Dear Paul

**Question from Councillor Sargent on the recycling scheme roll out**

1. In response to question 1, please find attached details of the recycling facilities currently available at each site listed.
2. The majority of these sites have some form of recycling facility and it is our intention that all sites will eventually be included in the new Refuse and Recycling Scheme. We will be delivering bins in the near future. The size of bin provided will be dependent upon the space available at each site. Unfortunately exact delivery dates cannot be given at this point.
3. Lessons have been learnt from the initial rollout and these have been used to improve the rollout of Tranche 2. We have undertaken more detailed surveys, improved staff training and response times and believe we have become a slicker operation. The number of calls received by the City Works Contact Centre reflects this.
4. My understanding is (after speaking with the staff at City Works) that the Area A Manager was involved in the process of rolling out the recycling scheme from its inception as part of the senior management team. A dedicated Implementation Team was set up. Frequent operational update meetings are being held, which include relevant personnel, all Area Managers and the Implementation Team, to resolve issues surrounding the implementation of the scheme.

Yours sincerely

**Councillor Jean Fooks**  
Portfolio Holder for a Clean City
