associated with an application and in reducing delays once an application has been submitted.

Good engagement is about more than just 'ticking a box'. If there is no real commitment, all the key decisions have been made, not enough time is allowed or there are insufficient resources to engage properly, it is likely that at best little will be achieved and at worst, may add to the frustrations of a community increasing the risk of objections, delay and possible refusal of consent.

A recipe for good engagement

There is no 'perfect recipe' for good community engagement. Every development scheme and every community will be different. However this guide describes some good practice 'ingredients' which can be used to develop a positive and beneficial engagement process.

"The typical participants in local decisions vary according to activity, but generally are more likely to be white, older, better educated, richer, middle class males."

Pathways through Participation: What creates and sustains active citizenship? Understanding Participation: A literature review. NCVO, IVR and Involve. Dec 2009

"Change happens – and needs to happen – but people are often very uncomfortable with the uncertainties that change brings to their lives. Early and appropriate engagement in the development process can do much to minimise uncertainty, and help people make a positive impact on schemes rather than just sniping from the sidelines. This Good Practice Guide will help planners and other key players ensure that this happens."

Mark Middleton, Head of Planning, Worcestershire County Council.

Community consultation and engagement should not be carried out just to tick a box – it should have a clear purpose and be of value to all involved, otherwise it might do more harm than good!

Good engagement reduces conflict, results in better planning outcomes and most importantly allows communities to have an influence over the future shape of the places where they live.

When investing in a new product, a good business will invest in 'market research' or consultation to ensure that the product is fit for market. Development schemes are no different.

Principles of Engagement

Principles of Engagement

Learn from the process – identify what people think of the way the consultation has worked. What could be done better, what else needs to be done, was it a balanced and inclusive process. Identify the lessons learned and take these forward into other projects.

Research and analysis – explore the context, history, different communities and groups in the area who may be affected. Identify what will motivate people, what else is happening in the area, establish if it is connected and if so consider the potential to share events. Establish the goals - what are the benefits of engaging with communities and how will these be realised?

Relationship building, knowledge and skills – develop links with key groups and individuals who can assist and advise on what matters in the area. Consider how existing community groups, networks and representatives might be involved, what barriers might exist and what help might be needed to build the capacity to engage.

Communications – ensure that the information provided is clear, accessible and sufficient to tell people what they want to know, and to allow them to decide whether to engage. Be clear about what is fixed and why, and what is 'up for debate'. Check that mechanisms are in place to allow information to flow in all directions and that response dates are clear.

Continuing to engage – Has feedback been given and how will the relationships developed be continued into the construction and operational phases of a development project?

Monitor and evaluate – monitor engagement and use the results to identify gaps and inform actions to widen the process and ensure a balanced community response is achieved. Consider the comments received and how they can be taken into account in the design – is further engagement required?

Inclusive – ensure under represented individuals and groups are included and that they have an equal opportunity to be heard. Be clear when making changes that these do not respond to a vociferous minority but are a response to a wider community view.

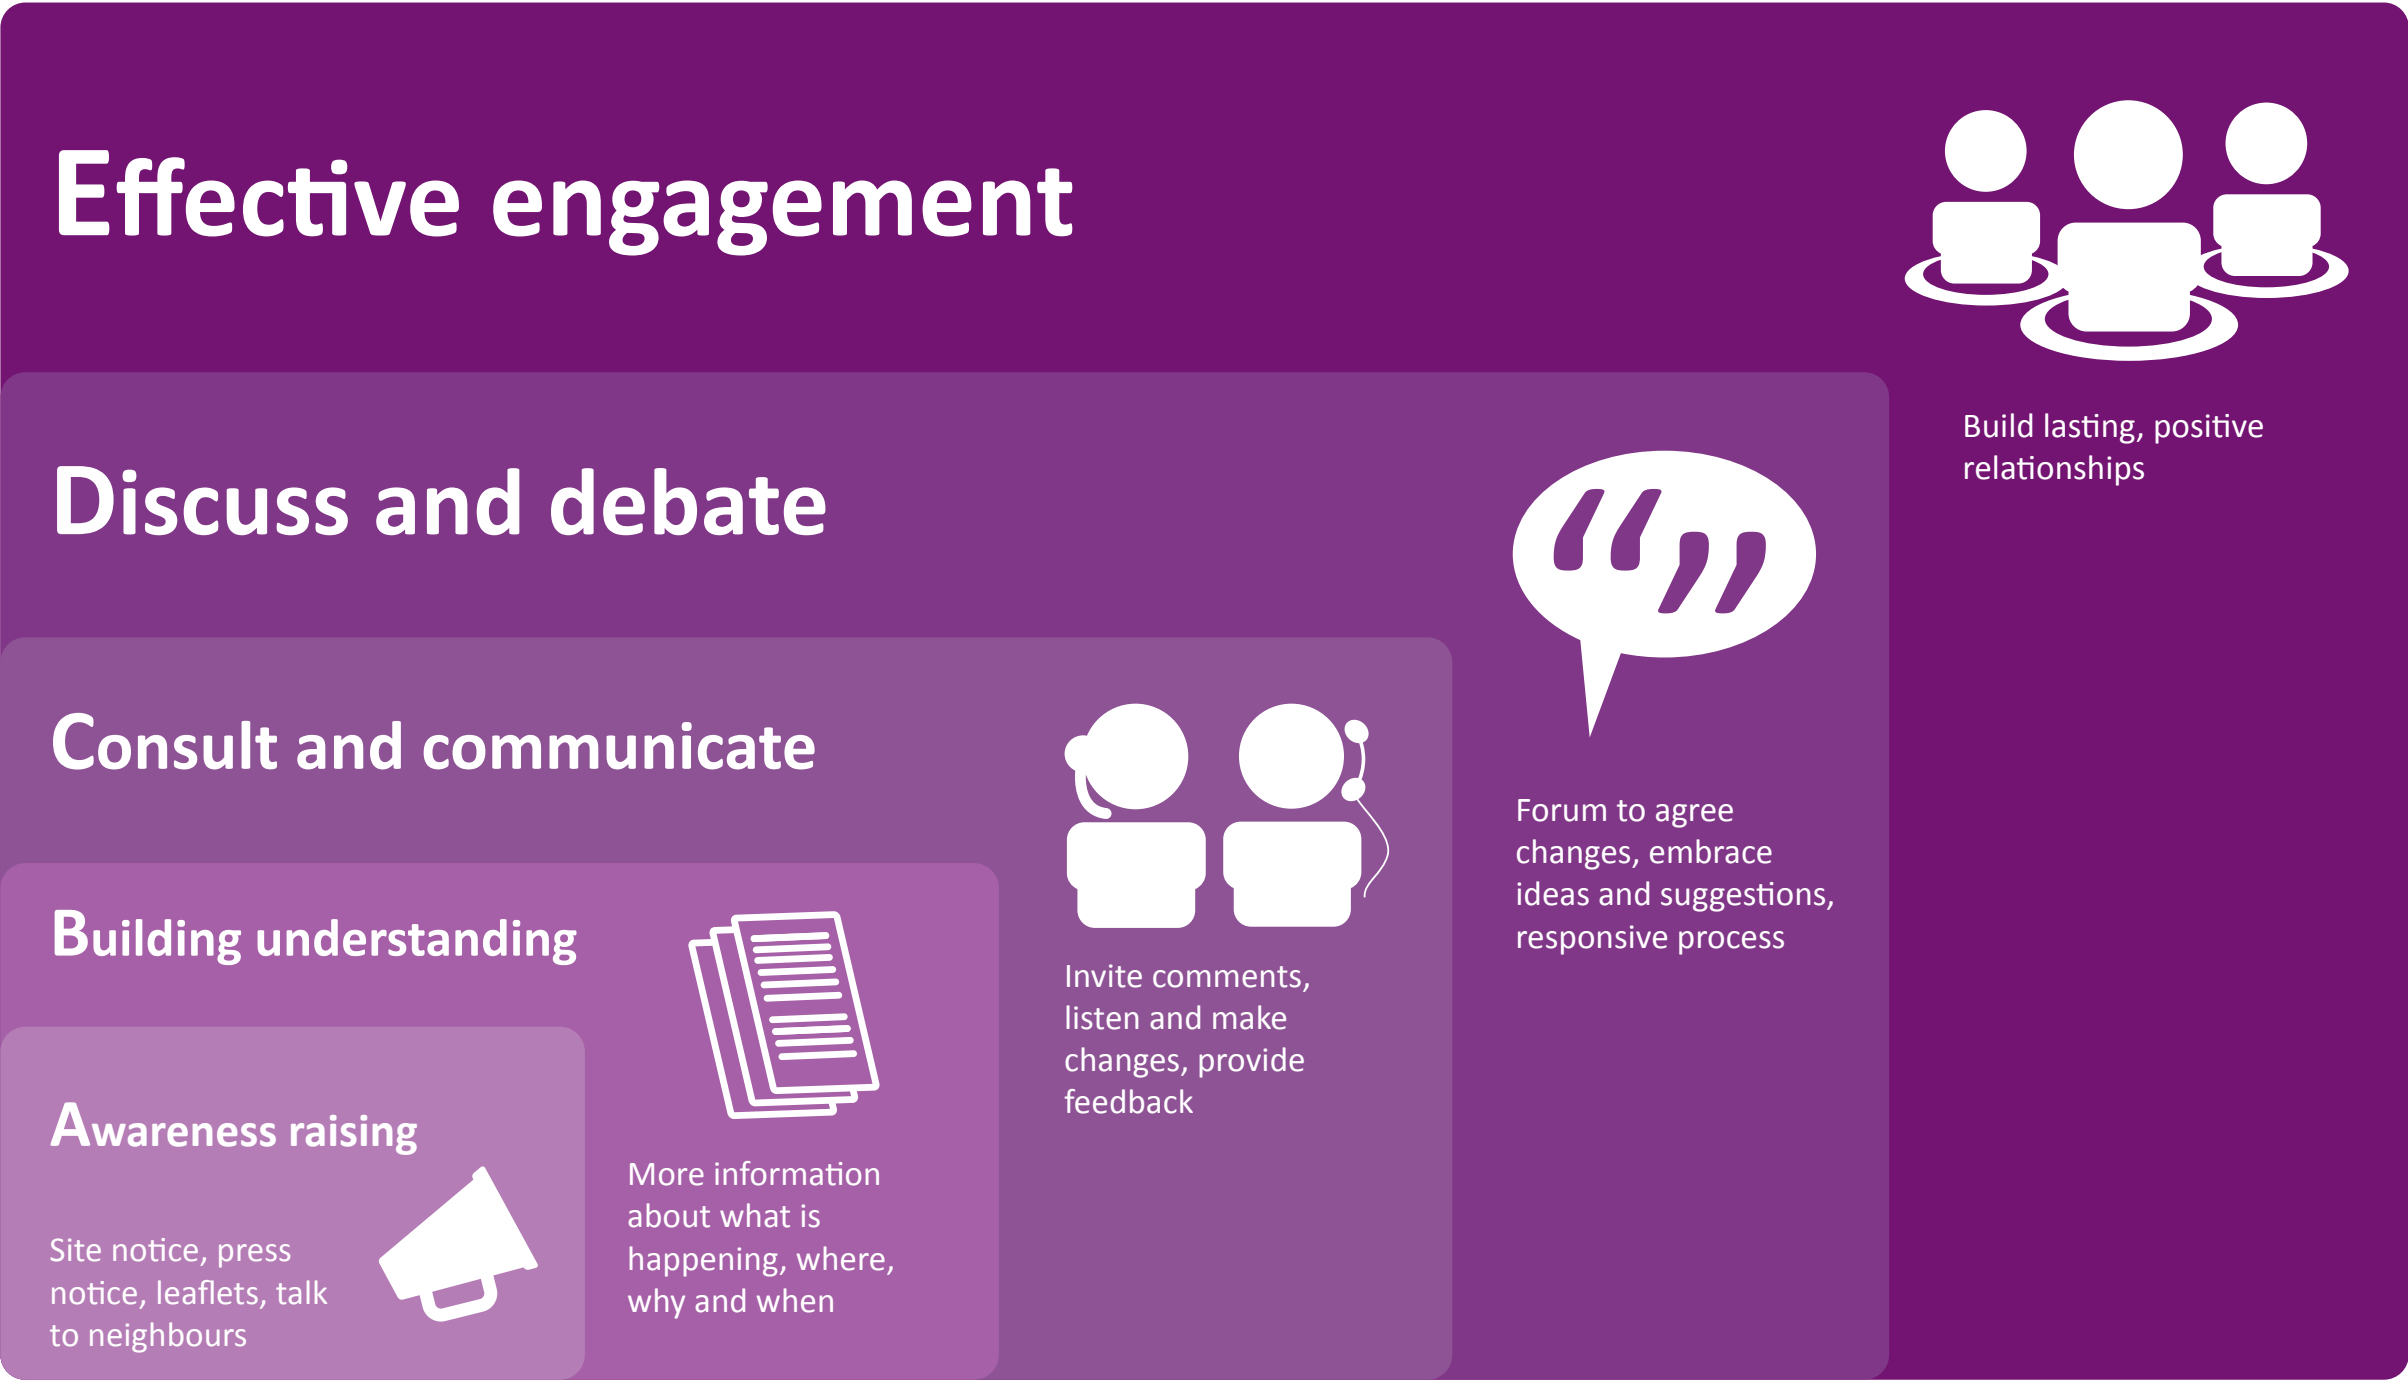

Timing – be realistic, allow sufficient time to achieve the goals set at the start. Provide a clear timetable for the project identifying consultation opportunities. Ensure engagement takes place when things can be changed and when it is cost effective to do so. Allow sufficient time for considered and informed response. How and when will feedback be provided?

