

Report of: Policy, Performance & Communications Manager

To: City Executive Board

Date: 3rd March 2010

Item No:

Title of Report: 3rd Quarter Performance Report 2009/10

Summary and Recommendations

Purpose of report: This report highlights the performance for the second quarter (October – December) 2009/10 in the areas of specific interest for Executive Board.

Key decision: No

Board member: Cllr Bob Price

Report Approved by: Board member: Cllr Bob Price Finance: Emma Burson Legal: Jeremy Thomas Policy Framework: Corporate Plan 2009-12: Transform Oxford City Council by improving value for money and service performance.

Recommendation(s): To note the performance information

1. Introduction

- 1.1 This report outlines performance against the National and retained Best Value Performance Indicators (BVPI) for quarter 3, highlighting where progress has been made and those indicators that did not meet their target or are within tolerance. Also highlighted are achievements against key Corporate Priorities as set out in the Corporate Plan 2009-12. Details of performance against all corporate indicators are published in *'Performance Matters.'*
- 1.2 Appendix A lists the results alongside year-end quartile positions, year-end targets and annual trend. The 'Status' column clearly shows our progress against our year-end target (on target, within tolerance or intervention / explanation required).
- 1.3 This is a standard Performance Report with no financial, equality, legal or environmental implications. There is no risk level associated with this report.
- 1.4 A summary of the results of the recent internal audit on data quality relating to performance indicators is attached at appendix B.

2. Performance against the National Indicators and BVPI

- 2.1 Improvements in performance made in quarter 2 have been consolidated and we have seen additional improvements in quarter 3
- 2.2 Developments in performance management within the Council particularly through the work of the Performance Board mean that we have moved away from just monitoring performance to managing performance. Where any indicator is off target, Service Heads are required to produce an improvement action plan which is regularly reviewed by the Corporate Performance Board.

On Target (Green)

- 2.3 At the end of December 2009 62 performance indicators were on target (70%). This compares with 51% at the end of the 3rd quarter in 2008. 83% of National Indicators and 82% of Corporate Plan targets are being met. This represents a substantial improvement on our performance last year and reflects the shift from performance monitoring to performance management that has taken place over the last eighteen months.
- 2.4 *NI155 Number of affordable homes delivered* is a local area agreement target and we continue to be above target with 121 affordable delivered in the first three quarters of this financial year. Year end target is 150 affordable homes and we are on track to meet this.
- 2.5 *BV064 Private Dwellings Returned to Occupation* is over target with 15 dwellings returned to occupation against a year end target of 8 dwellings.
- 2.6 *CPI3.7 Increase the proportion of our spending with local businesses to 30%:* We were unable to report against this indicator last quarter but we now have results and 32.33% of our spending is with local businesses.
- 2.7 *BV213 Homelessness Cases Prevented (Per 1,000 Households).* This indicator was at monitor in the last quarter but is now on target with 278 homelessness cases prevented, equating to 4.28 per 1000 households.
- 2.8 *BV218b Abandoned Vehicles Removed Within 24 Hours (%)*. Last quarter this indicator was at intervene but is now on target with 95% of abandoned vehicles being removed within 24 hours.
- 2.9 *BV079b_i This Year's Overpayments Recovered (%)*.The year to date result is 87.39% a considerable improvement on last year's calculated result of 78.64%.
- 2.10 NI181 Time to Process Benefits New Claims and Change Events (Days). A total of 520 new claims and 2,316 change events were processed during December. The average processing times of 17.88 and 13.98 days respectively produced a NI 181 result for the month of 14.70 days. This was slightly down on

the results of the previous two months but the cumulative result remains very positive at 11.8 days - well within the 17 day target.

Within Tolerance (Amber)

- 2.11 There are 12 measures (13%) in quarter 3 that were under target but within tolerance at the end of quarter 3. Five indicators that were on target in September now fall under this category. These measures close to target include:
- 2.12 BV202 Number of Rough Sleepers (Snapshot). 13 people were found in December's street count. 6 were A10 nationals with no recourse to public funds and therefore are unable to access accommodation provision in the UK. All are also refusing offers of repatriation. The Street Services Team are actively helping them look for work but this is difficult in the current climate.
- 2.13 *BV012* Days Lost to Sickness (Avg) (excluding unpaid)*. 9,303.94 days which equates to 8 days average absence per employee. This figure is calculated by extracting those employees who were diagnosed with Swine Flu and those employees who had absences categorised as Infections lasting 5 or more days in a single episode (Since June 2009). Absences including the above two categories totalled 9,930.31 days paid leave. This equates to 8.54 average days per employee.
- 2.14 BV212 ↓ Days to Re-Let Council Houses (Avg Days). This is currently 25.3 average days against a target of 24 average days. This is, however, an improvement against our position in the third quarter of last year which was 26.2 average days.
- 2.15 BV009 ↑ Council Tax Collected (%).At the end of December the position on current year Council Tax collection remained very similar to last year. We had collected 83.97% of the 'collectable debit' as opposed to 84.24% this time last year. This year's collectable debit is £63.3m (4.23% higher than last year). Last year's collection rate had moved on from 96.89% at year end to 98.10%.

