

Recommendation to Executive Board from Finance Scrutiny Committee

At the meeting of the Executive Board on 18 June 2007 the Board considered some recommendations from the Finance Scrutiny Committee on 13 June concerning performance monitoring issues.

The Board responded to the recommendations addressed specifically to it in draft minute 5 (1) and noted the remaining parts as follows: -

- (2) that the Strategic Director (Housing, Health and Community) submit a report to a future meeting of the Committee explaining the method used for measuring performance regarding rent collection (*this is being done*);
- (3) to express support for the approach outlined by the Strategic Director (Finance and Corporate Services) for improving performance regarding equalities targets;
- (4) to congratulate staff for the improvements in performance during the year;
- (5) that the Department of Communities and Local Government be lobbied for the inclusion of climate change indicators to be included in the national set to be measured in the new CAA framework.

Following further consideration of the draft minutes the Board is now being asked to endorse minute 5 (5) above, and agree that a letter be sent to the Department of Communities and Local Government asking for climate change indicators to be included in the national set to be measured in the new CAA framework.