Awareness to Engagement

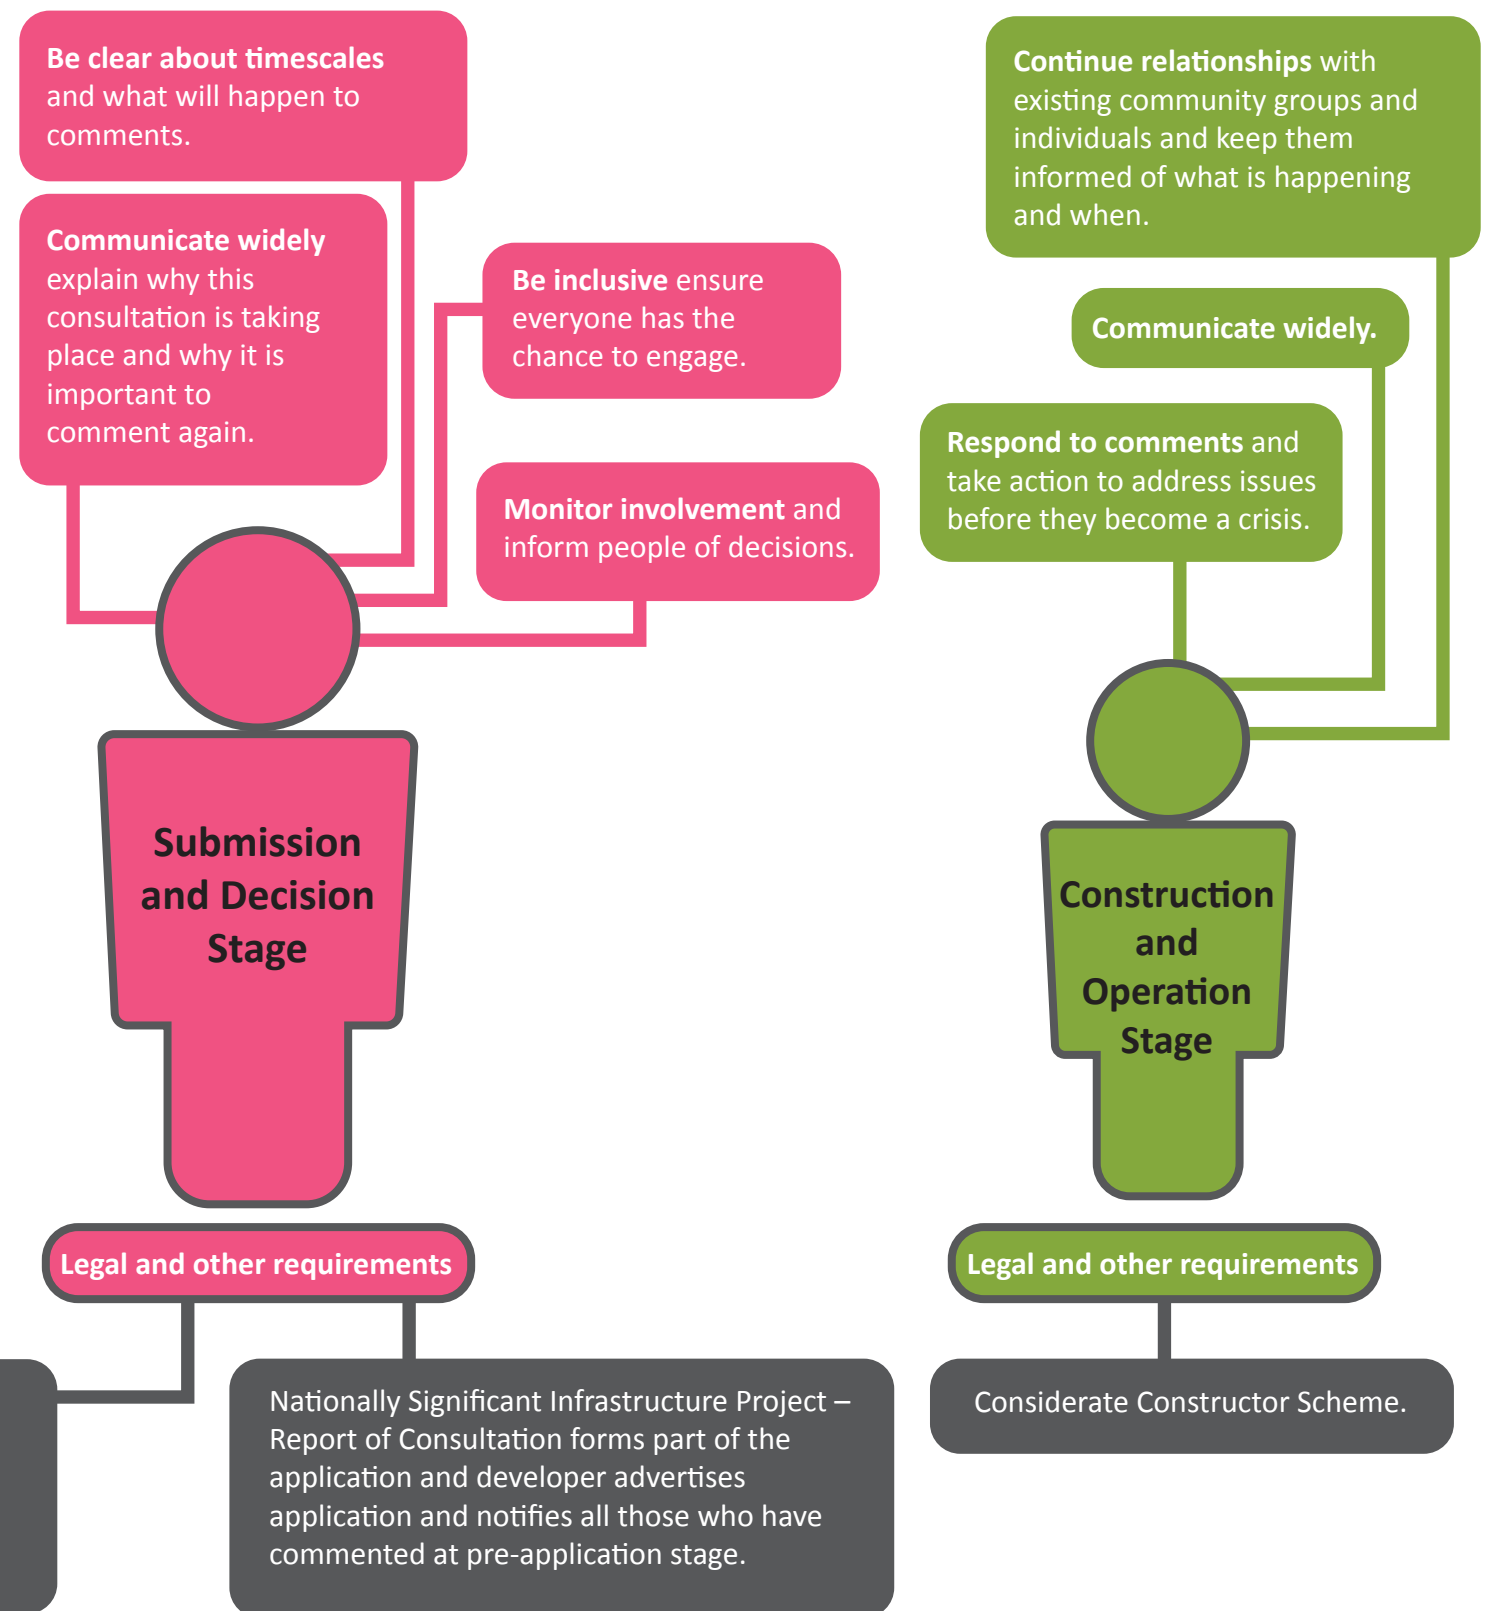

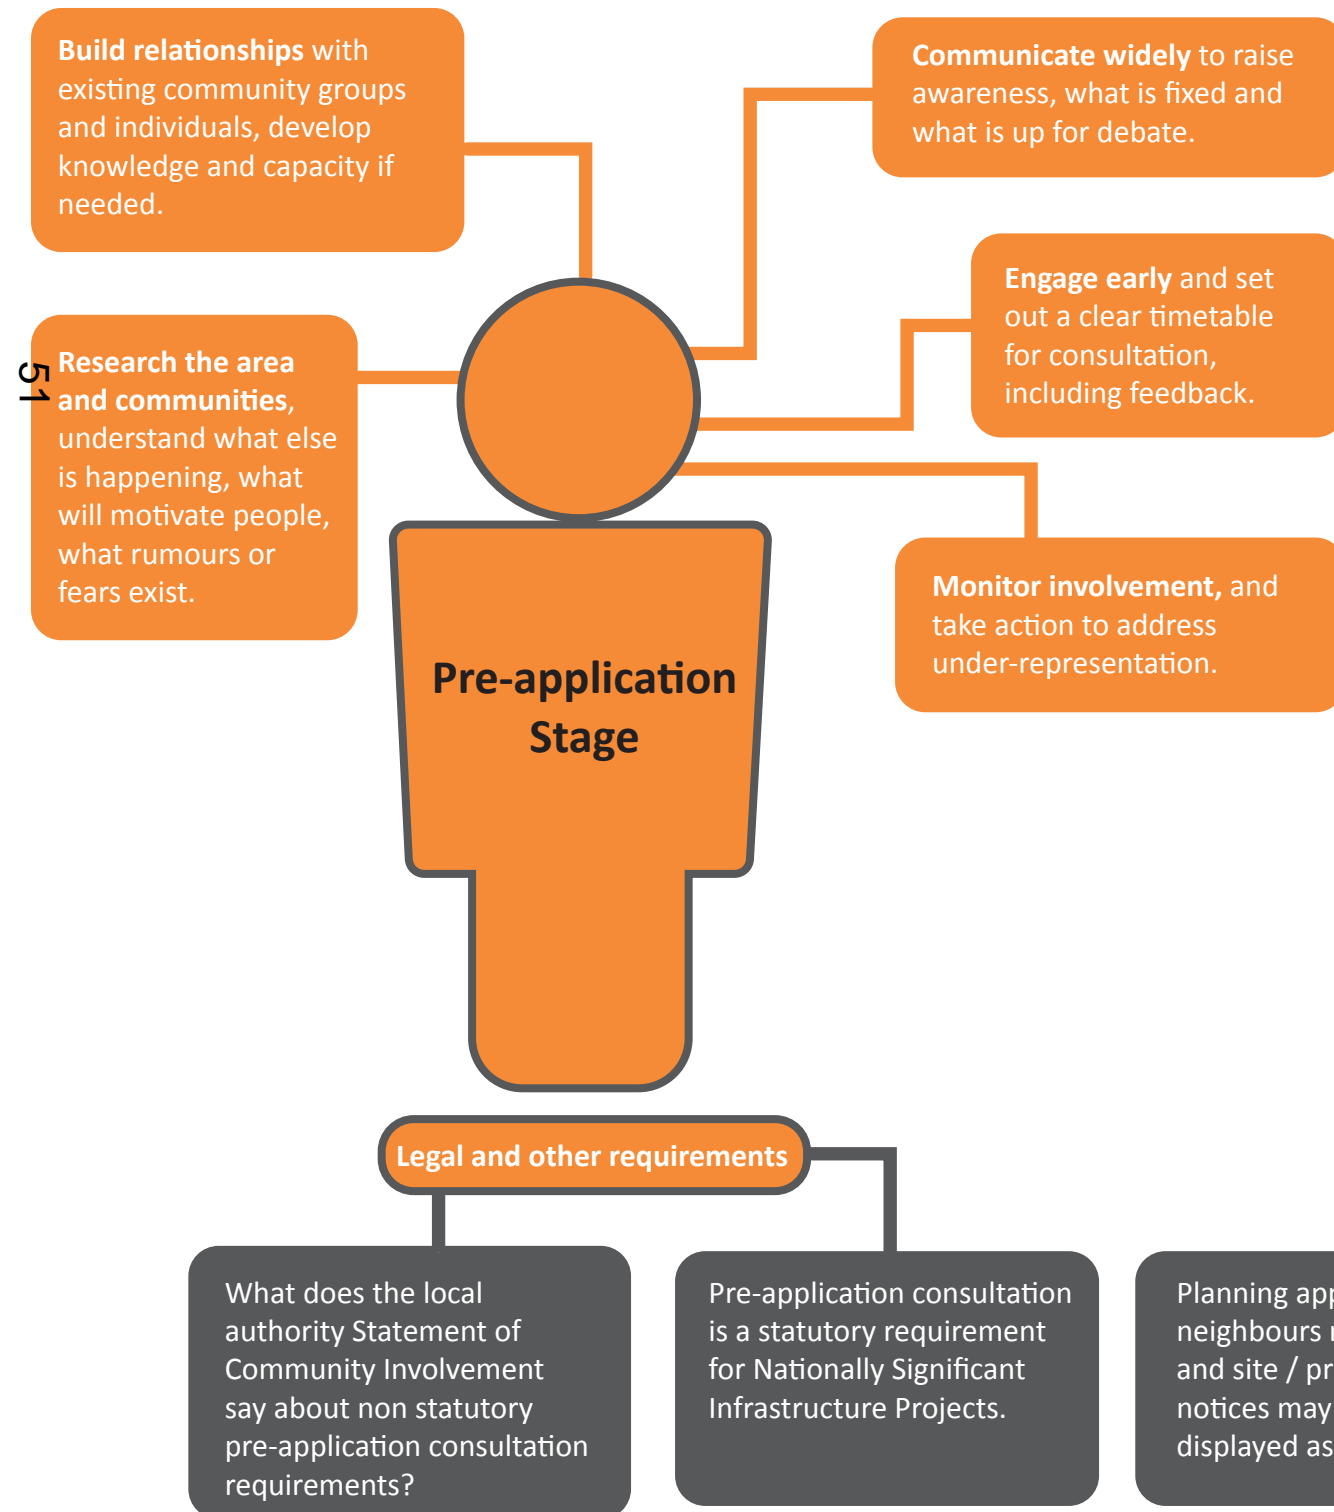

Moving towards effective community engagement

Every development, no matter how large or small, can benefit from effective engagement. Talking to a neighbour before submitting an application for an extension to an existing building, listening to any views they may express and responding to comments they may make always helps, as does telling them when building work will start. This applies equally to a nuclear power station or major residential development. However, the approaches used, the time taken and the resources invested in consultation will be different, and should be in proportion to the size and impact of the development.

