

To: Cabinet
Date: 16 March 2022
Report of: Head of Corporate Strategy
Title of Report: COVID 19: Oxfordshire System Recovery and Renewal Framework

Summary and recommendations	
Purpose of report:	To consider adoption of a countywide and systemwide strategy for recovery and renewal in Oxfordshire following the COVID pandemic.
Key decision:	Yes
Cabinet Member:	Councillor Susan Brown, Leader and Cabinet Member for Inclusive Growth, Economic Recovery and Partnerships
Corporate Priority:	All
Policy Framework:	Council Strategy 2020-24

Recommendation(s): That Cabinet resolves to:	
1.	Adopt the Oxfordshire System Recovery and Renewal Framework, as set out in Appendix 1, as the key partnership document guiding joint programme planning beyond the COVID-19 Pandemic period; and
2.	Delegate final revisions to the Chief Executive, in consultation with the Leader of the Council, as partnership organisations complete their engagement and decision-making processes.

Appendices	
Appendix 1	Oxfordshire's Recovery and Renewal Framework

Introduction and background

1. Effective partnership working across Oxfordshire has been at the heart of the local system response to the COVID-19 pandemic. As the national and local picture improves, system partners have developed a shared framework for Recovery and Renewal (see Appendix 1). This document sets overarching common ambitions for the issues and themes that will be worked on together as organisations and the community learn from the pandemic. It aims to ensure that Oxfordshire is best placed to recover from the immediate impacts of the pandemic, to support the long-

term renewal of communities and places, and enhance our joint impact on national and international challenges.

2. System partners have worked closely together since early in 2020 to deliver a joined-up response across the board spectrum of COVID-19 impact. Partners have developed joint structures to support those required to stay at home, to encourage and enforce adherence to COVID restrictions, to monitor and contain the spread of the virus and to maintain the continuity of essential services. Joint responses have managed the impact on health and social care services and worked closely with Oxford's universities and other education providers, the police, the voluntary and community sector and many others, while maintaining the many essential local authority services. From later in 2020 and into 2021, joint activity delivered community testing and laterally the successful roll out of the vaccination programme. Partnership interventions have also sought to address the secondary impacts of the pandemic for individuals, communities and businesses through joint work on community engagement, business support, financial hardship and economic recovery.
3. Throughout 2021, Oxfordshire's system-wide COVID-19 response continued to focus on the immediate health impacts of the pandemic, containing outbreaks and minimising the transmission of the virus in the community. In line with the easing of most legal restrictions during the summer of 2021, system-partners revisited the long-term impact of COVID-19 and reviewed the shared focus of planning for recovery and renewal.
4. The pandemic has led to economic, community and service impact that has yet to be fully understood at the system level. However, it can clearly be seen that existing inequalities and service and community pressures have been amplified, with likely long-term impacts. At the same time there has been a net financial impact of around £12 million on Oxford City Council as a result of lost income and increased expenditure, after Government support funding has been taken into account. As with many pre-existing challenges, the impact and effective responses will often lie across several agencies and sectors.
5. To coordinate and prioritise COVID and post-COVID activity, and prioritise resource allocation, partners agreed to develop a set of joint themes for the next phase in the pandemic period and to bring together shared system priorities and joint ambitions for recovery and renewal in an overarching framework.
6. This framework was initially drafted during late 2021 through engagement with system partners, drawing on priorities, impact analysis and community insight held within individual organisations and thematic partnerships. Progress on the framework was paused during December to allow partners to focus on the enhanced response to the Omicron variant and the framework is now being brought forward for formal adoption and incorporation into partnership planning for the new business year.

Introducing the Framework

7. The objective of an agreed joint framework is to provide a mechanism for driving systems working on renewal and an ongoing structure for collaboration across the Oxfordshire system. It will enable us to better coordinate how we recover from the impacts of COVID and implement changes in the light of what we have learnt for our communities, organisations and partnerships.

8. At the time of writing, the significant increase in infection rates related to the Omicron variant is waning. While service pressure in health and social care remains significant, the impact on educational settings remains high and workforce pressure across Oxford City Council's services are evident, system partners are stepping back from the period of most concern. Nevertheless, the potential for changes in the nature of the pandemic and for service disruption generated by the cumulative risks associated with COVID's direct and indirect impact remains, Therefore, while planning for the future, a level of COVID readiness will need to be maintained. Reflecting this position, the framework for recovery and renewal is arranged around three key aims:
 - **Consolidating recovery and building resilience:** Protecting key services and keeping social life and the economy open by sustaining our system response to COVID-19 and working together on addressing new pressures. This includes changes to service delivery as well as ways of working eg. our ongoing engagement with Voluntary and Community Sector (VCS), businesses and key partners.
 - **Addressing the unequal impact of COVID-19:** Proactively using qualitative and quantitative data and insight to identify the groups most impacted across a range of cross-cutting issues, beyond the immediate impact on health, and tackling impact with a focus on the total strengths and needs of individuals and families.
 - **Supporting renewal:** Identifying new approaches and activities underpinned by the lessons we have learnt to date, building Oxfordshire's resilience, not only against future waves of the pandemic but also in terms of economic and community resilience to wider societal challenges including climate change and ecological impacts.
9. Across the three themes, two cross cutting priorities are recognised as needing to inform recovery and renewal thinking across the county:
 - **Climate change action:** Championing climate action across Oxfordshire as we work together to address climate change, build climate resilience and support nature recovery.
 - **Tackling inequality:** Driving equal access and delivery of support across all local communities, narrowing health, social and educational inequalities and tackling poverty.
10. The full Framework document is available at Appendix 1.
11. This document is necessarily a start point for longer term planning. Its aim is to act as a bridge between current partnership COVID response, delivery and planning, and future longer-term planning across the partnership agenda. It seeks to bring together, rather than replace, existing county-wide plans and strategies and ensure that recovery and renewal activities are incorporated into the wider partnership context.