Off target (Red)

- 2.16 Thirteen (15%) indicators are off target and at intervention level at the end of the 3^{rd} quarter.
- 2.17 BV076c Fraud linvestigations/1000 Caseload. This performance measure has again fallen into the intervention bracket. The reason for this is most likely the Xmas close down. The number of closed investigated cases target for the year is 900 cases, to 01/01/10 678 cases have been investigated and closed, this is on target. The BVP76c is dependent on the number of live benefit case load. This now stands at 11782. The higher case load figure, which we have no control on and is a direct result of the economic climate, is effecting the performance target. Two temporary investigators are joining the team from 11/01/10, this will result in more cases being investigated and closed. It is anticipated that despite the increased live benefit case load the annual performance measure will be met.
- 2.18 BV008 Invoices Paid Within 30 Days (%). We continue to struggle to make progress in paying invoices within 30 days of receipt. We achieved 96.19% by the

end of the quarter against a target of 97.25%. More than 50% of invoices, however, have been paid within ten days for every month of the financial year except April 2009.

- 2.19 BV079a ↑ Cases Where Calculation of Benefit Correct (%).This continues to be a challenging target due in part to the complexity of the Housing Benefit Regulations. Where trends have been identified, i.e. with the issue of the start date of awards, training has been delivered and improvements realised. A restructure of the Quality Team is now underway and will be completed by 15 March 2010. This new Projects & Improvements Team will be better equipped to monitor performance, correct errors and deliver training to result in an improvement in this measure.
- 2.20 *NI014 Avoidable contact: Customer Contacts Per Customer Request (Avg).* The target for this indicator is 27.94% avoidable contact and at the end of the third quarter the result is 43.43%. The target for this year was based on the results of three surveys covering approximately 3,000 customer contacts carried out in 2008/09 and the cumulative result from these surveys was 31%. This years results are based on over 15,000 customer contacts and it appears that the results of the initial surveys may have been less than reliable as neighbouring district councils are also reporting results in the region of 40% avoidable contact.
- 2.21 *CPI4.6 Personal Robbery (Incidents).* There was an increase in robbery during the summer 2009. Performance has improved since then but the target will not be reached by the end of the financial year. Activities have included intensive work with the student community, including foreign language schools and the targeting of known offenders.

3. Performance against Corporate Priorities-Key achievements

- 3.1 In addition to National Indicators and retained Best Value Performance Indicators we also monitor progress against the Corporate Priorities as laid out in the Corporate Plan 2009-12. At the end of the 3rd quarter 23 of these indicators (82%) were on target, 2 are within tolerance (amber) and 3 are off target.
- 3.2 We are on target in relation to the majority of indicators relating to our corporate priorities. Listed below are key achievements under the 6 strategic priorities;

More housing, better housing for all

- 3.3 We are currently ahead of target to increase the number of Council owned homes meeting the Decent Homes standard to over 94% with a result of 93.73% at the end of the 3rd quarter.
- 3.4 The stock strategy has been developed and is in place.
- 3.5 The accreditation scheme is on target to be implemented by the end of this year.

Tackle inequalities and support communities

- 3.6 We are continuing to support the Concessionary Bus Fares Scheme, with a majority of passes being issued on time.
- 3.7 We have now provided over £362k in the form of grants to voluntary sector organisations to provide financial and other advice.
- 3.8 Grants of over £244k have also been provided to arts and cultural organisations to work in and with disadvantaged and less involved sections of the community.
- 3.9 Three of our community associations now have 'Visible' accreditation. The current work programme clearly shows we will have 4 more accredited associations by year end.

Improve the local environment, economy and guality of life

- 3.10 98% of our streets were free from litter at the end of the 3rd quarter.
- 3.11 Three of our parks maintained the Green Flag Status which means they are among the best parks and green spaces in the country
- 3.12 The work programme to improve the play areas is on target.