Planning for Community Engagement

The Different Stages of a Development Scheme

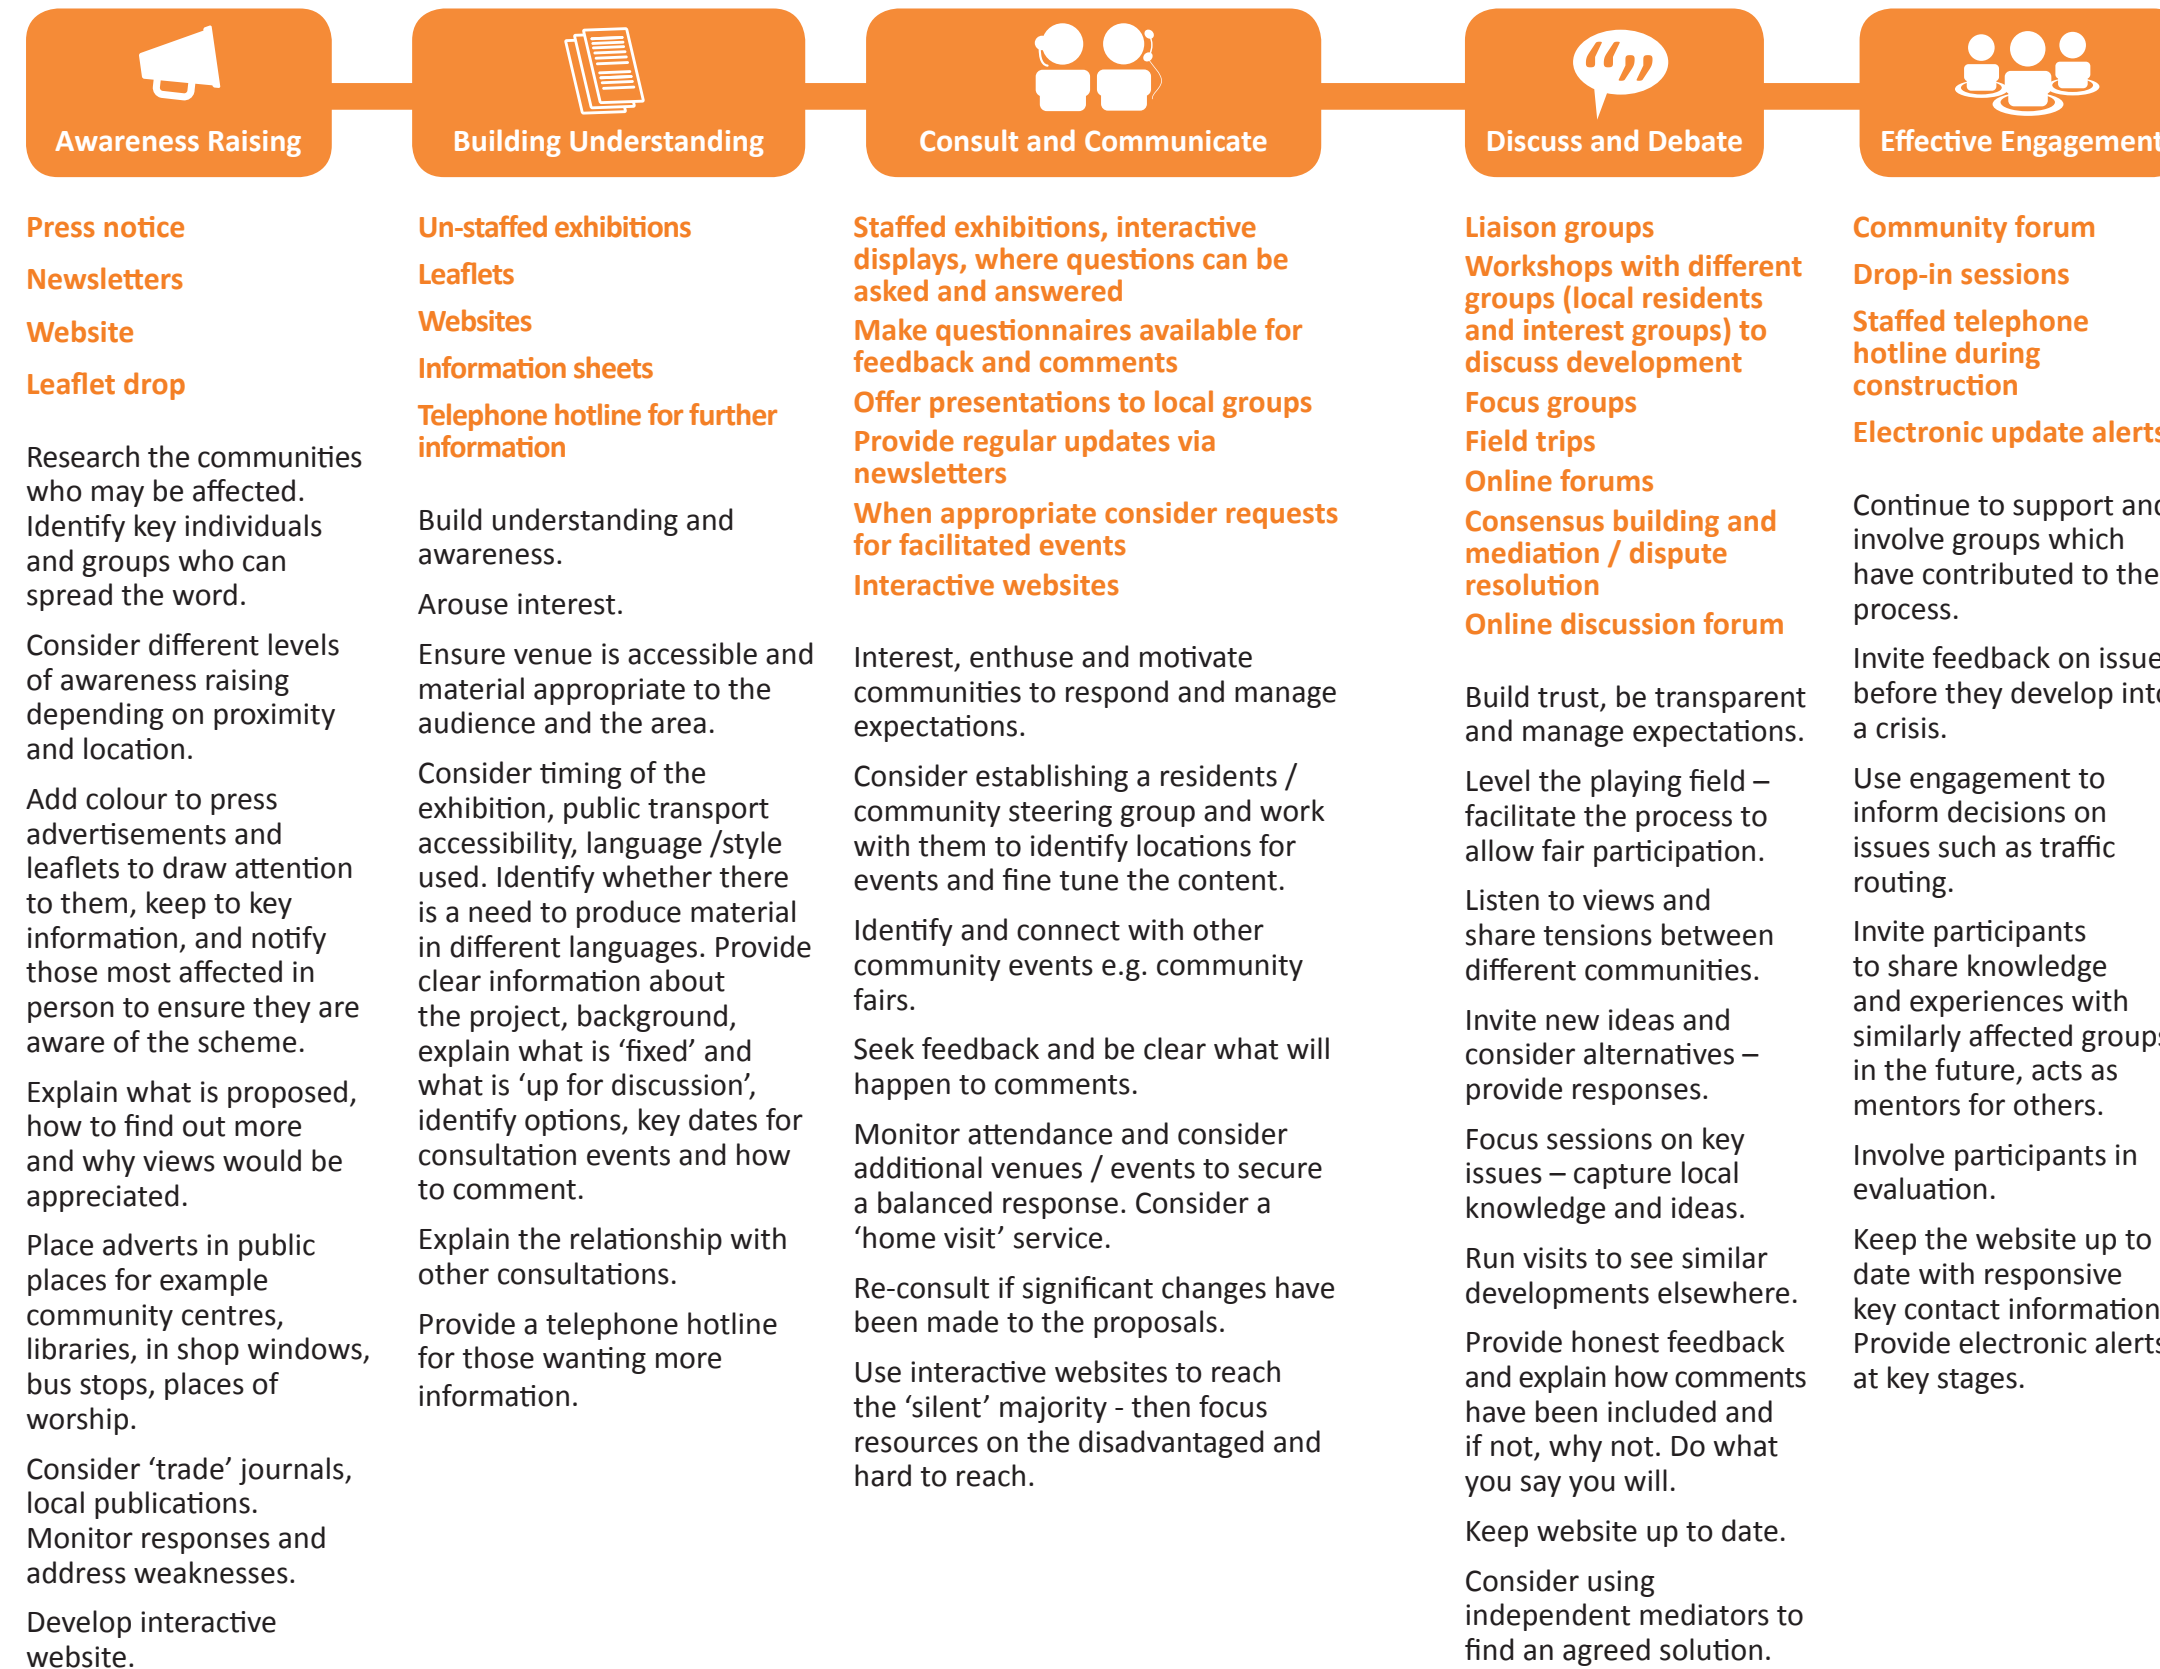

Pre-application Stage

Good Practice Approaches

Approaches

Good Practice Advice

Examples

Examples

"We aim to meet the challenges of 'consultation fatigue' and raise interest in the planning process by using local people to encourage their friends, neighbours and families."

Mike Dando, Community Outreach Coordinator, Planning Aid England.

Planning Aid for London and Crossrail set up a Community Liaison Panel for residents of Whitechapel to help them be involved in each stage of planning and constructing Crossrail. In areas where English is not a first language, translation services have been offered to enable minority groups to engage.

EDF Energy held a series of workshops for school children and young adults to help to identify the issues and opportunities associated with a new nuclear power station in their area – the suggestions which resulted have influenced the project development.

"The independent research helped to identify who was engaging in our consultation process in the early stages. By comparing these results with the profile of the population as a whole, we were able to identify groups that were missing and take specific steps to engage with them later in the process."

Alex Kaufman, Head of Communications, EDF Energy New Nuclear Build.

"Sharing plans with my neighbour resulted in some good ideas which saved money and improved the appearance."

Member of the public.

- A 'Building Schools for the Future' consultation in Birmingham took place on a vacant site where a new school was to be located.
- A traffic calming consultation event was advertised on road signs at affected junctions.