Alignment with Oxford City Council strategies

12. The Oxfordshire System Recovery and Renewal Framework sets out a number of objectives and captures an approach to collaborative working that Oxford City Council has embraced through the last two years of the pandemic. Council officers and the Council Leader have worked with colleagues across the system in its creation. The Framework aligns well to a significant number of the Council's existing and emerging strategies, policies and action plans. These include the overarching Council Plan 2020-2024 and draft Budget and Medium Term Financial Plan 2022-26, and:

Consolidating Recovery and Building Resilience

- Oxford Economic Strategy and Implementation Plan (post consultation)
- Oxford Local Plan 2036
- Corporate Debt Management Policy
- Procurement Strategy
- Covered Market Leasing Strategy

Addressing the Unequal Impact of COVID-19

- Equalities, Diversity and Inclusion Strategy (post consultation)
- Thriving Communities Strategy (pre consultation)
- Housing and Homelessness Strategy
- Oxford Volunteering Strategy
- Oxford Children & Young Person's Strategy
- Oxfordshire Joint Health & Wellbeing Strategy

Supporting Renewal

- Oxfordshire Industrial Strategy
- Oxfordshire Local Infrastructure Strategy
- Discretionary Rate Relief Policy
- Oxford City Centre Action (post consultation)

Climate Change Action

- Oxford City Council Fourth Carbon Management Plan
- Zero Carbon Oxford Partnership Roadmap 2040
- Oxford Zero Carbon Action Plan
- Air Quality Action Plan
- Parks and Green Spaces Biodiversity Action Plan
- Urban Forest Strategy

Tackling Inequality

- Financial Inclusion Strategy
- Discretionary Housing Payment Policy

- Oxfordshire Food Strategy (pre-consultation)

Next Steps

13. As Oxford City Council's strategies and policies come up for renewal and new ones are developed, they will be required to have regard to the Oxfordshire System Recovery & Renewal Framework.
14. The Oxfordshire COVID response system comprises health, local authority, education and community safety participants alongside representatives of strategic partnerships, including OxLEP. These partners connect to a broader network of key deliverers including schools, business, town and parish councils and the voluntary and community sector. Core system partners including Oxfordshire's other councils, health trusts, police, education and voluntary sector partners have agreed to adopt the joint Recovery and Renewal framework. This will start with local authorities, where recommendations to adopt the framework will be made to the relevant decision makers during March 2022.
15. Significant engagement with system partners has already taken place. However, where additions and revisions are requested through the decision-making process, this report recommends that agreement to a final published version is delegated to the Chief Executive, in consultation with the Leader of the Council. Consultation and communications are also being asked to adopt or note the Framework.

Financial implications

16. Development of the Recovery and Renewal Framework was met within existing resource designated for COVID-19 programme management and funded from dedicated government grant.
17. The Recovery and Renewal Framework does not in itself direct resources and so while organisations are asked to adopt the framework as a strategic document within their policy making frameworks, there is no direct financial impact.

Legal issues

18. The adoption of the Oxfordshire System Recovery and Renewal Framework (which is appended and fully understood) will create an obligation on Oxford City Council to pay due regard to the contents of the same when making decisions in the future.

Level of risk

19. There is no specific risk assessment associated with the Framework. Its successful delivery is clearly contingent on a collaborative and consistent approach among a number of sovereign partner organisations.

Equality & Inclusion Implications

20. The Framework outlines the unequal impact of COVID and notes the need for detailed analysis to fully understand the direct and indirect impacts in the short, medium and long term. Activity is already underway within Oxford City Council and under wider system structures to directly address equality and inclusion as it relates to COVID-19. This includes looking to address health inequality, vaccine outreach and support to homeless individuals. In the development and delivery of the ambitions set out within the framework and the progression of new partnership planning and activity,

detailed equality impact will be required building on the new learning and impact from the COVID-19 period supported through re-analysis of data and information, for example within the updated Joint Strategy Needs Assessment and in the annual report of the Director of Public Health.

Environmental Impact Assessment

21. The Framework champions the need for coordinated action across the county to address climate change, build climate resilience and support nature recovery. It sets out a number of objectives to support this including: nurturing the creation of opportunities such as green apprentices driven by technological change and our ambitions for a net zero Oxfordshire and working with partners to make Oxfordshire a centre for green and sustainable technologies through a local 'Green New Deal'.

Conclusion

22. The Oxfordshire System Recovery and Renewal Framework is aligned to a number of the strategic objectives already set out by Oxford City Council. Its adoption as a framework for post-pandemic collaborative work across the Oxfordshire system offers the prospect of closer orientation of partners' efforts which should help make this Council's objectives more achievable.