Reduce crime and anti-social behaviour

- 3.13 We have provided free holiday activities for a further 985 5-19 year olds, living in the most deprived areas in Oxford and are well on course to provide 1000 free holiday activities by year end.
- 3.14 A total of 287 enforcement actions have been undertaken by the end of the 3rd quarter against a year end target of 100 actions
- 3.15 There is a City centre manager in post and working well on the 'basics': coordinating improvements to street cleansing, trade refuse, an anti-litter campaign, Christmas in Oxford.

Tackle climate change and promote sustainable environmental resource management

- 3.16 Our programme to reduce a further 800 tonnes in CO2 emissions which is a reduction of 16% compared to 2005/06 levels is going well. 680 tonnes of CO2 emissions have been reduced by the end of quarter 3. We remain in a strong position to meet the target of reducing carbon emissions by 800 tonnes by year end.
- 3.17 Our SAP (energy efficiency standard) rating for our council managed housing stock is at 71 which puts us on target and we envisage we will maintain this rating through the course of the year.

Transform Oxford City Council by improving value for money and service performance

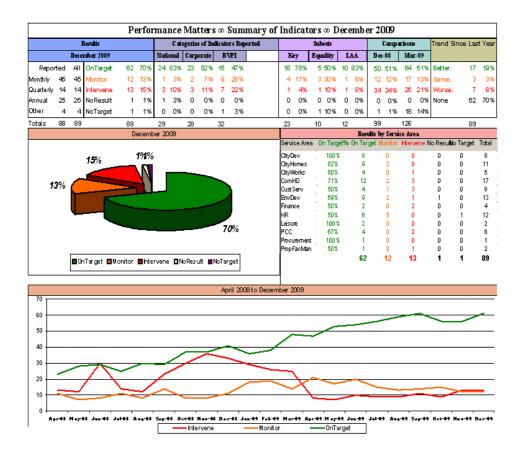

- 3.18 We are currently on track to make cost and efficiency savings of over £3 million by year end.
- 3.19 A new corporate approach in managing customer complaints is being introduced, which will be assisted by the introduction of the CRM system.
- 3.20 We have increased staff attendance and as at the end of quarter 3 we had attendance rates of over 95%.
- 3.21 92.90% of our customers can reach us first time on the Council's main lines and this was above the target around 90%.

Priorities off target

- 3.22 With respect to some of the corporate priorities we did not meet the following comments are made.
- 3.23 Against the priority of increasing the percentage of recycled or composted to 40% we are slightly behind target. We are currently recycling or composting 38.26% of total domestic waste but this will be bolstered by the introduction of the food composting scheme over the coming months.
- 3.24 We are now unlikely to undertake a survey of users of community centres to assess current satisfaction levels and aspirations for future developments before the new financial year.
- 3.25 We are now unlikely to create and adopt Area Action Plans based on the findings of consultations and on local members' proposals before the beginning of the new financial year.

4 Summary of Performance

4.1 The table below shows a summary of our performance and this is further highlighted in the pie chart.

5. Recommendation(s):

To note the performance information.

Appendix B – Data Quality Report Tabled at Corporate Performance Board

Performance Board 12-01-10

Data Quality Report PWC

Internal Auditors were commissioned to conduct a spot check data quality audit on Performance Indicators ranked as most high risk in the Data Quality Report tabled at the performance Board in November 2009. In total 19 performance indicators were audited.

Overall the report gives 'moderate' level assurance which is the second highest level of assurance in a scale of four.

Moderate assurance is defined in the audit report: "There are some weaknesses in the design and/or operation of controls which could impair the achievement of the objectives of the system, function or process. However, either their impact would be less than significant or they are unlikely to occur."

There is clear indication of improvement in data quality procedures adopted since the beginning of this financial year compared to what was in place last year.

The report has not yet been finalised but the main issues uncovered have been weaknesses in supporting documentation/audit trail. It was found, in some cases, that a complete audit trail was not available to back up reported results. In a small number of cases supporting documentation did not agree with reported results.

<u>Actions</u>

Management responses to detailed audit findings will be submitted to address specific data quality weaknesses. These shall be documented in refreshed data collection/reporting procedures.

Audit report will be the subject of data quality workshop once the report is finalised. Particular emphasis will be placed on ensuring that reported results are backed up with formal documentation, spot checks to ensure that documentation marries up with results and the importance of ensuring audit trail is available.