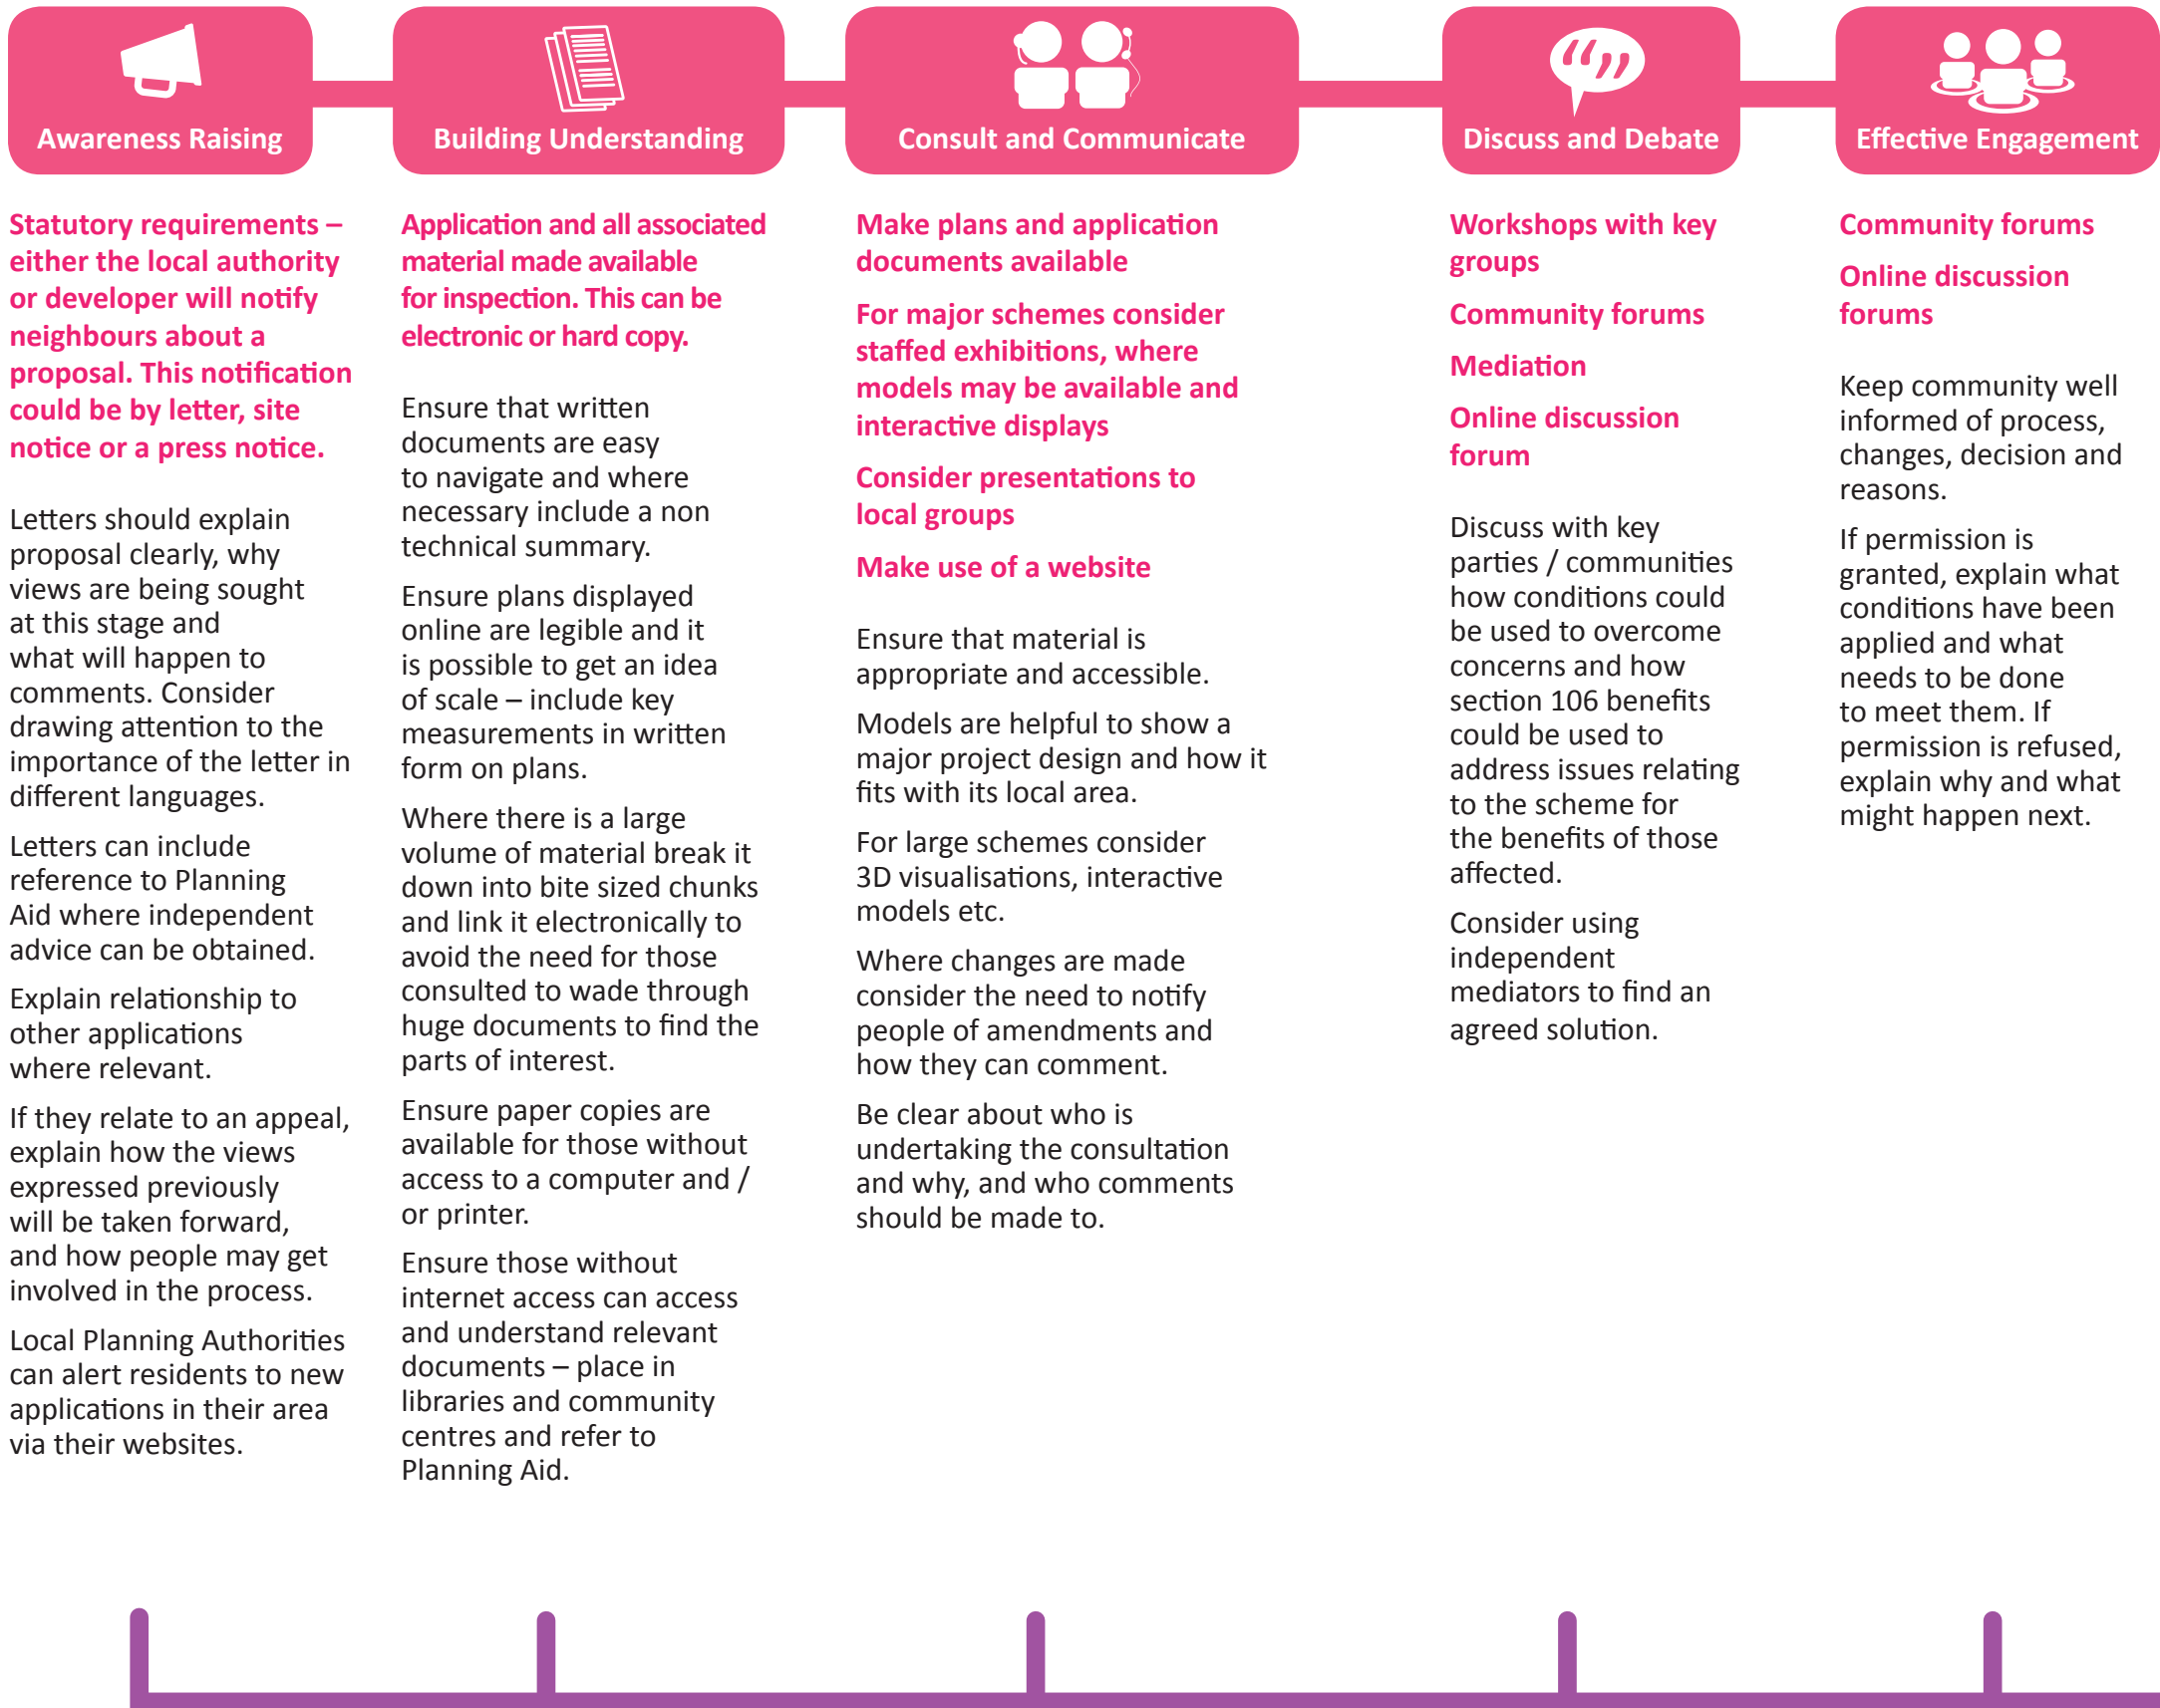

Submission and Decision Stage

Good Practice Approaches

Approaches

Good Practice Advice

Examples

Examples

Conflict between neighbours arose following refusal of planning consent for an extension which conflicted with planning policy. Due to the wording of a letter, the applicant thought refusal was also due to the objection from the neighbour and a long-standing friendship was destroyed.

Mediation may be a way of achieving an agreed solution where there is conflict between parties.

Kirkstall Forge (Leeds) is a Brownfield mixed use development of over 100,000sq metres. The developer works through the local liaison group to provide regular progress reports throughout the life of the application and subsequent amendments. Regular updates are also provided on the website and each year the developer attends the local community festival (attended by over 20,000 people) and has a stand to provide the latest details of the scheme and answer questions about the proposals.

A number of local planning authorities have a 'duty' planning officer available to help people understand planning applications and how to make their views known. In Birmingham there is also help for those who find it hard to use the online information system.

Many councils now include reference to Planning Aid on their neighbour notification letters as a source of independent advice on planning.

