CRR-031-18-19	Economic Growth	Local, national or international factors adversely affect the economic growth of the City	T	New trading and immigration arrangements with the EU from 1 January 2021. COVID19 lockdowns will continue to prevent and restrict economic activity through much of 2021.	Post-transition, this may affect vehicle manufacturing, logistics and wider import and export demand or capacity, and lead to business relocation divestment decisions in extreme cases. It's possible, certain sectors may have shortages (health, research, technical skills). It is possible there will be some job losses in the sectors affected by trade issues. COVID19 will hit consumption spending further, affecting the viability of business inc. restaurants, travel and tourism, events, creative and cultural sectors. Unemployment rises and long-term furlough may induce labour market scarring, slowing re-employment and lowering participation rates. This may affect certain resident groups more (low-skilled, carers, young). Workers who lose jobs may not have the skills for new ones. Ongoing fiscal challenges may reduce public sector investment in infrastructure and services.	1-Jun-2018	Matthew Peachey	5	4	5	5	4	4	Despite some positive trends, the risk still remains at Red. Issues relating to inflation, labour market supply, global economy, COVID levels locally, border arrangement, local business support being scaled back and business rates commencing suggests that while we have some short term positive signs, there are still numerous risks.