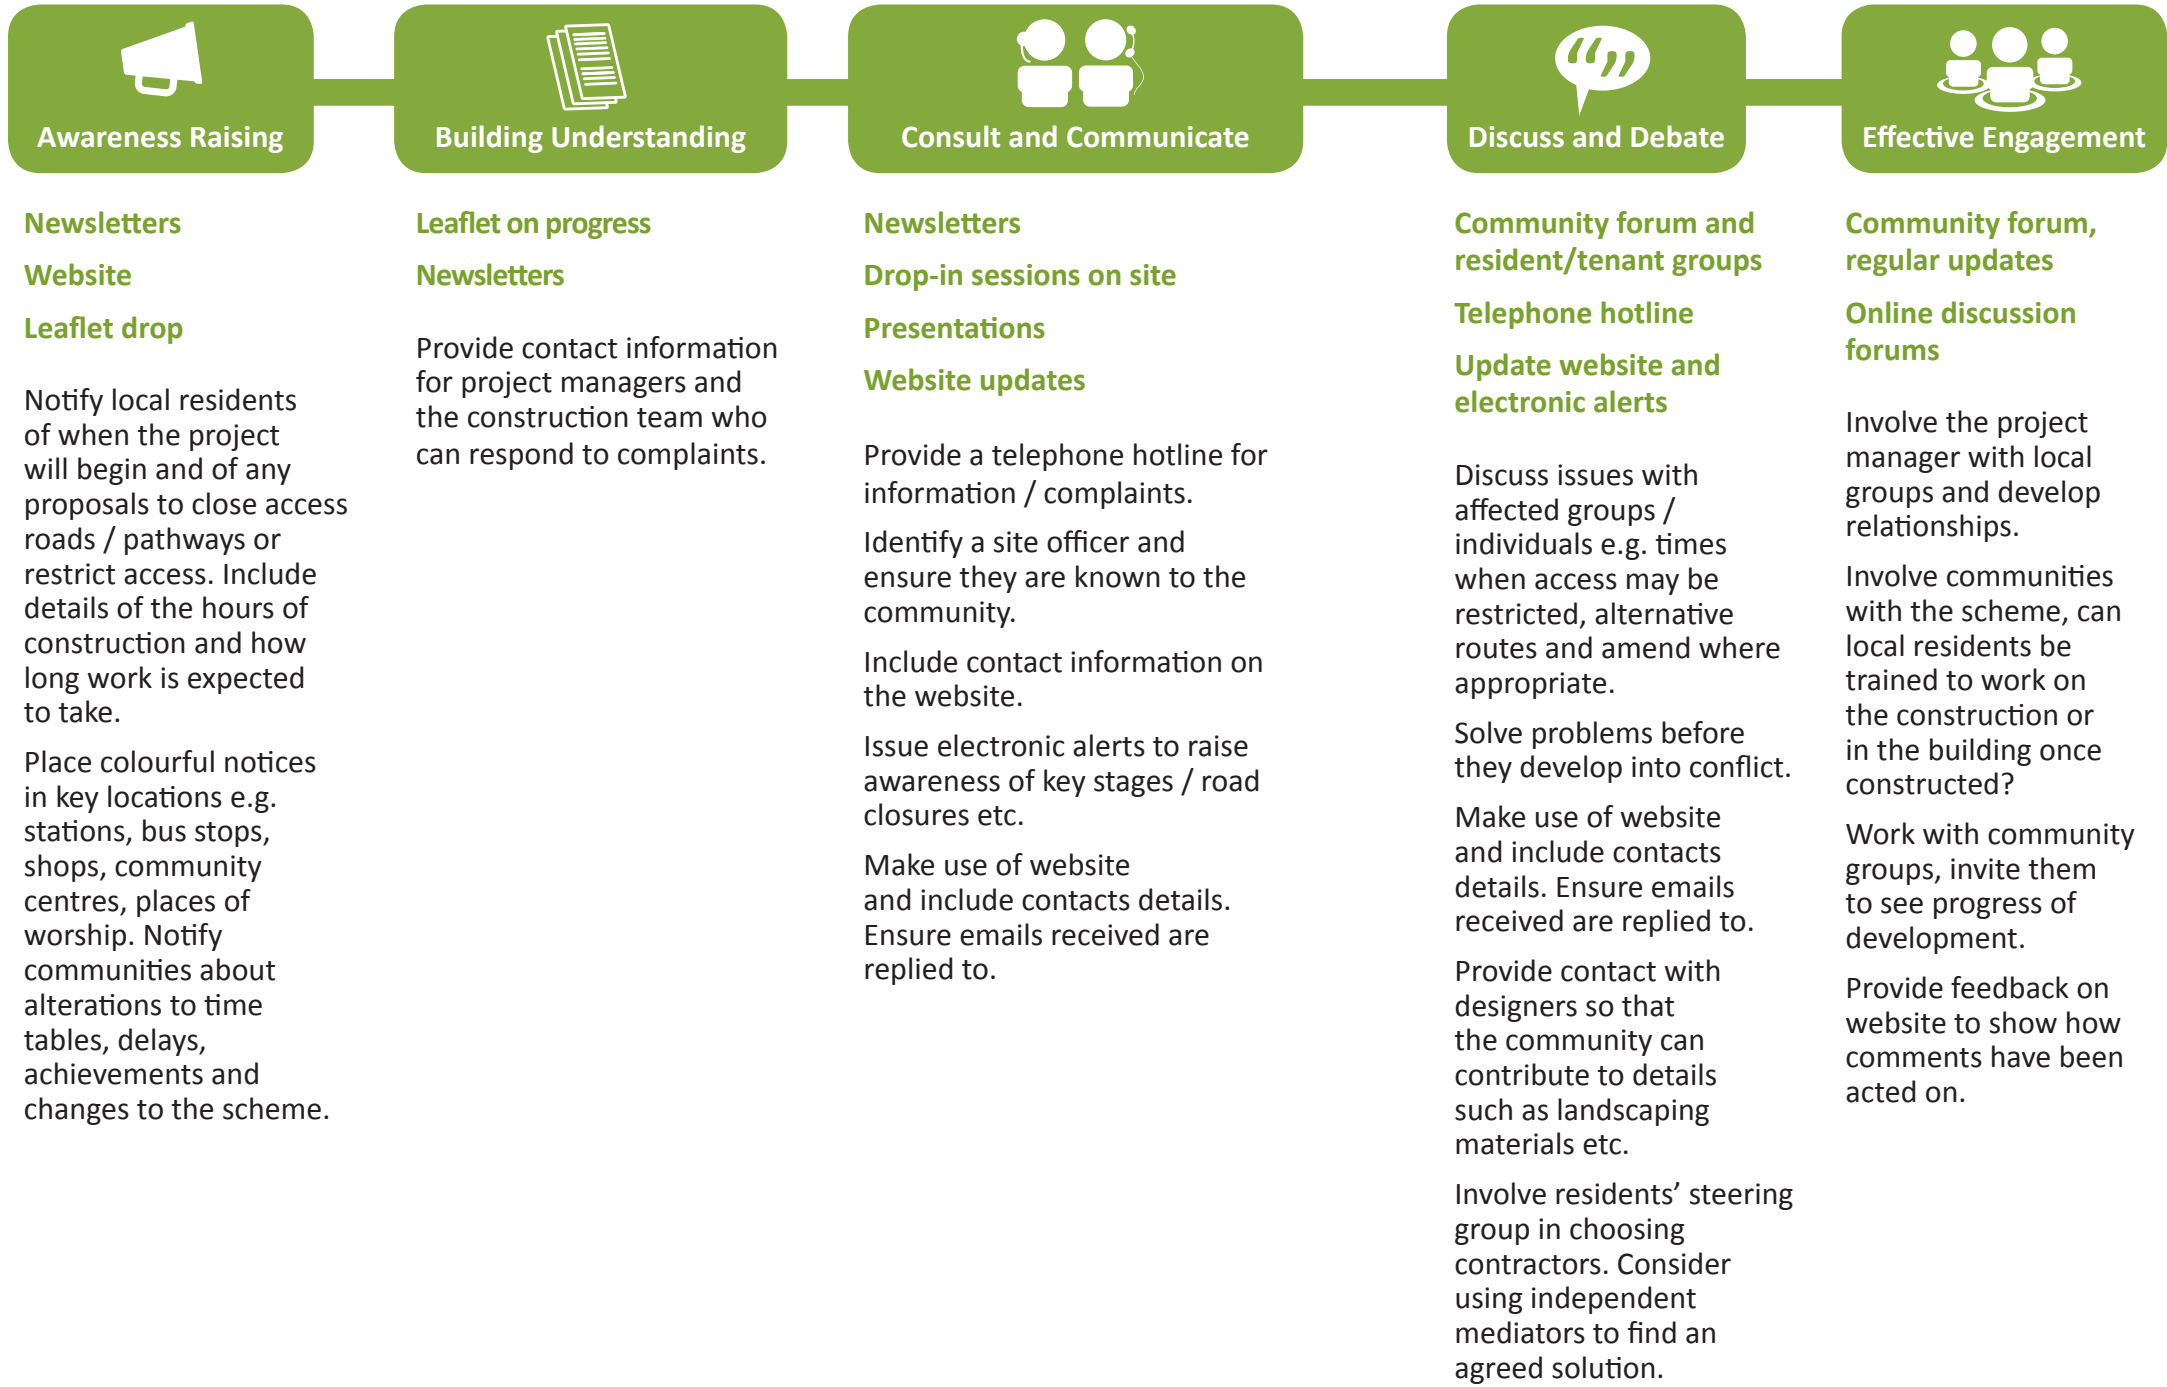

Construction and Operation Stage

Good Practice Approaches

Approaches

Good Practice Advice

Examples

Examples

- Family Mosaic Housing Association held a competition to award 5 construction job apprenticeships to young people on an estate which was to be rebuilt as part of a regeneration scheme.
- “Lockleaze Voice is a Neighbourhood Planning Group open to all those living and working in the local community. Regular meetings are held at which the attendees can discuss and influence local concerns, particularly development schemes.”*
Peter Whitehead, Community Outreach Coordinator, Planning Aid England.
- The Docklands Light Railway employed a ‘local ambassador’ as part of the launch strategy for Langdon Park Station to promote the use of the station by liaising with the local community and distributing travel cards. This was so successful that local ambassadors will be appointed for future station schemes.
- The Channel Tunnel Rail Link – High Speed project established a 24 hour helpline and appointed an independent Complaints Commissioner to oversee the project and report back to the local authorities.
- The Bull Ring development in Birmingham included viewing areas and live web cameras where progress on construction could be followed.

Delivering Good Practice

Question:

Consultation and engagement costs money, time and resources, so if it is not a statutory requirement why do it?

Answer:

Good engagement allows key issues to be identified, reducing risk and potential delays post submission for the developer whilst enabling the community to help shape a scheme at the point when changes are more easily made.

Consultation and engagement should be in proportion to the size and impact of the scheme.

Example:

Residents close to a proposal scheme delayed an application for 2 years as a result of a vocal campaign involving local councillors. Planning Aid met with the residents and found that whilst they did not object in principle they had concerns about access and felt ignored by the developer. The problem was subsequently overcome and consent granted. Pre-application consultation had not been undertaken, but could easily have helped avoid this situation.

Question:

When should consultation begin and what information should be provided?

Answer:

Start as early as possible – explain the processes and that early views are sought on key issues / options. Provide sufficient information to allow informed responses to be made. This will allow the early identification of key issues and potential ‘show stoppers’. It establishes trust and understanding.

Example:

When designing a flood alleviation scheme in Morpeth, the Environment Agency (National Environmental Assessment Service) approached the community early, were clear about what could be influenced, when, why and how, and kept local people regularly informed of progress. As a result they were able to dispel rumours, address local concerns and develop an option which had widespread support. This not only reduced the project risks, potential delays and complex land negotiations, but has resulted in a close working relationship with several interest groups which will bring longer term benefits.

Question:

Why carry on engaging with the community once the application has been submitted?

Answer:

The nature and type of engagement will change however, good neighbour relationships can avoid potential conflict during construction and operation. This can connect to the Considerate Contractor Scheme. Communities can also act as mentors to others and as ambassadors for a development, enhancing the reputation of the developer.

Example:

The Cambridge Waste Management Park has been proactive in hosting visits to the facilities on site, with public open days, conducted tours and fun events. The development has taken place in stages and these events have contributed to dispelling myths about waste facilities and with the added bonus of improving understanding of recycling and environmental issues.

Question:

How do you ensure that the pre-application consultation comments received reflect the diversity and mix of the local community, both geographically and from a social perspective – if not what action needs to be taken to rebalance this?

Answer:

The community is a kaleidoscope of different groups. Inclusive engagement ensures decisions taken reflect the wider community view, rather than a vociferous minority. It identifies key issues at a stage where they can be addressed rather than when it is too late to make changes.

Monitor comments received, involvement in groups and meetings in terms of geography, age, gender, ethnicity etc on feedback forms, through independent exit surveys, visual recording of visitors.

Reflect on how to fill any gaps to achieve a balanced community response— Planning Aid may be able to assist.

Example:

In response to a number of development and redevelopment opportunities and challenges in the Lockleaze area of Bristol, a Neighbourhood Planning Group was formed through Planning Aid. The group now organise regular open meetings, have an active web site, and engage effectively with development proposals.

Delivering Good Practice

Question:

How should comments received be reflected and what feedback should be given?

Answer:

The supporting papers accompanying a planning application should show how the views of the community have been taken into account in developing a proposal. In the case of nationally significant infrastructure applications this will take the form of a Report of Community Involvement. A good engagement process will also provide an opportunity for feedback which should be linked to key stages set out at the outset of the process.

Example:

Produce regular newsletters.
Direct mail a personal response to those who have taken the trouble to make their views known and let them know what has changed and why.
Planning Aid helped residents to produce a neighbourhood appraisal in Felling, Gateshead to support future regeneration. Residents presented their results to the Council and obtained feedback.

Question:

How should consultation overload be avoided?

Answer:

Those participating are giving up their time to contribute views on a development project. It is important to understand where and when efforts should be focused and to ensure responding to consultations does not become a full time occupation.
Be innovative – connect with other events where possible. Explain the relationship with other consultations and what is different about each. Work constructively with others to ensure comments are passed on where relevant.

Example:

In Herefordshire a consultation event was linked to a village Christmas Fair, with over 500 people visiting the exhibition.
"Joining up with the Christmas Fair meant that we reached a far wider audience."
Sheena Terrace, Planning Aid England.

Question:

Will creative and innovative approaches result in criticism?

Answer:

Consultation should be meaningful, informative and enjoyable. People will not participate in something which is dull or uninteresting. A good event is one where people leave feeling that they have learned something of interest and their time has not been wasted – these people will continue to engage.
What may work one time, may not with a different group, but do not be afraid to innovate and to listen and learn from feedback.

Example:

A cost: benefit analysis exercise with young people helped decide the mix of play equipment which was to be included in a development.
Planning Aid took local residents on an 'eye spy' tour of an area to help them identify local characteristics that could be reflected in a development scheme.

Question:

How can I reach the hard to find, hard to engage, hard to motivate and hard to help?

Answer:

These groups may engage if made aware of a project and its impact on them. There is a need to think through what might prevent them from participating e.g. time of day / location, culture etc and respond positively. Take advantage of existing local organisations, networks etc to disseminate information, use places visited by the wider community e.g. shopping centres, natural meeting places. Good decisions will be based upon an inclusive and balanced response. Advice on working with these groups can be provided by Planning Aid.

Example:

Rochdale Metropolitan Borough Council used a public artist to engage Muslim Elders and other under-represented groups within a wider consultation process, to help identify common themes for inclusion within the public realm aspects of a scheme.

Delivering Good Practice

Question:

Can public meetings add value to consultation?

Answer:

Public meetings are rarely an ideal forum to discuss and debate a development. However, if well handled they can be a good opportunity to listen to concerns and to provide information on a development proposal. Key things to consider include: using an independent facilitator who will ensure the smooth running of the event and equal participation for those who wish to speak, setting a clear agenda and rules of behaviour, inviting those 'opposing' and 'supporting' a development from the local community to speak at the start and end of the meeting, ensuring that those attending on behalf of the developer have sufficient seniority and knowledge to provide informed and authoritative responses.

Example:

The Department of Energy and Climate Change, when consulting local communities on possible locations for new nuclear power stations, used an independent facilitator to help run the public meetings. Senior civil servants were also present and at Kirksanton, a community representative was invited to give the opening and closing comments. Effort was made to ensure people had their say and the meetings were generally felt to have been informative.

Question:

Can I use the internet for consultation and if so, do I still need to do exhibitions and community events?

Answer:

The internet is a useful tool to engage with busy people, and those who may not be able to get to exhibitions or events. The technology developed for web-based consultation can also be used at exhibitions and events e.g. fly-throughs and 3D visualisations. It can however, only reach those who have internet access. For the 'hard to reach' and those living in rural areas, access to the internet and / or broadband may be an issue. Schools, libraries and community centres often have web access where help is available to access the online consultation. Good monitoring of the website can help identify areas, groups who are under-represented in a consultation and allow other activities to be targeted to ensure inclusive engagement.

Example:

A 3D virtual model was developed for the Ancoats Urban Village, Manchester. The model is accessible through the web so members of the public could see how Ancoats would look with the development proposals inserted. The use of gaming technology shows proposals in context and from every different angle. It also allows users to walk, drive or fly around the model without the need to purchase additional software. Being portable and transferable onto a big screen, the model is being used to assist consideration by councillors at planning committee and also with other consultation exercises with residents.

"The RTPI fully supports the principles in this useful guide and is committed to better public engagement. Better engagement creates better developments and better places for everyone."

Ann Skippers, Past President of the RTPI.

"Effective consultation of local people is often a rarity, and the greater the pressures for development, the greater the temptation to cut corners and ignore the public's views. However this guide will help everyone to raise their game and meet the challenges of effective and inclusive engagement."

Rhion Jones, Consultation Institute.

"As an organisation committed to promoting and improving public participation in local and national decision-making across the world, IAP2 welcome the introduction of this helpful and insightful guide."

Nicky Leggatt, IAP2 UK Chair.

"IEMA welcomes this guidance, as effective public engagement brings benefits to all concerned helping to identify the issues, explore solutions, improve proposals and support better decision making."

Jan Chmiel, CEO, IEMA.

"Paying lip service to community consultation is no longer enough. Engaging with communities is crucial to capture local opinion, resolve issues and ultimately deliver quicker and better development schemes. We therefore welcome this Guide and the advice it contains."

Jeremy Handel, Director, Political Developments Ltd.

"Raising public awareness and understanding of issues such as the need for new infrastructure to meet national and local needs, economic development, environmental constraints, climate change mitigation are key to securing balanced responses."

Jon Lord, Development Plans Manager, Tamworth Borough Council.

Revised January 2014

Development Management Practice Project Practice Note PRE PLANNING APPLICATION CONSULTATION BEST PRACTICE

1 INTRODUCTION

1.1 There are good examples of best practice in pre application discussions on major planning application proposals involving local communities. Widespread pre application discussion on major schemes takes place where the local authority has adequate resources to provide this service and this approach is supported by the development industry and local authorities.

1.2 The proposed Development Management policy consultation issued by government at the beginning of 2010 (but overtaken by the NPPF) stressed the benefits of effective pre application discussions for communities, councils and developers. Councillors were encouraged to be involved with discussions to act as champions of their communities without prejudicing their role as decision makers on planning applications when submitted. Councils and other service providers were encouraged to provide for and become fully involved in pre application discussions on major proposals and to provide enough resources for such discussions.

1.3 The NPPF states:

“188. Early engagement has significant potential to improve the efficiency and effectiveness of the planning application system for all parties. Good quality pre-application discussion enables better coordination between public and private resources and improved outcomes for the community.

189. Local planning authorities have a key role to play in encouraging other parties to take maximum advantage of the pre-application stage. They cannot require that a developer engages with them before submitting a planning application, but they should encourage take-up of any pre-application services they do offer. They should also, where they think this would be beneficial, encourage any applicants who are not already required to do so by law to engage with the local community before submitting their applications.

190. The more issues that can be resolved at pre-application stage, the greater the benefits. For their role in the planning system to be effective and positive, statutory planning consultees will need to take the same early, pro-active approach, and provide advice in a timely manner throughout the development process. This assists local planning authorities in issuing timely decisions, helping to ensure that applicants do not experience unnecessary delays and costs.

191. The participation of other consenting bodies in pre-application discussions should enable early consideration of all the fundamental issues relating to whether a particular development will be acceptable in principle, even where other consents relating to how a development is built or operated are needed at a later stage. Wherever possible, parallel processing of other consents should be encouraged to help speed up the process and resolve any issues as early as possible.”

1.4 January 2014 National Planning Policy Guidance states:

“Pre-application engagement by prospective applicants offers significant potential to improve both the efficiency and effectiveness of the planning application system. This can be achieved by:

- *providing an understanding of the relevant planning policies and other material considerations associated with a proposed development*
- *working collaboratively and openly with interested parties at an early stage to identify, understand and seek to resolve issues associated with a proposed development*

- *discussing the possible mitigation of the impact of a proposed development*
- *identifying the information required to accompany a formal planning application, thus reducing the likelihood of delays at the validation stage. The information requested must be reasonable (more information can be found in [Making an Application](#)).*

The approach to pre-application engagement needs to be tailored to the nature of the proposed development and the issues to be addressed.”

1.5 NPPG advises that parties to pre-application engagement is “a collaborative process between a prospective applicant and other parties which may include:

- *the local planning authority*
- *statutory and non-statutory consultees*
- *elected members*
- *local people*

It is recognised that the parties involved at the pre-application stage will vary on a case by case basis, and the level of engagement needs to be proportionate to the nature and scale of a proposed development. Each party involved has an important role to play in ensuring the efficiency and effectiveness of pre-application engagement.”

1.6 In respect of elected members roles the NPPG further explains that elected members are strongly encouraged to participate at the pre-application stage, where it is appropriate and beneficial for them to do so.

1.6 The NPPG continues; “*Pre-application engagement with the community is encouraged where it will add value to the process and the outcome. The Government has announced its intention to introduce **compulsory** pre-application consultation with local communities for more significant onshore wind development. Cases to which this requirement applies will be specified in secondary legislation in due course.*” The Localism Act 2011 has provision for other types of major development to also be subject to compulsory pre application consultation by order.

1.7 There is no one-size fits all approach to providing efficient and effective pre-application services. Local planning authorities are encouraged to take a flexible, tailored and timely approach to the pre-application services they offer, which are appropriate to the nature and scale of a proposed development. The National Planning Policy Framework recognises that the local planning authority has a key role to play in encouraging other parties to take maximum advantage of the pre-application stage.

1.8 This note summarises examples of such collaborative approaches involving local communities, local authorities, public service providers and developers.

2 PRE APPLICATION DISCUSSIONS

2.1 Some Councils encourage their officers to advise on relevant planning policies and precedents, but without any wider consultation with local communities or elected members until a planning application is submitted. This avoids unproductive involvement for communities and councillors when no planning application is submitted.

2.2 However, there is a risk that issues will not arise until after the planning application has been submitted, causing delay and additional costs for the applicant, and a missed opportunity for the community, which might have been avoided with a more collaborative approach.

2.3 LGA probity in planning guidance 2013 and the Killian Pretty review suggested that for major applications it is good practice to involve communities and local councillors in consultation, without prejudicing the position of councillors who have to decide any subsequent planning application.

2.4 A list of the web sites of councils who previously developed good practice in pre application discussions is given at the end of this note. However not all have been able to maintain these services. Since the original version of this note was prepared in 2008 public sector cutbacks have forced many authorities to prioritise and reduce their service to deal only with statutory duties. Some statutory consultees have also had difficulties responding to pre application engagement requests. In most respects pre application discussions are not a statutory duty. However the experiences gained and potential benefits are included below to assist others.

2.5 The following examples are highlighted:

Chorley Borough Council encouraged developers to have a pre application briefing with councillors on large schemes, to seek to ensure all matters of concern and opportunity have been considered, before a planning application is submitted. However the opportunity was only after a developer has carried out pre application community consultation in accordance with the council's statement of community involvement for such schemes, and the developer is required to report on the outcomes of that consultation and of how the issues raised have been addressed in any revised scheme.

This approach ensures the council is aware of the community's views and the developer's response before any pre application meeting with councillors. Any such meeting is held in accordance with an agreed protocol to ensure that councillors on a planning decision making committee do not pre determine or bias their positions when a formal application is determined.

Waverley Borough Council developed a comprehensive approach to community pre-application discussions. For larger sites it uses public planning forums to structure an opportunity for all those who have an interest in a proposed development to be engaged in an open discussion. The forums are part of a range of pre application advice for which the authority charges. Waverley had used the forums for over 20 major developments since 2005. Waverley planning forums create a means by which councillors and the community could be kept informed and identify issues without risk of councillors pre determining their decisions. The council arranged a forum on an emerging proposal, and the chair of the planning committee explained councillors' roles at the start of a forum meeting. The chairman also ensured all interested bodies were able to explain their views through their spokesperson. The forums were publicised and were public meetings shown on the Council's webcam. A scheme at Dunsford Park attracted over 50,000 visits to the web site.

Wycombe District Council has a development forum as part of its range of pre-application discussions. It is similar to Waverley's approach with developers encouraged to engage with the local community in accordance with a protocol and the statement of community involvement. However the onus is on the developer rather than the council to arrange the community consultation and forum. Council officers and members attend the forum, but as the Council is not chairing the forum, individual planning committee councillors have to preface their remarks by explaining that they will not be expressing a view until any subsequent application is submitted.

Ashford Borough and *West Dorset Councils* have used the Prince's Foundation "enquiry by design" approach for pre application consultation on major urban extensions. They participated with the developer and community in design workshops and consensus building techniques to engage the community in deciding on the kind of development they wanted to see.

2.5 To date, authorities have borne the costs of these exercises or agreed with developers their absorbing the cost. The costs are significant and are not covered by planning fees which may explain why more authorities have not followed these examples. However section 93 of the Local Government Act 2003 allows local authorities to charge for such discretionary services and a significant number do charge.

3 ADVANCE PLANNING

3.1 To engage communities as effectively as possible timely preparation of planning briefs and master plans has proved very effective.

- The preparation of a brief or masterplan, with close working between the Proposer, local authority and community, enables consideration to be given to all the issues including sensitivities and opportunities particular to the locality. The landowner/developer would be a key participant in creating the master plan or brief.
- Planning briefs and masterplans are adaptable to meet different kinds of development opportunity and community engagement needs and preferences, and enable the full participation of ward and parish councillors, strengthening local democratic working and understanding.
- Carefully prepared masterplans and briefs, embodying best practice in urban design, will improve the quality of any resultant development, encourage more ownership on the part of local communities, and lead to a better understanding of the changing planning process by local communities.

3.2 A masterplan or brief prepared to meet the requirements of the local Statement of Community Involvement and with the collaboration of the local community, would define what was sustainable development, in the context of a community's needs and constraints, and should acquire the material weight and authority of a Development Plan Document

4 CONCLUSIONS

4.1 However detailed the Local Plan proposal for sustainable development of major sites, there will still be issues benefiting from discussion with local communities prior to the submission of a planning application.

4.2 It would be helpful if the duty to cooperate between local planning authorities and other public service bodies were extended explicitly to developers of major proposals. The duty for public service bodies to engage in pre application discussions could ensure that those consultees currently unwilling to adopt a collaborative approach refocused their resources on this need. Council's Statements of Community Involvement can then ensure that local communities are fully involved in pre application discussions. This duty to engage should include master planning or development briefs, including where there is no local plan framework to ensure community engagement in sustainable development.

Guidelines on Effective Community Involvement and Consultation

RTPI Good Practice Note 1

About these Guidelines

Professionals in all manner of disciplines are having to come to terms with the intricacies of consultation and effective community involvement.

In the case of planners and those in allied activities, recent legislation adds new obligations to existing, long standing commitments to public participation, and accordingly planning authorities in England are working on Statements of Community Involvement (SCIs). In Wales a similar document is being prepared under the title Community Involvement Scheme (CISs) and in Scotland the issues are being considered in the White Paper, Modernising the Planning System. Specific advice and guidance on the preparation of these documents is available from a variety of sources.

These Guidelines serve a wider purpose. They are intended to provide RTPI members with a corps of *best practice* guidance on key aspects of community involvement, in an easy to absorb format and capable of being amended and updated in the light of experience.

By working alongside The Consultation Institute, the RTPI has sought to leverage its knowledge of *best practice* in those many disciplines where public and stakeholder consultation is well established. It must be remembered that planners are not alone in seeking wider community involvement in the decision-making process, and that stakeholders are right to demand improved co-ordination and consistency between the various public bodies and functions who wish to hear their views.

These 22 Guidelines contain detailed advice under three generic headings – Public Involvement Issues, Enablers and Consultation Standards.

Comments and suggested improvements will be welcome and should be addressed to policy@rtpi.org.uk.

RTPI

mediation of space · making of place

Introduction

One of the difficulties in coming to terms with the changes in culture and behaviour that is demanded of the planning profession is that some of the popular concepts of community involvement are still misunderstood by many people, both lay and professional.

In particular, it is important to be clear as to where ultimate responsibility lies for taking decisions on development plans and for processing planning applications. Whilst formal consultation will necessarily be required as part of effective processes in these contexts, there is scope for wider public participation in certain circumstances.

Both the Government, and the RTPI are keen to encourage this broader view of public engagement, but practitioners may need help to crystallise the concepts and make them meaningful in practice. For this reason, Guideline 1 on the use of terminology assumes a special significance.

It is also important to recognise the continuing and pivotal role of consultation in the new planning environment. Despite the growing popularity of interactions where decision-making and operational activities are shared between the parties, development plans and key planning decisions are ultimately taken by accountable bodies which bear the full responsibility for those decisions.

Effective consultation enables such decisions and plans to be approved in the knowledge that stakeholders and the public generally have had a full opportunity to express their views and make representations in a genuine and transparent dialogue. What has been absent in the past is a sufficiently robust framework of guidance so that planning authorities and others recognise if, and whether they are doing the job properly.

To help in this, in Category Three (Guidelines 16-22) we have followed the seven principles of, “The Consultation Charter”. Since its original publication by The Consultation Institute in 2003, this has received widespread acceptance and forms a solid basis for measuring compliance with best practice in this area.

These Guidelines exist alongside other sources of guidance and assistance. The resources available on www.communityplanning.net include details of many organisations and contacts active in the subject of community involvement, and interested practitioners are urged to follow developments closely in what is a fascinating and rapidly evolving worldwide activity.

The Guidelines

Category One - Public Involvement Issues

1. Using Terminology with Precision	4
2. Community Engagement – Building Relationships.	5
3. Community Involvement and Consultation Objectives	6
4. Best Value and Consultation.	7
5. Consultation with Hard-to-Reach Groups	8
6. Avoiding Consultation Fatigue	9
7. Setting Stakeholder Expectations	10
8. Joined-Up Consultation	11

Category Two - Enablers

9. Selecting Appropriate Dialogue Methods	12
10. New Technology and e-consultation	13
11. Capacity Building for Consultation.	14
12. Resources and Budgets	15
13. Effective Roles for Elected Members.	16
14. Working with Representative Bodies.	17
15. Training for Better Engagement and Consultation	18

Category Three - Standards

(based on *The Consultation Charter*¹)

16. Integrity	19
17. Visibility	20
18. Accessibility.	21
19. Confidentiality	22
20. Full Disclosure.	23
21. Fair Interpretation	24
22. Publication	25

¹ For a full explanation of The Consultation Charter, see www.consultationinstitute.org

No 1 Using Terminology with Precision

The Issue

Much of the terminology used in the recent legislation and associated guidance refers to various kinds of public participation, and it is sometimes difficult to discern the precise intention behind the use of different terms. Superficially, words such as engagement, participation, involvement and even consultation appear almost interchangeable.

In reality, they are different, and for those working at the practical implementation of these concepts, it is important to understand the precise meaning and usage of each term.

The use of standard definitions will, in time, help professionals to communicate with each other with fewer misunderstandings. More significantly, it should encourage greater consistency in communications with the general public and the stakeholder base.

The RTPI Recommends

■ Public (or Community) Involvement

Effective interactions between planners, decision-makers, individual and representative stakeholders to identify issues and exchange views on a continuous basis;

■ Participation

The extent and nature of activities undertaken by those who take part in public or community involvement;

■ Public (or Community) Engagement

Actions and processes taken or undertaken to establish effective relationships with individuals or groups so that more specific interactions can then take place;

■ Consultation

The dynamic process of dialogue between individuals or groups, based upon a genuine exchange of views, and normally with the objective of influencing decisions, policies or programmes of action.

No 2 Community Engagement and Building Relationships

The Issue

The phrase “community engagement” causes considerable confusion for it is often used as an umbrella term to cover the whole range of public involvement and consultation. In fact it has a more precise meaning, and refers to those actions and processes which take place to establish an effective relationship with individual and organisational stakeholders.

This phase is critical, as the future conduct of consultations and other forms of interaction depend upon the nature of the relationship, and the expectations set at the beginning. From time to time, it is necessary to re-engage with those who have ceased to participate, and on every occasion, the basis of trust between the parties is of paramount importance.

It is especially important to ensure engagement with hard-to-reach and other community groups which have traditionally been neglected.

The RTPI Recommends

- Setting clear objectives for community engagement, recognising which sections of society already have a satisfactory basis for public participation, and where greater efforts are needed to engage successfully with specific groups;
- Understanding the key drivers and motivations of groups targeted for community engagement, and devising engagement strategies that recognise the unique and diverse characteristics of such groups;
- Measuring success in community engagement by evaluating the quality and quantity of subsequent interactions, and by periodically reviewing the relationship to determine whether further actions are necessary to engage more fully with all strands of opinion within a defined group;
- Allocating clear responsibility for engaging with particular groups, leveraging historic or issue specific specialist know how, and avoiding disruption of existing long term relations with inherited trust.

No 3 Community Involvement and Consultation Objectives

The Issue

Many forms of public involvement and participation suffer from a confusion of objectives. Whilst some processes can accommodate such vagueness, it is important to have a clearer view of the more formal stages such as a public consultation. Successful consultations depend upon a clear, shared understanding of their objectives.

Because consultation objectives can vary widely, and the outputs used for a wide variety of purposes, it is often tempting to adopt too wide a set of objectives.

But as the consultation objectives should also largely influence the choice of methods, the style of the consultation and the post consultation actions, it is important to focus on key objectives.

Isolating key objectives from peripheral benefits of the consultation process will help those planning public engagement exercises and assist in creating the right expectations.

The RTPI Recommends

- That every consultation exercise possesses a clear mandate which explains the aims of the consultation;
- Identifying precisely *who* are the decision-makers or *which* is the organisation to be informed by the consultation, and the purpose for which they will use the information and opinions gathered in the process;
- Acting in accordance with an approved Statement of Community Involvement² (SCI) to ensure consistency of approach;
- Developing a standard format for such mandates and ensuring consistency with other consultations undertaken in other departments of the authority, so that stakeholders' understanding is assisted;
- If a consultation is restricted to a closed list of alternative options, this should be made clear;
- If a consultation welcomes new ideas and alternatives to the proposals published for consultation, then this should also be made clear.

² Statements of Community Involvement are a requirement under the Planning and Compulsory Purchase Act 2004; in Wales the equivalent document is called a Community Involvement Scheme (CIS)

No 4 Best Value and Consultation

The Issue

The concept of *Best Value* obliges public bodies to review at regular intervals, whether their methods of delivering services or undertaking essential tasks meet the criteria of economy, efficiency and effectiveness.

As public engagement activities in general, and consultation in particular are resource intensive and are likely to involve increasing amounts of public money, it is appropriate that local planning authorities (LPAs) adopt a *Best Value* approach to their policies and their options for implementing them.

This means finding ways to observe the standard tests of Challenge, Comparison, Consultation and Competition in determining the ways in which to undertake public engagement.

The RTPI Recommends

- That LPAs should incorporate the *Best Value* tests into their Statement of Community Involvement (SCIs) or Community Involvement Schemes (CISs);
- Setting challenging targets for operational aspects of public engagement (e.g. advance notice to key stakeholders on time between closing date for consultation submissions and publication of output feedback);
- Establishing relationships with comparable authorities to exchange information for benchmarking purposes;
- Conducting a formal dialogue with stakeholders at least once a year to discover their perceptions of the consultation and public participation processes;
- Periodically seeking information about the likely costs and benefits of using third party or partnership based suppliers of specialist consultation related services;
- Discussing with *Planning Aid*³ appropriate ways to undertake a *Best Value* review of community involvement.

³ Planning Aid provides free, independent and professional advice and support on planning issues to people and communities who cannot afford to hire a planning consultant. See www.planningaid.rtpi.org.uk

No 5 Consultation with Hard-to-Reach Groups

The Issue

The social inclusion agenda has identified the need to redress the balance of public involvement and to make greater efforts to hear the views of people and groups that have been traditionally under represented.

The planning system can be inaccessible to such interest groups, and local planning departments may have limited experience of the particular skills and techniques of engaging with them.

Many *hard-to-reach* groups have a limited capacity for involvement and are facing engagement initiatives from several quarters. Making progress in this area therefore requires high levels of co-ordination with other local authority departments and strong working relationships with equality and diversity (where these exist) units or their equivalents.

The RTPI Recommends

- Working from an authority wide database of groups and organisations. Avoid the temptation to compile yet another list of target organisations;
- Identifying and leveraging existing authority relationships whenever possible;
- Avoiding a tick-box approach to the *hard-to-reach*. Engage them in dialogues which are significant and especially when they have specific interests;
- Taking account of *best practice* for the provision of special facilities required by disabled and other disadvantaged groups at public meetings, events or via e-consultation⁴ etc;
- Identifying issues and policies that are likely to be of particular concern and interest to specific *hard-to-reach* groups, or those in particular areas; addressing these on a one-to-one basis wherever possible;
- Encourage private sector developers and commercial interests to consider the *hard-to-reach* when responding to plans or making applications.

⁴ See the emerging Disability Equality Duty which comes into force in December 2006; see the Disability Rights Commission for details: www.drc-gb.org

No 6 Avoiding Consultation Fatigue

The Issue

The same people are being consulted, and the volume is such that many organisations are now complaining of consultation fatigue. Voluntary and community bodies, many of whom have limited resources are particularly badly affected.

The general public, on the other hand, appears not to have reached this saturation point, and appears ready and willing to engage with public bodies provided the subject matter is sufficiently relevant, and the public is approached in a professional and honest way.

In both cases, groups and individuals have a limited capacity for involvement. Good use must be made of their time, and results must be demonstrable if they are to continue to be motivated to participate.

The RTPI Recommends

- Engaging with key stakeholder groups well ahead of any formal consultation. Use this to reach a consensus on the form and methods of consultation, and its timing;
- Developing a *consultation programme* covering at least a year ahead, and publishing a *consultation calendar* so that key stakeholder organisation can prioritise and plan their involvement with an authority;
- Integrating the spatial dimension into consultations organised by other departments and other public services; ensuring better co-ordination with other departments and other agencies (see Guideline 7);
- Inviting groups with limited resources to identify those aspects upon which they wish to focus, and help them channel their activity to fewer, more relevant actions;
- Finding easy ways for some groups to participate (e.g. *e-consultation* tools and wider use of e-mail and SMS text messaging);
- Developing thematic or geographic panels of people or representatives able to devote time and willing to offer views and opinions;
- Using up to date stakeholder data from a single stakeholder database. Avoid obsolete or inaccurate lists.

No 7 Setting Stakeholder Expectations

The Issue

Making a success of public participation depends upon setting the right expectations.

The process of determining between competing interests will inevitably disappoint some stakeholders, so it is in everyone's interest that individuals and organisations understand how various processes work, and what they can expect from their operation.

Great care is needed in balancing the need to motivate participants so as to secure their involvement, and the need for them to have realistic expectations.

The RTPI Recommends

- That planners take every opportunity to explain that public consultation findings and individual objections are only *part* of the evidence base upon which decisions are taken;
- Building long-term relationships with key stakeholder⁵ organisations and their members so that they become more familiar with public engagement processes and are realistic about them;
- Using local authorities emerging role of community leadership to involve stakeholders more systematically and help them understand how the planning process works;
- Using Statements of Community Involvement (SCIs or CISs) judiciously by drafting them to avoid speculative or unrealistic commitments, by publicising them appropriately and by ensuring they are supported by adequate budget and capacity;
- Training all front line planning staff in the need to communicate the limitations as well as the potential of planning processes and the need for *realism* at all points in discussions with stakeholders and the public;
- Restricting the use of jargon and observing *Plain English*⁶ standards in documents.

⁵ *Key stakeholders* are organisations selected on the basis of their interest in relevant outcomes, and their history of participation and engagement.

⁶ See the Plain English campaign and its Crystal Mark scheme - <http://www.plainenglish.co.uk/> A Welsh language equivalent is now available - Plain Welsh or Cyntraeg Clir.

No 8 Joined-Up Consultations

The Issue

Stakeholders complain that many consultation and other public participation exercises duplicate each other or seek views about similar or overlapping issues, albeit in different contexts.

Given the multi-disciplinary nature of so much planning work, it is inevitable that there is a risk that community involvement will be seen on occasions to cover similar subjects to those covered by other consultations.

Many stakeholders, especially those with good, long standing relationships with an authority will understand the different roles played by different consultation exercises. They may also appreciate that public bodies have to satisfy different statutory requirements and have to proceed with parallel engagement activities. But they are less tolerant of avoidable proliferation of work from autonomous departments within the same authority, and increasingly look for a co-ordinated approach.

The RTPI Recommends

- Ensuring that planning consultations are fully integrated into an authorities' overall strategy for community involvement and/or consultation;
- Assisting other departments and agencies to include the spatial dimension in their consultations;
- Establishing a mechanism to approve all formal consultations undertaken in the name of the local authority, and acting as a clearing house to co-ordinate similar or overlapping exercises;
- Working with other public agencies through Local Strategic Partnerships (LSPs) or similar mechanisms to exchange information about planned consultations and to co-ordinate as much as possible;
- Inviting relevant public bodies seeking similar feedback from citizens or stakeholder groups, to participate or attend key public engagement events;
- Drafting appropriate data protection clauses for use in consultation exercises to enable relevant external organisations to share access to the outputs of specific consultations.

No 9 Selecting Appropriate Dialogue Methods

The Issue

There are over 40 documented methods of community involvement with ample scope for innovation and a steady supply of imaginative consultants offering ever more sophisticated techniques.⁷

The choice of methods has traditionally been largely a product of custom and practice, and the availability of skills and relevant experience. With the advent of SCIs and CIs, and with greater emphasis on front end involvement and consensus building, planning authorities will need to be more consistent in their methods.

In particular, they will need to consider the most appropriate ways to engage with specific stakeholder groups at various stages of the plan preparation process. In common with other departments undertaking consultation, planning staff will need to understand the stakeholder base better so that the methods they use achieve the goal of better and deeper engagement.

The RTPI Recommends

- Carefully selecting a range of methods and ensuring that trained staff (either within planning departments or available for use by planning departments) can implement these techniques to agreed standards;
- Exploiting new technology - *e-consultation*, particularly for groups with high online access (e.g. young people or businesses) and statutory consultees;
- Building and deploying skills and capability in mediation, consensus building and negotiation to complement skills in formal consultation processes;
- Using specialist techniques for public engagement and involvement in planning environments; making use of *Planning Aid* to supplement in house resources;
- Maintaining an appropriate balance between qualitative techniques (e.g. focus groups or stakeholder conferences) and quantitative methods (e.g. surveys). Look for methods which people find enjoyable!
- Reducing the reliance on documentary (i.e. written) consultation and place increasing emphasis on participative methods where literacy standards are less of a barrier to participation.

No 10 New Technology and e-consultation

The Issue

The Government's 2005 target required local authorities and other public bodies to e-enable all services and make them available online. This includes all aspects of planning and also public engagement and consultation.

Many authorities have already invested in such a facility and others are experimenting. Usage by the public is still slow, but initiatives such as the National Projects for Local e-democracy⁸ and PARSOL⁹ are developing new ways to increase take up. Whilst public reaction is still uncertain, commentators expect that cost and speed advantages will stimulate wider use of specific applications in the coming years.

Among applications of particular relevance to planners are online consultation directories, e-surveys, online commentaries, e-discussion forums and vip-chat sessions. In addition stakeholder portals will be developed to enable consultees to register for participation in particular consultations.

The RTPI Recommends

- Building awareness of available new technology applications, and working alongside internal and external information and communications technology (ICT) specialists to understand the channel better;
- Finding ways to work with other departments and to share the costs of buying, configuring, deploying and supporting specialist *e-consultation* tools;
- Training *e-discussion* forum *moderators* and publishing clear rules of engagement before deploying such applications;
- Ensuring that the use of *e-consultation* is never such as to exclude those without digital access from participating in specific consultations;
- Publicising the use of *e-consultation* methods so as to increase public and stakeholder awareness and maximise take up of the channel.

⁸ See a full list of the e-government National Projects in www.localgovnp.org

⁹ Planning and Regulatory Services Online see www.parsol.gov.uk

No 11 Stakeholder Capacity-Building for Public Participation

The Issue

Many of those whose views are most critical for local authorities and other public bodies to understand are relatively less capable of expressing themselves. This situation is not confined to hard-to-reach groups, but they are often among those most inexperienced in responding to consultations.

Whilst part of the solution is to use methods which are more appropriate to such groups, there will still be an increasing need to help them understand community involvement processes and to participate to optimum effect.

Capacity building takes time and costs money, but results in a more inclusive dialogue. By hearing a wider range of opinions, planning can take account of issues and perceptions which have hitherto been relatively neglected.

The RTPI Recommends

- Identifying groups or categories requiring special assistance. Note these are not always *hard-to-reach*!
- Investigating precise requirements on a systematic basis; even handed treatment of stakeholder groups (some of them with opposing views) is essential to avoid suggestions of bias;
- Developing effective training or mentoring both to explain public engagement processes and to motivate groups to wish to participate, but also to provide groups with skills, capability or organisation required to respond and become fully involved;
- Convincing target groups that capacity building is a two way process with advantages for all concerned (e.g. planners learn more about community needs and community groups learn more about planning);
- Budgeting to provide assistance for voluntary and community groups; to fund meetings, facilitate child care or transport and associated costs;
- Working with other departments within a local authority and externally with other relevant public bodies to ensure a consistent approach to capacity building.

No 12 Resources and Budgets

The Issue

The new emphasis on community involvement will require substantial investment in building and deploying the skills of public engagement and consultation.

Part of the rationale is the belief that a bigger effort made in the early stages of the planning cycle (e.g. the preparation of LDF documents) will result in savings later on. Whilst many experienced planners acknowledge this in principle, the lengthy time scales involved and the fear that wider participation may increase costs throughout the cycle, prompts a degree of caution with many planning departments anxious to avoid unrealistic expectations from the new regime.

This makes it even more critical for all concerned to take a fresh look at resource allocation and to make judgements about relative priorities. At all costs, planners must avoid commitments to public engagement that cannot or will not be funded.

The RTPI Recommends

- Statements of Community Involvement (SCIs and CISs) should be costed and an estimated budget calculated for at least three years ahead;
- Discussions with other departments (e.g. communications, marketing etc) using similar methods and committing to comparable projects to investigate cost sharing;
- Optimising the use of specialist public engagement and consultation skills by developing centralised services where appropriate;
- Making use of *Planning Aid* or specialist external consultants and other facilities when economic;
- Seeking opportunities to pass some of the relevant costs of consultation to private sector planning applicants where the exercises are directly related to specific major applications.

No 13 Effective Roles for Elected Members

The Issue

Elected members play an important part in taking decisions about community priorities and in approving or rejecting development applications. In practice however, many Councillors have questioned the value of lengthy consultation phases in the traditional development of local plans.

However, as the role of local authorities evolves towards that of community leadership, Councillors will probably play an even more active part in community involvement and in facilitating the transmission and interpretation of their constituents' views. There is an inherent tension between representative democracy and consultative democracy, and some local politicians will fear that wider consultation undermines their electoral mandates.

Developing an effective role for elected members therefore requires an understanding of these tensions and a search for complementary rather than competing activities.

The RTPI Recommends

- Involving Councillors fully in the preparation of Statements of Community Involvement (SCIs or CISs) and including within them, references to the role which members will play;
- Encouraging Councillors to play an active part in area committees and neighbourhood forums so as to help the local community to articulate its views;
- Discussing with Councillors the most appropriate methods for public involvement for their wards and for the authority as a whole;
- Provide awareness training for elected members on the most frequently used consultation techniques, and particularly how to interpret the results;
- Encouraging Members to attend selected consultation events (e.g. focus groups) as observers;
- Submitting the detailed outputs of key consultations to scrutiny committees.

No 14 Working with Representative Groups

The Issue

Civic society includes thousands of representative bodies and community associations of some kind or another.

Sometimes they exist as long-term, institutionalised bodies representing the interests of defined groups or professions. On other occasions they are transitory pressure groups springing up to campaign for or against specific proposals and mobilising grassroots opinion to participate in the many ways that a democracy allows.

Planners already deal with both types of stakeholders, but will now need to strengthen their capabilities in the context of community involvement. Building excellent relationships with representative groups is a high priority for all public bodies, but is particularly important if planners are to carry communities with them in the interests of sustainable development.

The RTPI Recommends

- Working alongside other departments and other agencies to build and maintain an accurate database of representative groups as part of a single stakeholder database;
- Gathering sufficient information about groups so as to identify which may need to be regarded as key stakeholders. Make a judgement as to how representative they are in reality!
- Exploring the links between various representative groups. Remember that many opinion leaders operate through several different bodies;
- Keeping detailed records of all interactions with representative groups. Consider an ICT solution (contact management for a simple application; CRM¹⁰ for a comprehensive one);
- Understanding how key representative groups determine their positions on key issues in a consultation dialogue;
- Identifying when representative groups need assistance to consider proposals or to participate fully in dialogue; offer capacity building initiatives where appropriate.

¹⁰ CRM means Customer Relationship Management and is the basis for most local authority investment in contact centres and one-stop-shop initiatives.

No 15 Training for Better Engagement and Consultation

The Issue

Although it has always been necessary to familiarise planning staff with the rudiments of consultation and associated processes, much of this learning has been on the job with few formal training opportunities.

In recent years, the body of expertise has grown in this area, and studies leading to the new planning legislation have assembled sufficient best practice to enable the development of training materials and courses on community involvement principles and techniques.

The recent creation of the Academy for Sustainable Communities¹¹ and initiatives by the RTPI and others will increase the availability of training, but the onus still remains on planning departments to identify and address their own specific training needs.

The RTPI Recommends

- Using the process of preparing and securing support for Statements of Community Involvement (SCIs or CISs) to analyse existing and emerging training needs;
- Collaborating with other departments and public bodies to identify parallel requirements and to share the cost of training provision. Help other service providers understand the spatial dimension of their work;
- Establishing internal self help learning and skills transfer networks so as to disseminate best practice faster;
- Placing a focus on skills required beyond formal consultation processes in particular:
 - stakeholder profiling and mapping • stakeholder relationship management
 - consensus building • mediation • conflict resolution • negotiation
- Looking for opportunities to undertake joint training alongside Elected Members and also alongside key stakeholders, as a confidence building measure.

No 16 Standards for Consultation - Integrity

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The first Charter principle is **Integrity** and this means ensuring that the consultation has an honest intent. Whilst it is always open for local authorities to engage with stakeholders at any stage in the development of plans and policies, a formal consultation should not be undertaken if the decision has already been taken.

Great care is needed in scoping consultations properly and in providing the clearest possible indication of those matters where the consultor has discretion and is open to be influenced by the submissions and contributions made by those who respond.

The RTPI Recommends

- Authorities should emphasise their commitment to this principle in their Statements of Community Involvement (SCIs) or Community Involvement Schemes (CISs);
- Avoiding spurious consultation exercises where there is no scope to act upon consultee responses;
- Developing strong relationships with stakeholder organisations, based upon trust that their time and commitment will not be wasted on unnecessary consultations;
- Demonstrating how public and stakeholder views have been taken into account in previous engagement exercises;
- Using pre-consultation dialogues to discuss fully with potential consultees, how forthcoming involvement can be best used.

No 17 Standards for Consultation - Visibility

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The second Charter principle is **Visibility** and this means that those most directly affected by plans and decisions have a reasonable awareness of such community involvement processes as will take place.

The onus is on consultors to ensure that this visibility is achieved, and that communications with identified stakeholders are such as to create a high level of awareness, particularly of formal consultations, highlighting the ways in which citizens and others can participate.

The RTPI Recommends

- Identifying the best methods of communicating with each stakeholder type;
- Ensuring maximum promotion for each individual consultation as well as the overall programme of community engagement and involvement;
- Engaging with key stakeholders and/or their representative groups in advance of specific consultations to provide them with adequate advance warning, and to seek their views on the most effective means of publicity;
- Publishing a comprehensive consultation calendar;
- Liaison with other local authority departments undertaking consultation and public involvement to reduce the likelihood of overlapping or duplicated exercises and thereby eliminate confusion.

No 18 Standards for Consultation - Accessibility

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The third Charter principle is **Accessibility** and this refers to the ease with which potential participants can avail themselves of the opportunity. It means being aware of the greater propensity of some groups to respond to particular methods, and the barriers facing others.

Engaging with the disabled, racial, ethnic, linguistic or religious minorities all require special facilities, and ensuring equal access to the process for such groups is essential.

The RTPI Recommends

- Subjecting all consultation plans to the test of whether proposed methods will be accessible to the target audiences;
- Training all those involved with public engagement processes in *best practice* for meeting the needs of identified groups with difficulties;
- Ensuring that planning departments are involved in the production of Disability Equality Schemes;
- Discussing proposed involvement methods with key stakeholders at the pre-consultation stage to identify unforeseen difficulties;
- Using jargon free language when producing documents intended for non-professionals; observing Plain English and Plain Welsh standards (e.g. Crystal Mark scheme);
- Translating documents into other languages when this is necessary to fully engage specific linguistic communities, and following dialogue with their representative groups.

No 19 Standards for Consultation - Confidentiality and Transparency

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The fourth Charter principle is **Confidentiality**, but the real issue is **Transparency**. There are occasions where stakeholder views are properly subject to confidentiality, but in the public sector, the Freedom of Information Act makes those circumstances few and far between.

Commercial undertakings and private individuals may be able to agree with planning authorities that aspects of their discussions may be confidential, but all parties need to be increasingly aware of the need to satisfy a public interest test.

The RTPI Recommends

- Encouraging a culture of maximum transparency, whilst observing the spirit and letter of data protection and freedom of information legislation;
- Advising participants in community involvement exercises on the presumption of transparency, and the duty on local authorities to make documents and information held by them available if requested under the Freedom of Information Act¹²;
- Providing a clear reference to the Act in surveys, questionnaires, documents and other materials used as dialogue methods to elicit the views of stakeholders;
- Drafting consultation documents and other materials used in community involvement processes with the citizen's right to know in mind; providing specific authority for statements and assumptions made with clear signposts for citizens to consult referenced sources;
- Providing a clear audit trail of analyses and recommendations so that the influence of consultations upon decisions can be followed.

No 20 Standards for Consultation - Full Disclosure

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The fifth Charter principle is **Disclosure** and requires both consultors and consultees to be totally open with each other and not to conceal or withhold information which might be relevant to the dialogue.

Relevance is a difficult test to apply, but can be viewed as depending upon the view that one party to a discussion might reasonably take to the information's non-disclosure by the other party. If a stakeholder organisation feels that particular information being withheld by the consultor might have significantly affected the view it had of proposals or plans, then disclosure would appear to be necessary.

The RTPI Recommends

- Scoping a consultation to address those aspects which stakeholders have a reasonable expectation will be covered in the exercise;
- Using pre-consultation discussions with key stakeholders to establish their expectations of the nature and scope of information to be released in the course of a formal consultation exercise;
- Anticipating the most likely questions arising in a public involvement exercise, preparing and publishing comprehensive Q's and A's;
- Advising stakeholder organisations that they will be expected to disclose such aspects of their membership involvement, decision making and governance as would be relevant to an evaluation of their submissions to a consultation.

No 21 Standards for Consultation - Fair Interpretation

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The sixth Charter principle is **Fair Interpretation** and this places a strict burden on consultors to analyse and interpret consultation output data objectively.

Clearly there are circumstances where the level of trust between consultor and consultees is high, and where good relations exist between all parties. On occasions, however, controversial proposals or a history of poor relationships can result in considerable scepticism and, in extreme cases, a clear lack of confidence in the impartiality of the consultor.

Public bodies need to be alive to these different scenarios and respond to this standard by taking steps to ensure not only that data is fairly interpreted, but that it is seen to be so interpreted.

The RTPI Recommends

- Publishing raw output data (e.g. public meeting minutes, focus group reports, survey results etc) whenever appropriate;
- Explaining how the data will be analysed, and clarifying the distinction between analysis and interpretation;
- Using established methods of analysis and statistically sound procedures;
- Considering the involvement of trusted third parties, either to advise on the analysis, to undertake the analysis, or to provide independent oversight of the interpretation;
- Discussing the need for independent verification with key stakeholders;
- Using accreditation schemes to demonstrate adherence to best practice standards.

No 22 Standards for Consultation - Publication

The Issue

Greater emphasis on community involvement will prompt a requirement for a means to ascertain that consultation and other activities are being undertaken to an appropriate standard. The Consultation Charter provides for seven principles, adherence to which can act as an indicator of best practice.

The final Charter principle is **Publication** and this refers both to the output of consultation as well as the eventual outcome. This is the practical application of the over riding requirement of transparency and is intended to ensure that everyone who takes part in community involvement activities can see what happened as a result of their participation.

It is not enough just to publish; the method chosen must be such that those with a significant interest can easily access the relevant information.

The RTPI Recommends

- Deciding upon a publication plan at the outset, and publicising this when the community involvement process begins;
- Selecting methods of publication which are appropriate for the participating consultees and also for others with an interest in the issue;
- Drawing a clear distinction between the publication of the *output* and the *outcome*. For *output*, it is helpful to indicate precisely how the data was gathered, and to use consultees' own submissions whenever possible;
- Avoiding crude summaries of complex arguments advanced by stakeholders; publish qualitative and quantitative analyses with explanations of the methods used;
- Showing how the *outcome* of consultation and public involvement has taken account of the contributions made by stakeholders and others;
- Making best use of new technology by posting relevant publications on the internet, whilst also providing a facility for non-digital organisations and individuals to obtain equivalent information.

Planning Aid

Engaging **Communities** in Planning

Volunteer

for Planning Aid

Do *you* want to...

- use your skills to **make a difference** to people's lives?
- view the planning system from **another perspective**?
- help improve the **public perception** of planning?
- meet **like-minded professionals**?
- find new opportunities for **Continuing Professional Development**?

Planning Aid offers stimulating and varied volunteering opportunities that match your skills and interests. In return we provide support, relevant training and pay expenses.

For information on volunteering opportunities in your area, contact the National Planning Aid Unit...

Telephone 0121 766 5298
